

1258-984

11/30/2000

1/4

**pace**  
concentrated pool chlorinating  
granules

for use in pools, spas and hot tubs  
sun protected

Active Ingredient:	
Sodium Dichloro-s-Triazinetrione Hydrated	99%
Inert Ingredients	1%
Total	100%
Available Chlorine	55%

- stabilized (sun protected) for extended chlorine life
- protects against bacteria and algae
- totally soluble

**KEEP OUT OF REACH OF CHILDREN**

**DANGER**

See First Aid Statement and additional precautions on back panel.

**NET WT. 5 LBS. (2.27 KG)**

**EPA REG. NO. 1258-984**  
**EPA EST. NO. 69470-MI-1**

Arch Chemicals Inc.  
501 Merritt 7  
Norwalk, CT 06856-5204

**ACCEPTED**  
NOV 30 2000

Under The Federal Insecticide, Fungicide and  
Herbicide Act, as amended, for the  
product registered under  
1258-984

**DIRECTIONS FOR USE**

It is a violation of Federal law to use this product in a manner inconsistent with its labeling.

This product is designed to dissolve quickly and completely providing a steady source of available chlorine in swimming pools to control growth of algae, kill bacteria and destroy organic contaminants..

**READ ALL PRECAUTIONARY STATEMENTS BEFORE USE.**

**METHOD OF APPLICATION:** Broadcast the product evenly over a wide area in the deepest part of the pool with water circulating. If any granules settle to the bottom of the pool use a pool brush to disperse.

**SHOCK TREATMENT:** Adjust pH to 7.2 to 7.6 with appropriate pH Plus or pH Minus product. Follow label directions. Add 1 lb. (16 oz.) of this product to 8,000 gallons of water (to provide a dosage of 8.2 ppm free available chlorine). Follow "Method of Application" above. Do not enter pool until chlorine residual is 1.0 to 3.0 ppm.

**ALGAE CONTROL:** If the sides or bottom develop algae spots, direct this product as close to the algae as possible. Follow shock treatment directions above. **Note:** Prolonged contact with pool surfaces may cause staining or bleaching. Immediately after treatment, thoroughly clean pool by scrubbing surface of algae growth, vacuum and cycle through filter. If necessary, repeat the treatment. Pool should not be entered until chlorine residual is 1 to 3 ppm.

**OPENING YOUR POOL:** Follow "Shock Treatment" directions above. Allow 30 minutes for product to disperse and test chlorine residual with a pool test kit. Repeat dosage, as needed, until chlorine residual is 1 to 3 ppm.

**WINTERIZING:** While the water is still clear and clean, prepare for long periods of disuse by applying 2 lbs. of this product per 8,000 gallons of pool water (to provide a dosage of 16.4 ppm free available chlorine). Follow the "Method of Application" above. Cover the pool with a pool cover and prepare the heater, pump and filter components for winter by following manufactures directions.

**WATER BALANCE:** To provide optimum product performance, swimmer comfort and crystal clear water, always maintain pH in the 7.2 to 7.6 range, total alkalinity 80 to 120 parts per million (ppm) range and calcium hardness above 200 ppm. Use a reliable test kit that measures all these ranges. Make necessary adjustments the appropriate pool care products. Follow label directions for these products.

Broad cast the product

**ROUTINE CARE :** Throughout the pool season adjust pH to 7.2 to 7.8 with appropriate product. Follow label directions. Broadcast 3 ounces of this product per 10,000 gallons pool water every other day or as often as needed to maintain chlorine residual at 1-3 ppm. This quantity may vary depending on bather load, temperature and other conditions.

(Alternate shock treatment directions

**SHOCK TREATMENT:** Adjust pH to 7.2 to 7.4 with appropriate product. Follow label directions. Shock treat weekly with Pace Superchlorinator and Shock treatment to kill bacteria, control algae and destroy organic contaminants.

**FOR SPA AND HOT TUB USE:**

Each half ounce of this product will provide approximately 4 ppm available chlorine in 500 gallons of water.

Use an appropriate testkit, test and adjust the water to the following values: pH 7.2 - 7.8, total alkalinity 60 - 100 ppm, calcium hardness 200 ppm minimum.

Maintain these conditions for proper spa and hot tub operation by frequent testing with a test kit.

Do not allow cyanuric acid level to exceed 150 ppm.

It is recommended that spas and hot tubs be drained every 30-90 days, more often under heavy use.

Consult manufacturer's recommendations concerning the compatibility of chlorine sanitizers with their equipment. Some oils, lotions, fragrances, cleansers, etc. may cause foaming or cloudy water and may react with chlorine sanitizers to reduce their efficacy.

**IN CASE OF EMERGENCY CALL 1-800-6546-911**

**⇒ STORAGE & DISPOSAL**

- Keep product dry in a tightly closed container when not in use.
- Store in cool, dry, well-ventilated area.
- Keep away from heat or open flame.
- DO NOT reuse empty container.
- Rinse empty container thoroughly with water to dissolve all material before discarding.
- Securely wrap the container in several layers of newspaper.
- Discard in trash.

**EMERGENCY HANDLING:**

In case of contamination or decomposition:

1. DO NOT reseal container.
2. If possible, isolate container in open and well-ventilated area.
3. Flood with large amounts of water.
4. Dispose of contaminated material in an approved landfill area.

**PRECAUTIONARY STATEMENTS**

⇒ **HAZARDS TO HUMANS AND DOMESTIC ANIMALS**

**DANGER! CORROSIVE!**

- Causes irreversible eye damage.
- May be fatal if inhaled.
- Harmful if swallowed or absorbed through skin.
- Do not get in eyes, on skin or on clothing.
- Do not breath dust, vapor or spray mist.
- Wear goggles, face shield or safety glasses.
- Wash thoroughly with soap and water after handling.
- Remove contaminated clothing and wash before reuse.

**FIRST AID (PRACTICAL TREATMENT):**

**If Swallowed:** Drink promptly large quantities of water. Avoid alcohol.

Note to physician: Probable mucosal damage may contraindicate the use of gastric lavage. Get medical attention

**If on Skin:** Wash with plenty of soap and water. Get medical attention if irritation persists.

**If in Eyes:** Hold eyelids open and flush with a steady, gentle stream of water for 15 minutes. Get medical attention.

**If Inhaled:** Remove person to fresh air. If not breathing, give artificial respiration preferably mouth-to-mouth. Get medical attention.

**CHEMICAL HAZARDS:**

**DANGER! Strong oxidizing agent**

Use only clean, dry utensils. Mix only into water. DO NOT use this product in any chlorinating device which has been used with any inorganic or unstabilized chlorinating compounds (like calcium hypochlorite). Such use may cause fire or explosion. Contamination with moisture dirt, organic matter, or other chemicals (including other pool chemicals) or any other foreign matter may start a chemical reaction. This reaction will generate heat, liberate hazardous gases and possible generation of fire or explosion. Avoid any contact with a flaming or burning material, such as a lighted cigarette).

**ENVIRONMENTAL HAZARD**

This pesticide is toxic to fish and aquatic organisms. Do not discharge effluent containing this product into lakes, ponds, streams, estuaries, oceans or public water unless in accordance with the requirements of a National Pollutant Discharge Elimination System (NPDES) permit and the permitting authority has been notified in writing prior to discharge. Do not discharge effluent containing this product to sewer systems without previously notifying the local sewage treatment plant authority. For guidance contact your State Water Board or Regional Office of the EPA.
