SUPPLEMENTAL LABELING

1/1

PACE<sup>(R)</sup> Concentrated Pool Chlorinating Sticks

Active Ingredients:

Trichloro-s-Triazinetrione .....	99%
Inert Ingredients .....	1%
Available Chlorine .....	89%

EPA Reg. No. 1258-853

DIRECTIONS FOR SPA AND HOT TUB USE: It is a violation of federal law to use the product in a manner inconsistent with its labeling. Each half ounce of product will provide approximately 5 ppm available chlorine in 500 gallons of water.

Using an appropriate test kit, test and adjust the water to the following values: pH 7.2 - 7.8, total alkalinity 60 - 100 ppm, calcium hardness 200 ppm minimum. Maintain these conditions for proper spa and hot tub operation by frequent testing with a test kit. Do not allow cyanuric acid level to exceed 150 ppm. It is recommended that spas and hot tubs be drained every 30 - 90 days, more often under heavy use. Consult manufacturers' recommendations concerning the compatibility of chlorine sanitizers with their equipment. Some oils, lotions, fragrances, cleansers, etc., may cause foaming or cloudy water and may react with chlorine sanitizers to reduce their efficacy.

START-UP (FRESHLY FILLED): (1) Before use, read installation instructions and operating manual for appropriate feeder or dissolving container. (2) Turn on the circulation system and ensure that it is operating properly. Fill feeder or dissolving container with PACE<sup>(R)</sup> and maintain 4 - 5 ppm free available chlorine (FAC). Spa or hot tub should not be entered until FAC reaches 4 - 5 ppm.

REGULAR USE: (1) Test for FAC to assure 4 - 5 ppm. (2) After each use, adjust controls or add PACE<sup>(R)</sup> granules to obtain a feed dosage of 10 - 15 ppm FAC to control odor and algae. Spa or hot tub should not be entered until FAC reaches 4 - 5 ppm.

EXTENDED NON-USE PERIOD: During extended periods when the spa or hot tub is not being used, maintain 1 - 3 ppm FAC.

KEEP OUT OF REACH OF CHILDREN

**DANGER!**
