

DIRECTIONS FOR USE

For control of Brown Patch (*Rhizoctonia solani*) of Southern or warm season lawns such as St. Augustine, Bermuda and similar grasses: Make one application in the Fall or Spring at first sign of infection. Mix one qt. in sufficient water (10-15 gals.) to cover 1,000 sq. ft. Apply with sprinkler can, hand sprayer, or any other convenient method of obtaining even coverage. Then, lightly water the treated area to insure movement of the chemical through the grass to the soil level. Retreat the area 3-4 weeks later if it has been subjected to unusually heavy rainfall, or is flooded, or if the disease is severe or reappears. Under certain growing conditions, a temporary discoloration of the grass may appear occasionally. This causes no harm and disappears shortly.

For Dichondra: Treat as above, using 1½ qts. mixed in 40 gals. of water per 1,000 sq. ft.
