Gentlemen:

Subject: **Fast Pace® Pool Chlorinating Granules**  
EPA Registration No. 1258-909  
Amendment Application of January 15, 1985

The amendment referred-to-above, submitted in connection with registration under FIFRA sec. 3(c)(7)(A), is acceptable provided that you:

- 1. Submit and/or cite all data required for registration/reregistration of your product under FIFRA sec. 3(c)(5) when the Agency requires all registrants of similar products to submit such data.
- 2. Submit five (5) copies of your final printed labeling before you release the product for shipment.

If these conditions are not complied with, the registration will be subject to cancellation in accordance with FIFRA sec. 6(e). Your release for shipment of the product constitutes acceptance of these conditions.

A stamped copy of the label is enclosed for your records.

We are changing our records to reflect the change in product name from "Hold Pool-Chlorine Concentrate" to "Fast Pace Pool Chlorinating Granules." From here on, our records will reflect this name as the primary name for which the registration was issued. Inquires for this product should mention this as the primary name.

Sincerely yours,

  
J. A. Castillo  
Product Manager (32)  
Disinfectants Branch

**PRECAUTIONARY STATEMENTS**

**HAZARDS TO HUMANS AND DOMESTIC ANIMALS**

**DANGER:**

Highly corrosive. Causes skin and eye damage. May be fatal if swallowed. Do not get in eyes, on skin, or on clothing. Do not handle with bare hands. Wear goggles or face shield and use rubber gloves and only thoroughly clean, dry utensils when handling. Irritating to nose and throat. Avoid breathing dust and fumes. Remove and wash contaminated clothing before reuse.

**First Aid**

**If in Eyes:** Flush with cold water for at least 15 minutes. Get immediate medical attention. **If inhaled:** Remove person to fresh air. Get immediate medical attention.

**CHEMICAL HAZARDS: DANGER:** Strong oxidizing agent. Use only clean, dry utensil. Mix only into water. Contamination with moisture, dirt, organic matter or other chemicals (including other pool chemicals) or any other foreign matter may start a chemical reaction with generation of heat, liberation of hazardous gases and possible generation of fire and explosion. Avoid any contact with flaming or burning material, such as a lighted cigarette. Do not use PACE Granules in any chlorinating device which has been used with any inorganic or unstabilized chlorinating compounds (e.g. calcium hypochlorite). Such use may cause fire or explosion.

**ENVIRONMENTAL HAZARD:** This product is toxic to fish. Do not contaminate lakes, ponds or streams by cleaning of equipment or disposal of wastes.

**STORAGE AND DISPOSAL:** Keep product dry in lightly closed container when not in use. Store in a cool, dry, well ventilated area away from heat or open flame. Do not reuse empty container. Rinse empty container thoroughly with water to dissolve all material before discarding. Securely wrap container in several layers of newspaper and discard in trash.

**EMERGENCY HANDLING:** In case of contamination or decomposition, do not reseal container. If possible, isolate container in open and well ventilated area. Flood with large volumes of water. Dispose of contaminated material in an approved landfill area or bury it in a safe place.

**TO DETERMINE POOL CAPACITY:**

Rectangular Pools: Multiply length x width x average depth x 7.5 = pool capacity (gals.)

Round Pools: Multiply radius (1/2 diameter) x radius x average depth x 23.6 = pool capacity.

It is a violation of federal law to use this product in a manner inconsistent with its labeling.

Directions for Pool Use

Scatter directly over surface of pool. Each ounce of product will provide approximately 0.4 ppm of available chlorine in 10,000 gallons of water.

Start Up

In a clean pool with no visible algae, bring chlorine residual to 1.0-1.5 ppm as follows:

1. Add 1/2 capful (approx. 3 oz.) of PACE Granules for each 10,000 gallons of water.
2. Test for chlorine residual, using a suitable test kit.
3. If chlorine residual is below 1.0 ppm continue to add PACE® Granules at a rate of 1 oz. per 10,000 gallons until this level is reached.

The day after your chlorine residual reaches 1.0-1.5 ppm, use cyanuric acid (e.g. PACE Stabilizer & Conditioner) as needed to stabilize your pool. Follow label directions. Adjust pH to the ideal range of 7.2-7.6.

Regular Care

Add 1/2 capful (approx. 3 oz) PACE Granules for each 10,000 gallons every other day, or as needed to maintain your chlorine residual from 1.0-1.5 ppm.

( ADDITIONAL POOL CARE RECOMMENDATIONS

pH - Maintaining pH in the ideal range of 7.2-7.6 is extremely important to the efficiency of your chlorine and swimming comfort. Test for pH often with a suitable test kit. Adjust pH as necessary, using products such as "PACE pH-Plus" or PACE pH-Minus <sup>dry acid</sup>.  
Superchlorination - Superchlorination with a calcium hypochlorite product such as "PACE Super Chlorinator & Shock Treatment" is recommended to burn out the organic material your filter can't handle and keep your water sparkling clear. Use as directed on the label, especially during excessive heat, when bathing loads are high, when water becomes dull looking or hazy, when there is a "chlorine" like smell or excessive eye irritation, or after heavy rains.

Shock Treat - If algae appear, shock treat your pool with a calcium hypochlorite product such as "PACE Super Chlorinator & Shock Treatment." Follow label directions. An alternate method is to add 3 1/2 capfuls (approx. 21 oz.) of PACE Granules for each 10,000 gallons of water. Allow the pool to stand until the chlorine residual drops to 3.0 ppm.
