DIRECTIONS FOR POOL USE

It is a violation of Federal law to use this product in a manner inconsistent with the label. PACE concentrated pool chlorinating Giant Tablets 3" Size, containing 89% available chlorine, are designed to dissolve slowly and provide a steady source of available chlorine in pools. Tablets control growth of algae and effectively kill many bacteria, thus help the pool in a sanitary condition. One tablet weighs approximately 7 ounces. If no residual is present, it is possible to increase the residual in pool water by 5.0 ppm with one tablet per 10,000 gallons of water.

For best results, use a dissolving basket, a floating container, or add the tablets to a skimmer in the surface skimmer. Do not permit tablets to contact plastic pool objects. Do not throw tablets directly into pool.

START UP

In a clean pool with no visible algae, bring chlorine residual to 1.0-1.5 parts per million as follows:

1. For each 10,000 gallons of water, put one PACE Giant Tablet 3" size (approx. 7 oz.) in a plastic leaf strainer in the surface skimmer.
2. Run pump and filter until totally dissolved (approx. 1 1/2 days).
3. Test for chlorine residual, using a suitable test kit.
4. If chlorine residual is below 1.0 ppm, add one PACE Giant Tablet 3" size per 10,000 gallons, wait until dissolved and check residual. Pool can be used when residual is 1.0 and 3.0 ppm.
5. The day after the pool's chlorine residual reaches 1.0-1.5 ppm use cyanuric acid (Stabilizer and Conditioner) to stabilize your pool. Follow label directions. Adjust ideal range of 7.2-7.6.

An alternate procedure is to use PACE concentrated pool chlorinating granules to bring chlorine residual of 1.0-1.5 ppm. Follow label directions for start up and maintenance.

REGULAR CARE

Use one PACE Giant Tablet 3" Size (approx. 7 oz.) for each 10,000 gallons of water weekly, or as needed to maintain the pool's chlorine residual from 1.0-1.5 ppm. Test daily.

STORAGE AND DISPOSAL: Keep product dry in tightly closed container when not in use. Store in a cool, dry, well-ventilated area away from heat and flame. Do not reuse empty container. Rinse empty container thoroughly, and to dissolve all material before discarding. Place in trash collection or disposal approved landfill area or bury in a safe place. **EMERGENCY HANDLING:** In case of contamination or decomposition, do not reuse container. If possible, isolate container in open and well-ventilated area. Flood with large volumes of water. Dispose of contaminated material in an approved landfill area or bury in a safe place.
