DIRECTIONS FOR USE: It is a violation of Federal law to use this product in a manner inconsistent with its labeling.

OLIN APH ALL PURPOSE ALGICIDE - 30 EXTRA STRENGTH is used to control the growth of algae in swimming pools, exterior spas, whirlpools, hot tubs, decorative fountains and ponds that do not contain fish. For maximum effectiveness, pools, spas, whirlpools and hot tubs containing heavy growth of algae should be cleaned prior to using this product.

For pools having just visible algae growth add an initial dose of 24 to 36 ounces of this product per 10,000 gallons of water and remove settled algae debris by cleaning. Subsequent additions of 4 to 9 ounces of this product per 10,000 gallons of water should be made every 5 to 7 days after initial treatment for maintenance.

Spas, whirlpools, hot tubs, decorative fountains and ponds having just visible algae growth require an initial dose 1 to 2 ounces of this product per 500 gallons of water. For treatment of a freshly cleaned and filled spa, whirlpool, hot tub, decorative fountain, or pond, add initially 0.5 to 1 ounce of this product per 500 gallons of water. Subsequent additions of 0.3 to 0.4 ounces of this product per 500 gallons of water should be made every 5 to 7 days after initial treatment for maintenance.

This product will prevent the growth of most algae during the off-season winter months when pools are not in use. For pools which have been properly treated during the swimming season and are free of visible algae, add 13 to 21 ounces of this product per 10,000 gallons of water. If at the end of the swimming season pools have some visible algae growth, add 25 to 37 ounces of this product per 10,000 gallons of water. It is necessary that a uniform distribution of this product be made throughout the water for maximum effectiveness. If pool is not covered, it may be necessary to repeat the treatment one or more times during the season.

This product is compatible with those chemicals normally used to treat pools and spas and is effective at both acid and alkaline pH. This product can be used in pools and spas treated with chlorine chemicals and may reduce the amount of those chemicals normally required. However, do not mix this product with concentrated dry or liquid chlorine products.

PRECAUTIONARY STATEMENTS

HAZARDS TO HUMANS AND DOMESTIC ANIMALS: CAUTION: Harmful if swallowed. Avoid breathing vapors. Avoid contact with skin, eyes, or clothing.

PRACTICAL TREATMENT: FIRST AID: For eyes and skin - flush with plenty of water for 15 minutes. Call a physician. If swallowed - drink plenty of water. Induce vomiting by sticking finger down throat. Call a physician. If inhaled - remove to fresh air. Call a physician.

ENVIRONMENTAL HAZARDS: This pesticide is toxic to fish. Keep out of lakes, streams, or ponds. For guidance, contact the regional office of the Environmental Protection Agency.

STORAGE AND DISPOSAL: Keep container closed when not in use. Do not contaminate water, food or feed by storage, disposal or cleaning of equipment. Do not reuse empty container. Wrap container in newspaper and put in trash.
