## HERBICIDE

### FOR POST-EMERGENCE WEED CONTROL

**ACTIVE INGREDIENT:**

Disodium Methanearsonate ..... 63%

**INERT INGREDIENTS:** ..... 37%

Total arsenic (as elemental)  
all in water soluble form ..... 25.65%

EQUIVALENT TO 100% Disodium Methane-  
arsionate Hexahydrate

(18 pt)

## CAUTION

(12 pt)

### KEEP OUT OF REACH OF CHILDREN

Harmful if swallowed. Avoid breathing of dust or spray mist. Avoid contact with skin, wash thoroughly after using. Avoid contamination of feed and foodstuffs. DO NOT CONTAMINATE WATERS USED FOR DOMESTIC CONSUMPTION OR BY ANIMALS, WILDLIFE AND AQUATIC LIFE, OR WATER USED FOR IRRIGATION PURPOSES.

Do not use this product in any manner not specified on this label, since crop residues and injury may result.

**NET CONTENTS 5 POUNDS**

READ ENTIRE LABEL, AND USE IN ACCORDANCE WITH LABEL CAUTIONS AND DIRECTIONS.

"ANSAR" 184 Herbicide must be thoroughly dissolved. Fill the tank about half full with water, and with the pump operating, add the required amount of "ANSAR" 184 Herbicide. Finish filling the tank with water, and apply. If preferred, "ANSAR" 184 Herbicide can be premixed by dissolving the required amount of "ANSAR" 184 and surfactant in 3 to 5 gallons of water in an open head bucket. This premix should then be placed in the partially filled spray tank, and the tank filled.

Do not store spray solution in tank for a prolonged period, and clean application equipment thoroughly after every use by flushing with water.

### DIRECTIONS FOR USE

**COTTON** "ANSAR" 184 Herbicide should be applied with a low volume sprayer having satisfactory pumping and bypass action. Nozzles should be placed so as to avoid spraying the cotton, but also give good coverage of the weeds and grasses. PROPER COVERAGE IS VERY IMPORTANT. Adjust nozzles to allow maximum coverage of weeds, and grasses, with minimum contact of the cotton plant. KEEP SPRAY OFF COTTON FOLIAGE.

Slight burning and a reddish discoloration on the cotton leaf may occasionally occur following the recommended treatment but the plant will develop normally.

"ANSAR" 184 Herbicide is useful as a directed spray application to weeds in cotton for post-emergence control of weeds and grasses including Johnson grass, nut grass, water grass, goose grass, dallis grass and cocklebur. Mix at the rate of 4 1/4 to 5 lbs, "ANSAR" 184 Herbicide, plus 1 1/2 to 2 quarts of a suitable surfactant, in 50 gallons of water. Apply at a broadcast rate of 40 gallons of this solution per acre. For band application, apply at the rate of one gallon of solution for each 1 inch of band width to be treated on cotton grown in 40-inch rows. A second application may be required during humid growing conditions. Time the second application, if necessary, about 1 to 3 weeks after the first application. APPLY ONLY WHEN COTTON IS 3 INCHES HIGH TO FIRST BLOOM. DO NOT APPLY AFTER BLOOMS APPEAR. DO NOT FEED TREATED FOLIAGE TO LIVESTOCK, OR GRAZE TREATED AREAS.

### GENERAL GRASS AND WEED CONTROL

**IN NON-CROP AREAS** "ANSAR" 184 Herbicide is useful for controlling Johnson grass, nut grass, water grass, and goose grass on ditch banks, right-of-ways, storage yards, and other non-crop areas.

Mix "ANSAR" 184 Herbicide at 5 pounds plus 1-1/2 to 2 quarts of a suitable surfactant in 50 gallons of water. Spray the unwanted vegetation thoroughly, to the point of run-off. Make certain that complete coverage is obtained. Power sprayers are preferred, but any spray equipment which will give good coverage may be used. If regrowth occurs in spots, retreat as required. KEEP LIVESTOCK OFF TREATED AREAS.
