<p>U.S. ENVIRONMENTAL PROTECTION AGENCY OFFICE OF PESTICIDES PROGRAMS REGISTRATION DIVISION (PS 262) WASHINGTON, DC 20460</p> <p>NOTICE OF PESTICIDE: <input type="checkbox"/> REGISTRATION <input checked="" type="checkbox"/> REREГИSTRATION (Under the Federal Insecticide, Fungicide, and Rodenticide Act, as amended)</p>	<p>1258-1075 TERM OF PRODUCT</p> <p>NAME OF PESTICIDE PRODUCT FACE CONCENTRATED ALGAECIDE</p>	<p>JUN 30 1984</p>
<p>NAME AND ADDRESS OF REGISTRANT (Include ZIP code)</p> <p>Olin Corporation PO Box 586 Cheshire, CT 06410</p>		
<p>NOTE: Changes in labeling formula differing in substance from that accepted in connection with this registration must be submitted to and accepted by the Registration Division prior to use of the label in commerce. In any correspondence on this product always refer to the above U.S. EPA registration number.</p>		
<p>On the basis of information furnished by the registrant, the above named pesticide is hereby Registered/Reregistered under the Federal Insecticide, Fungicide, and Rodenticide Act.</p> <p>A copy of the labeling accepted in connection with this Registration/Reregistration is returned herewith.</p> <p>Registration is in no way to be construed as an indorsement or approval of this product by this Agency. In order to protect health and the environment, the Administrator, on his motion, may at any time suspend or cancel the registration of a pesticide in accordance with the Act. The acceptance of any name in connection with the registration of a product under this Act is not to be construed as giving the registrant a right to exclusive use of the name or to its use if it has been covered by others.</p> <p>Based on your response to the Reregistration Eligibility Document, EPA has reregistered the above named product subject to the comments recorded in the succeeding paragraph. This action is taken under the authority of section 4(g)(2)(C) of the Federal Insecticide, Fungicide, and Rodenticide Act, as amended. Reregistration under this section does not eliminate the need for continual reassessment of pesticides. EPA may require submission of data at any time to maintain the registration of your product.</p> <p>Make the following labeling changes before you release the product for shipment:</p> <ol style="list-style-type: none"> 1. Revise the precautionary and practical treatment statements in your labeling in accordance with the enclosed Attachment A. 2. On the right panel, after do not induce vomiting, add "...Avoid alcohol..." 3. On the center panel, delete the wordings "...& related compounds..." <p><input type="checkbox"/> ATTACHMENT A IS AVAILABLE</p> <p>SIGNATURE OF REGISTRANT</p>		

4. On the right panel, the use directions for swimming pools needs to be expanded to reflect the attached enclosure for swimming pools.

5. On the right panel, under the directions for use add the statement "...Reentry into treated pools is prohibited above levels of 3ppm chlorine...".

A stamped copy of the product label is enclosed for your records.

Submit one copy of the final printed labeling before releasing the product in channels of trade with the revised labeling.

If these conditions are not complied with, the registration will be subject to cancellation in accordance with FIFRA sec. 6(e). Your release for shipment of the product constitutes acceptance of these conditions.

ISOCYANURATE RED ATTACHEMENT A

LABELING: (Statements are based on review of referenced acute toxicity data)

1. The signal word is "DANGER"
2. Revise the Precautionary Statements to read:

CORROSIVE: Causes irreversible eye damage and skin burns. May be fatal if absorbed through skin. May be fatal if inhaled. Do not breathe dust or spray mists. Irritating to nose and throat. Harmful if swallowed. Do not get in eyes, on skin, or on clothing. Wear goggles or face shield, protective clothing and rubber gloves when handling this product. Wash thoroughly with soap and water after handling and before eating, drinking or using tobacco. Remove contaminated clothing and wash before reuse.

3. Revise the Statement of Practical Treatment to read:

STATEMENT OF PRACTICAL TREATMENT.

IF SWALLOWED: Drink promptly large quantities of water. Do not induce vomiting. Avoid alcohol. Never give anything by mouth to an unconscious person. Call a physician or poison control center immediately.

IF IN EYES: Hold eyelids open and flush with a steady, gentle stream of water for 15 minutes. Get medical attention.

IF ON SKIN: Wash with plenty of soap and water. Get medical attention.

IF INHALED: Remove victim to fresh air. If not breathing, give artificial respiration, preferably, mouth-to-mouth. Get medical attention.

NOTE TO PHYSICIAN: Probable mucosal damage may contraindicate the use of gastric lavage.

DIRECTIONS FOR CHLORINATION OF SWIMMING POOLS

Adequate directions for treatment of swimming pools with chlorinated products must provide the following information.

