U.S. ENVIRONMENTAL PROTECTION AGENCY OFFICE OF PESTICIDES PROGRAMS REGISTRATION DIVISION (RS 267) WASHINGTON, DC 20460	EPA REGISTRATION NO. 1258-995 TERM OF GUARANTEE	STATE OF LABEL 01110
NOTICE OF PESTICIDE: <input type="checkbox"/> REGISTRATION <input checked="" type="checkbox"/> REREГИSTRATION <i>(Under the Federal Insecticide, Fungicide, and Rodenticide Act, as amended)</i>	NAME OF PESTICIDE PRODUCT Pace 14 Day Super Tab Concentrated Pool Chlorinator	
NAME AND ADDRESS OF REGISTRANT (Include ZIP code) <div style="text-align: center;"> <input type="checkbox"/> </div> Olin Corporation 350 Knotter Drive P.O. Box 586 <input type="checkbox"/> Cheshire, CT 06410		
NOTE: Changes in labeling formula differing in substance from that accepted in connection with this registration must be submitted to and accepted by the Registration Division prior to use of the label in commerce. In any correspondence on this product always refer to the above U.S. EPA registration number.		
<p>On the basis of information furnished by the registrant, the above named pesticide is hereby Registered/Reregistered under the Federal Insecticide, Fungicide, and Rodenticide Act.</p> <p>A copy of the labeling accepted in connection with this Registration/Reregistration is returned herewith.</p> <p>Registration is in no way to be construed as an endorsement or approval of this product by this Agency. In order to protect health and the environment, the Administrator, on his motion, may at any time suspend or cancel the registration of a pesticide in accordance with the Act. The acceptance of any name in connection with the registration of a product under this Act is not to be construed as giving the registrant a right to exclusive use of the name or to its use if it has been covered by others.</p> <p>Based on your response to the Reregistration Eligibility Document, EPA has reregistered the above named product subject to the comments recorded in the succeeding paragraph. This action is taken under the authority of section 4(g)(2)(C) of the Federal Insecticide, Fungicide, and Rodenticide Act, as amended. Reregistration under this section does not eliminate the need for continual reassessment of pesticides. EPA may require submission of data at any time to maintain the registration of your product.</p> <p>Make the following labeling changes before you release the product for shipment:</p> <ol style="list-style-type: none"> 1. On the center panel, the wordings "... & related compounds..." are considered to broad and are considered unwarranted. Delete the indicated wordings. 2. On the left page of panel #1, under the statement of Practical Treatment, after Do not induce vomiting, add "... Avoid alcohol...". 3. On the right panel, the listed reentry statement must be added: "...Reentry into treated swimming pool is prohibited above levels of 3 ppm of chlorine...". <input type="checkbox"/> ATTACHMENT IS APPLICABLE		
SIGNATURE OF APPROVING OFFICIAL		

4. Under the directions for use, the label needs to be expanded to reflect the attached enclosure for treatment of swimming pools with chlorinated products.

5. Refer to the enclosed copy of Isocyanurate RED Attachment A for the necessary revisions to the Precautionary Statements for the subject product label.

A stamped copy of the product label is enclosed for your records.

Submit one copy of the final printed labeling before releasing the product in channels of trade with the revised labeling.

If these conditions are not complied with, the registration will be subject to cancellation in accordance with FIFRA sec. 6(e). Your release for shipment of the product constitutes acceptance of these conditions.

Ruth G. Douglas
Product Manager 32
Antimicrobial Program Branch
Registration Division (7505C)

ISOCYANURATE RED ATTACHEMENT A

LABELING: (Statements are based on review of referenced acute toxicity data)

- 1. The signal word is "DANGER"
- 2. Revise the Precautionary Statements to read:

CORROSIVE: Causes irreversible eye damage and skin burns. May be fatal if absorbed through skin. May be fatal if inhaled. Do not breathe dust or spray mists. Irritating to nose and throat. Harmful if swallowed. Do not get in eyes, on skin, or on clothing. Wear goggles or face shield, protective clothing and rubber gloves when handling this product. Wash thoroughly with soap and water after handling and before eating, drinking or using tobacco. Remove contaminated clothing and wash before reuse.

