TO ATTACHED COMMENTS.

ACTIVE INGREDIENTS:

Pentachloronitrobenzene 10%

INERT INGREDIENTS:

90%

Total 100%

CAUTION

KEEP OUT OF REACH OF CHILDREN

Avoid inhaling dust. This material may cause skin irritation. Wash hands and face thoroughly after using. Wear gloves and a respirator when loading the spreader or duster.

IMPORTANT NOTICE: Since the use of this product is beyond the control of the seller, seller makes no warranty of any kind, express or implied, concerning the use of this product. User assumes all risk of use or handling whether in accordance with directions or not.

DIRECTIONS FOR USE

LAWNS (Brown Patch — Rhizoctonia solani): For Southern or warm season lawns such as St. Augustine, Bermuda and similar grasses: Make one application in the fall or spring at first indication of infection. Apply 7½ lbs. per 1,000 sq. ft. Following application, the treated area should be lightly watered to insure movement through the grass to soil level. If the treated area is subjected to unusually heavy rainfall, or flooded, or if the disease is severe or reappears, the area should be retreated 3 to 4 weeks later. For Dichondra: Treat as above, using 7½ lbs. per 1,000 square feet.

For Northern or cool season lawns such as Rye Grass, Fescue, Bluegrass, Bent and similar grasses: Apply 2 to 2½ lbs. per 1,000 sq. ft. at first sign of disease. Repeat every 7 to 10 days during warm, damp weather. Water treated area lightly to wash chemical down to soil.

Note: Under certain growing conditions, a temporary discoloration of the grass occasionally may occur. This causes no harm and will disappear in a short time.