- (i) Initial treatment for a freshly filled pool with no visible algal growth. This must give the amount of product required per 10,000 gallons of pool water (or some other convenient units such as 500 gal. for smaller pools), to yield a concentration of 0.6 to 1.0 ppm available chlorine as determined by a suitable chlorine test kit when no stabilizer is being recommended. If a stabilizer is recommended in conjunction with the product a concentration of available chlorine of 1.0 to 1.5 ppm must be specified. Dosages should be stated in terms of weight and equivalent useful household measurements. These directions must indicate a smaller convenient increment calculated to raise the concentration by 0.1 to 0.2 ppm if the initial dosage does not achieve the desired level. For example: If a product has 10% available chlorine, 10 oz. of product per 10,000 gallons of water would yield 0.8 ppm of available chlorine; 1 oz. of product would increase the concentration of available chlorine by approximately 0.1 ppm.
- (ii) Maintenance dosage: directions must state an adequate maintenance dosage, indicating the frequency of application, and conditions or factors which dictate the frequency of application. For example: There-after add X oz. per 10,000 gallons daily or as needed. High temperatures, the presence of organic debris, increased bather use and other factors may require more frequent treatments. Test pool water frequently with a suitable chlorine test kit to assure proper concentration of available chlorine.
- (iii) Directions must specify to maintain the pH of the water at all times between 7.2 and 7.6, as determined by frequent testing with a suitable test kit. If other products are mentioned on this label such references must be qualified by wording such as "follow directions on the label". A label for a particular product can not have directions or dosages for other products.

Shock Treatment, Superchlorination: Such terms are usually used to describe claims to kill or control visible algae growth. These claims must appear as a separate paragraph or section from other use directions and must include the following: (i) Amount of product per unit volume of water (enough to provide 5.0 to 10.0 ppm available chlorine); (ii) The time of day the treatment is recommended (example at night or when pool is not in use, with filter off); (iii) Duration of treatment (example 8 to 18 hours); (iv) Recommendations to clean or vacuum the pool of all dead algae; (v) Recommendations not to use the pool until chlorine residual has dropped to 3.0 ppm or less, as determined by a suitable test kit; (vi) The recommended interval for treatment such as once a week, or when visible growth occurs, or whatever other interval is appropriate for the product.

PRECAUTIONARY STATEMENTS: HAZARDS TO HUMANS AND DOMESTIC ANIMALS

DANGER: Highly corrosive. Causes skin and eye damage. May be fatal if swallowed. Do not get in eyes, on skin, or on clothing. Do not handle with bare hands. Wear goggles or face shield and use rubber gloves when handling. Irritating to nose and throat. Avoid breathing dust and fumes. Remove and wash contaminated clothing before reuse.

FIRST AID (Practical Treatment): If Swallowed: Drink large quantities of water. Do not induce vomiting. Call a physician immediately. Probable mucosal damage may contraindicate the use of gastric lavage. If on Skin: Brush off excess chemical and flush skin with cold water for at least 15 minutes. If irritation persists, get medical attention. If in Eyes: Flush with cold water for at least 15 minutes. Get immediate medical attention. If Inhaled: Remove person to fresh air. Get immediate medical attention.

CHEMICAL HAZARDS: DANGER: Strong oxidizing agent. Use only clean, dry utensils. Add only into water. Contamination with moisture, dirt, organic matter or other chemicals may start a chemical reaction with generation of heat, liberation of hazardous gases and possible fire and / or explosion. Avoid any contact with flaming or burning material. Do not use this product in any chlorinating device which has been used with any product other than trichloro-s-triazinetriene tablets or sticks as the active ingredient. Such use may cause fire or explosion.

ENVIRONMENTAL HAZARD: This pesticide is toxic to fish and aquatic organisms. Do not discharge effluent containing this product into lakes, ponds, streams, estuaries, oceans or public waters unless this product is specifically identified and addressed in an NPDES permit. Do not discharge effluent containing this product to sewer systems without previously notifying the sewage treatment plant authority. For guidance, contact your State Water Board or Regional Office of the EPA

STORAGE AND DISPOSAL

in tightly closed container when not in use. Store in cool dry well-ventilated area away from open flame. Do not reuse empty container thoroughly with water before discarding. Securely wrap container in several layers of newspaper and discard.

DIRECTIONS FOR POOL USE

It is a violation of Federal law to use this product in a manner inconsistent with its label.

1. Using suitable test kit, adjust the pH of the pool water to 7.2-7.6.
 2. Do not use pool while it is being treated.
 3. Turn off the filter pump before adding this product.
 4. Sprinkle this product directly into the pool water when algae appears. Use up to 1 lb. per 10,000 gal. (ppm) of pool water. For severe algae, use up to 2 lb. per 10,000 gal. doubled.
 5. The filter pump can be turned on after treatment has been in the pool for at least 1 hour.
 6. Brush pool and vacuum.
 7. Repeat the above treatment if necessary.
 8. Do not use the pool until the chlorine residual has dropped to 3 ppm or less as determined by a test kit.
 9. Adjust the pH to 7.2-7.6.
 10. Maintain the chlorine residual at 3 ppm.
- Note:** Use only on white plastic. Do not use on any other color or surface, because the pool may occur.