- 3. Revise the Statement of Practical Treatment to read:

STATEMENT OF PRACTICAL TREATMENT.

IF SWALLOWED: Drink promptly large quantities of water. Do not induce vomiting. Avoid alcohol. Never give anything by mouth to an unconscious person. Call a physician or poison control center immediately.

IF IN EYES: Hold eyelids open and flush with a steady, gentle stream of water for 15 minutes. Get medical attention.

IF ON SKIN: Wash with plenty of soap and water. Get medical attention.

IF INHALED: Remove victim to fresh air. If not breathing, give artificial respiration, preferably, mouth-to-mouth. Get medical attention.

NOTE TO PHYSICIAN: Probable mucosal damage may contraindicate the use of gastric lavage.

DIRECTIONS FOR CHLORINATION OF SWIMMING POOLS

Adequate directions for treatment of swimming pools with chlorinated products must provide the following information.

- (i) Initial treatment for a freshly filled pool with no visible algal growth. This must give the amount of product required per 10,000 gallons of pool water (or some other convenient units such as 500 gal. for smaller pools), to yield a concentration of 0.6 to 1.0 ppm available chlorine as determined by a suitable chlorine test kit when no stabilizer is being recommended. If a stabilizer is recommended in conjunction with the product a concentration of available chlorine of 1.0 to 1.5 ppm must be specified. Dosages should be stated in terms of weight and equivalent useful household measurements. These directions must indicate a smaller convenient increment calculated to raise the concentration by 0.1 to 0.2 ppm if the initial dosage does not achieve the desired level. For example: If a product has 10% available chlorine, 10 oz. of product per 10,000 gallons of water would yield 0.8 ppm of available chlorine; 1 oz. of product would increase the concentration of available chlorine by approximately 0.1 ppm.
- (ii) Maintenance dosage: directions must state an adequate maintenance dosage, indicating the frequency of application, and conditions or factors which dictate the frequency of application. For example: There-after add X oz. per 10,000 gallons daily or as needed. High temperatures, the presence of organic debris, increased bather use and other factors may require more frequent treatments. Test pool water frequently with a suitable chlorine test kit to assure proper concentration of available chlorine.
- (iii) Directions must specify to maintain the pH of the water at all times between 7.2 and 7.6, as determined by frequent testing with a suitable test kit. If other products are mentioned on this label such references must be qualified by wording such as "follow directions on the label". A label for a particular product can not have directions or dosages for other products.

Shock Treatment, Superchlorination: Such terms are usually used to describe claims to kill or control visible algae growth. These claims must appear as a separate paragraph or section from other use directions and must include the following: (i) Amount of product per unit volume of water (enough to provide 5.0 to 10.0 ppm available chlorine); (ii) The time of day the treatment is recommended (example at night or when pool is not in use, with filter off); (iii) Duration of treatment (example 8 to 12 hours); (iv) Recommendations to test the water in the pool for all label claims; (v) Recommendations not to use the pool for swimming or other purposes, dropped to 3.0 ppm or less, as determined by available test kit; (vi) Recommended interval for treatment, such as once a week, or as visible growth occurs, or as determined by the manufacturer's directions.

PRECAUTIONARY STATEMENTS: HAZARDS TO HUMANS AND DOMESTIC ANIMALS

DANGER: Highly corrosive. Causes skin and eye damage. May be fatal if swallowed. Do not get in eyes, on skin, or on clothing. Do not handle with bare hands. Wear goggles or face shield and use rubber gloves when handling. Irritating to nose and throat. Avoid breathing dust and fumes. Remove and wash contaminated clothing before reuse.

