DIRECTIONS FOR USE ON COTTON (Seedling Disease Complex - Rhizoctonia, Pythium and Fusarium): For soil in furrow spray applications at planting time, use 1/2 gallon per acre mixed with 12 - 15 gallons of water. Spray all the soil that surrounds and covers the seed. Two nozzles work best; center the front nozzle over the open furrow to spray soil around the seed and the rear nozzle to spray covering soil as it fills the furrow.

NOTICE TO BUYER: No warranty of any kind, express or implied, is made concerning the use of this product. User assumes all risk and liability resulting from handling, use or application.
