Under the Federal Insecticide, Fungicide, and Rodenticide Act, as amended, for the product registered under EPA Reg. No.

chlorinator for spas & hot tubs

pace

- Granulated for fast dissolving
- Protects against odor
- Controls growth of bacteria and algae
- Keeps water sparkling clear
- Totally soluble

Scatter directly over water surface.

Active Ingredient:

Sodium Dichloro-s-Triazinetrione dihydrate	99%
Inert Ingredients	1%
Available Chlorine	55%

DANGER! KEEP OUT OF REACH OF CHILDREN.
See first aid statement and additional precautions on back panel.

EPA REG. NO. 1258-1042

EPA EST. NO. 1258-LA-1

NET WT. 1 3/4 LBS. (.79 kg)

DIRECTIONS FOR USE: It is a violation of Federal Law to use this product in a manner inconsistent with its labeling.

PACE Chlorinator for Spas & Hot Tubs contains 55% available chlorine and is designed to dissolve quickly and completely, control the growth of algae and effectively kill many bacteria, thus helping to keep spas and hot tubs sanitary. Each half ounce of product (approx. 1/2 scoop) will provide approximately 4 ppm available chlorine in 500 gallons of water.

Using an appropriate test kit, test and adjust the water to the following values: pH 7.2-7.8, total alkalinity 60-100 ppm, calcium hardness 200 ppm minimum. Maintain these conditions for proper spa and hot tub operation by frequent testing with a test kit. Do not allow cyanuric acid level to exceed 150 ppm. It is recommended that spas and hot tubs be drained every 30-90 days, more often under heavy use. Consult manufacturer's recommendations concerning the compatibility of chlorine sanitizers with their equipment. Some oils, lotions, fragrances, cleansers, etc. may cause foaming or cloudy water and may react with chlorine sanitizers to reduce their efficacy.

START-UP (FRESHLY FILLED): 1. Turn on the circulation system and ensure that it is operating properly. 2. Add one ounce (approximately one scoop) PACE Chlorinator for Spas & Hot Tubs, using enclosed measuring scoop, for each 500 gallons of water. Always use a clean dry scoop. Check the free available chlorine (FAC) and, if below 4-5 ppm, repeat as needed.

REGULAR USE: 1. Turn on the circulation system and ensure that it is operating properly. 2. Scatter a half ounce (approximately 1/2 scoop) of PACE Chlorinator for Spas & Hot Tubs (per 500 gallons) over the surface of the water. Test for FAC and add additional product, if necessary, to attain 4-5 ppm FAC. 3. Maintain 1-3 ppm FAC while the spa or hot tub is in use. 4. After each use, shock treat with 1.5 ounces (approximately 1 1/2 scoop) per 500 gallons of PACE Chlorinator for Spas & Hot Tubs to control odors and algae. Repeat as needed. Spa or hot tub should not be entered until FAC reaches 4-5 ppm.

EXTENDED NON-USE PERIOD: During extended period when the spa or hot tub is not being used, add 15 ounces of PACE Chlorinator for Spas & Hot Tubs per 500 gallons twice a week with the circulation system running, or as needed to maintain 1-3 ppm free available chlorine.

STORAGE AND DISPOSAL: Keep product dry in tightly closed container when not in use. Store in a cool, dry, well-ventilated area away from heat or open flame. Do not reuse empty container. Rinse empty container thoroughly with water to dissolve all material before discarding. Place in trash collection or dispose in approved landfill area or bury in a safe place. **EMERGENCY HANDLING:** In case of contamination or decomposition, do not reseal container. If possible, isolate container in open and well-ventilated area. Flood with large volumes of water. Dispose of contaminated material in an approved landfill area or bury in a safe place.

Precautionary Statements

HAZARDS TO HUMANS AND DOMESTIC ANIMALS

DANGER: Highly corrosive. Causes skin and eye damage. May be fatal if swallowed. Do not get in eyes, on skin, or on clothing. Do not handle with bare hands. Wear goggles or face shield and use rubber gloves or only thoroughly clean, dry utensils when handling. Irritating to nose and throat. Avoid breathing dust and fumes. Remove and wash contaminated clothing before reuse.

FIRST AID (Practical Treatment):

- If swallowed: Feed large amounts of milk and/or water and induce vomiting. Call a physician immediately.
- If on skin: Brush off excess chemical and flush skin with cold water for at least 15 minutes. If irritation persists, get medical attention.
- If in eyes: Flush with cold water for at least 15 minutes. Get immediate medical attention.
- If inhaled: Remove person to fresh air. Get immediate medical attention.

CHEMICAL HAZARDS:

DANGER: Strong oxidizing agent. Use only clean dry utensils. Mix only into water. Contamination with moisture, dirt, organic matter or other chemicals (including other pool chemicals) or any other foreign matter may start a chemical reaction with generation of heat, liberation of hazardous gases, and possible generation of fire and explosion. Avoid any contact with flaming or burning material, such as a lighted cigarette. Do not use PACE granules in any chlorinating device which has been used with any inorganic or unstabilized chlorinating compounds (e.g., calcium hypochlorite). Such use may cause fire or explosion.

ENVIRONMENTAL HAZARD: This product is toxic to fish. Keep out of lakes, ponds or streams. Do not contaminate water by cleaning of equipment or disposal of wastes.