FIRST AID (Practical Treatment): If Swallowed: Drink large quantities of water. Do not induce vomiting. Call a physician immediately. Probable mucosal damage may contraindicate the use of gastric lavage. If on Skin: Brush off excess chemical and flush skin with cold water for at least 15 minutes. If irritation persists, get medical attention. If in Eyes: Flush with cold water for at least 15 minutes. Get immediate medical attention. If Inhaled: Remove person to fresh air. Get immediate medical attention.

CHEMICAL HAZARDS: DANGER: Strong oxidizing agent. Use only clean, dry utensils. Add only into water. Contamination with moisture, dirt, organic matter or other chemicals may start a chemical reaction with generation of heat, liberation of hazardous gases and possible fire and / or explosion. Avoid any contact with flaming or burning material. Do not use this product in any chlorinating device which has been used with any product other than trichloro-s-triazinetriene tablets or sticks as the active ingredient. Such use may cause fire or explosion.

ENVIRONMENTAL HAZARD: This pesticide is toxic to fish and aquatic organisms. Do not discharge effluent containing this product into lakes, ponds, streams, estuaries, oceans or public waters unless this product is specifically identified and addressed in an NPDES permit. Do not discharge effluent containing this product to sewer systems without previously notifying the sewage treatment plant authority. For guidance, contact your State Water Board or Regional Office of the EPA.

STORAGE AND DISPOSAL: Keep product dry in tightly closed container when not in use. Store in a cool dry well-ventilated area away from heat or open flame. Do not reuse empty container. Rinse empty container thoroughly with water to dissolve all material before discarding. Securely wrap container in several layers of newspaper and discard in trash.

DIRECTIONS FOR USE:

It is a violation of federal law to use this product in a manner inconsistent with its label. This product is designed to dissolve slowly, providing a continuous level of available chlorine in swimming pools to prevent growth of algae, kill bacteria and other contaminants.

READ THE PRECAUTIONARY STATEMENTS BEFORE USE.

One tablet will provide an effective level of 3 parts per million (ppm) in 20,000 gallons of water up to 2 weeks under normal use conditions. One tablet means you never have to touch the chemical.

USE ONLY IN SKIMMERS

1. Adjust pH to the ideal range of 7.2-7.6.
2. Bring chlorine residual to 1-3 ppm. Add one Burn Superchlorinator & Shock Treatment tablet per 10,000 gallons of water. Follow instructions.
3. Stabilize the pool with cyanuric acid tablets. Follow instructions.
4. Ensure that the skimmer basket is clean. Remove chemicals, tablets or residue prior to adding product in the skimmer basket. This product is recommended for use in vinyl-lined pools. Do not use an automatic timer on the pool pump. A minimum of 8 hours per day, other than during winter damage may occur. If chlorine residual is below 1 ppm, reduce skimmer flow rate or pump run time. If chlorine residual goes below 1 ppm, reduce skimmer flow rate or daily pump run time. Treat weekly or every other week following label directions. Do not enter the pool until the free available chlorine (FAC) drops to 3 ppm or below. If the pool is empty remove it from the pool and replace with a new tablet.
5. Do not add other chemicals to the pool if this product is in the skimmer. Do not

TO DETERMINE YOUR POOL CAPACITY IN U.S. GALLONS, USE THE APPROPRIATE FORMULA BELOW. (Use measurements in feet only)

RECTANGULAR

LENGTH X WIDTH X AVERAGE DEPTH X 7.5
= TOTAL GALLONS

ROUND

DIAMETER X DIAMETER X AVERAGE DEPTH X
5.9 = TOTAL GALLONS

OVAL

MAXIMUM LENGTH X MAXIMUM WIDTH X
AVERAGE DEPTH X 5.9 = TOTAL GALLONS

FREEFORM SURFACE AREA (SQ. FEET) X
AVERAGE DEPTH X 7.5 = TOTAL GALLONS
