

Terraclor[®] 30% GRANULAR

—SOIL FUNGICIDE—

ACTIVE INGREDIENT:

Pentachloronitrobenzene

INERT INGREDIENTS:

Total

Terraclor[®] is a trademark of Olin Corporation.

CAUTION

KEEP OUT OF REACH OF CHILDREN

Harmful if swallowed. Avoid inhaling dust. This material may cause skin irritation. Wash hands and face thoroughly after using. Wear gloves and a respirator when loading the spreader. Do not contaminate feed or foodstuffs.

USE CAUTIONS

This product is toxic to fish. Keep out of lakes, streams and ponds. Do not contaminate water by cleaning of equipment, or disposal of wastes.

Do not plant any root crop not registered for PCNB in rotation on PCNB treated soil.

Destroy empty bags by burning (KEEP OUT OF SMOKE).

DIRECTIONS FOR USE

CABBAGE, CAULIFLOWER, BRUSSELS SPROUTS, AND BROCCOLI (Clubroot — Plasmodiophora brassicae): Row Application: Apply 67 lbs. per 13,100 feet of row for cabbage, broccoli, and brussels sprouts or to 10,900 linear feet of row for cauliflower in a 12 to 15 inch band, by means of a suitable applicator, and rotate to a depth of 4 to 6 inches immediately prior to transplanting.

CABBAGE, CAULIFLOWER, BRUSSELS SPROUTS, AND BROCCOLI (Clubroot—Plasmodiophora brassicae): BROADCAST: Apply 100 lbs. per acre to the soil surface prior to transplanting. Disc and rotate to a depth of 4 to 6 inches. For cauliflower, broadcast application will be necessary for the first year. For Brussels sprouts, it is very important to rotate with the

CAULIFLOWER (Wire Stem or Black Rot — Corticium solani): Apply 33 lbs. per 12,400 linear feet of row in a band, centered on the row and mix to a depth of 2 to 4 inches. Application may be made simultaneously with planting, using suitable equipment.

DIRECTIONS FOR USE (Con't.)

BEANS (Root and Stem Rot - Rhizoctonia Solani): FURROW TREATMENT:— Apply 4 to 5 lbs. per 14,500 linear feet of row for bush beans, or per 8,430 linear feet of row for pole beans. Direct the material into the planting furrow and covering soil at planting time. Avoid getting the material concentrated around the seed otherwise delayed emergence may occur. Do not feed treated vines to livestock.

PEANUTS (Southern Stem and Root Rot — Sclerotium Rolfsii): PRE-PLANT SOIL MIX:— Apply 34 lbs. per 12,400 linear feet of row, in an 8 to 12 inch band, centered on the row and mix to a depth of 2 to 4 inches. Application may be made simultaneously with planting, using suitable equipment.

SURFACE BAND TREATMENT:— When pegging begins, apply 34 lbs. per 12,400 linear feet of row to an 8 to 12 inch band, directed at the plant crown and soil pegging zone.

Note: Do not use more than one application method during the same planting season. Do not feed treated vines to livestock.

POTATOES (Rhizoctonia solani): BROADCAST TREATMENT:— Use 60 to 83 lbs. per acre. Spread evenly over the soil surface prior to planting. Disc and cross disc to a depth of 4 to 6 inches.

ROW (in-furrow) APPLICATION: Apply 33 lbs. per 12,400 linear feet of row and work thoroughly into the top 4 to 6 inches of soil (it is essential that the fungicide is worked into the tuberforming zone of the soil). It is desirable to make treatment when the soil is slightly moist.

NOTICE TO BUYER

Seller makes no warranty, express or implied, by operation of law or otherwise, except that the product conforms to its chemical description and is reasonably fit for the purpose stated on the label when used in accordance with directions under normal conditions of use. This warranty shall not extend to the use of this product contrary to label instructions, or under abnormal conditions, or in combination with other materials, or under conditions not reasonably foreseeable to seller, and buyer assumes the risk of any injury or damage resulting from such use. Seller shall not be responsible for special, consequential or contingent damages arising from a breach of this warranty.
