06/23/1988

1/1

SUPPLEMENTAL LABELING

FOR

PAGE CONCENTRATED POOL CHLORINATING STICKS

EPA REG. NO. 1258-853

ACTIVE INGREDIENT:

Trichloro-s-triazinetriene 99 %

INERT INGREDIENTS 1 %

available chlorine 89%

DIRECTIONS FOR COMMERCIAL OR PUBLIC POOLS: It is a violation of federal law to use this product in a manner inconsistent with its labeling.

1). Add 3 tablets of this product to each 10,000 gallons of water weekly or as needed to maintain 3-5 ppm free available chlorine (FAC).

2). Shock treat at least once per week or as needed with a calcium hypochlorite product such as "SHOCK IT". Follow label directions. An alternate method is to add 6 tablets of this product for each 10,000 gallons of water. Allow pool to stand until FAC drops to 5 ppm.

Cyanuric acid is used to stabilize available chlorine. Always maintain the free-available chlorine residual at 3-5 ppm as determined by test kit. Maintain cyanuric acid at approximately 50-100 using suitable test kit. Do not allow cyanuric acid to exceed 100 ppm. If over 100 ppm, reduce cyanuric acid by draining and replacing a portion of the water. Follow directions for chlorination.

ACCEPTED

JUN 23 1988

Under the Federal Insecticide, Fungicide, and Rodenticide Act as amended, for the pesticide registered under EPA Reg. No.

KEEP OUT OF REACH OF CHILDREN

DANGER!

SEE PRINCIPAL LABEL FOR COMPLETE PRECAUTIONARY INFORMATION AND STORAGE AND HANDLING INSTRUCTIONS
