Attachment A - Batch 26 Products

Labeling:

- 1. The signal word is "Danger".
- 2. The Precautionary Statements should read:

"Corrosive: Cause irreversible eye damage. May be fatal if inhaled. Harmful if swallowed or absorbed through skin. Do not get in eyes, on skin or on clothing. Do not breathe dust, vapor or spray mist. Wear goggles, face shield or safety glasses. Wash thoroughly with soap and water after handling. Remove contaminated clothing and wash before reuse".

3. The Statements of Practical Treatment should read:

"If in eyes: Hold eyelids open and flush with a steady, gentle stream of water for 15 minutes. Get medical attention".

"If inhaled: Remove victim to fresh air. If not breathing, give artificial respiration preferably mouth-to-mouth. Garanteen medical attention".

"If on Skin: Wash with plenty of soap and water. Get medical attention if irritation persists".

"If swallowed: Drink promptly large quantities of water. Avoid alcohol. Note to physician: Probable mucosal damage may contraindicate the use of gastric lavage. Get medical attention".

DIRECTIONS FOR USE: It is a violation of federal law to use this product in a manner inconsistent with its labeling. Six tablets will provide approximately 3 parts per million (ppm) available chlorine in 500 gallons of water. Using an appropriate test kit, test and adjust the water to the following values: pH 7.2-7.8, total alkalinity 60-100 ppm, calcium hardness 150 ppm minimum. Maintain these conditions for proper spa and hot tub operation by frequent testing with a test kit. Do not allow cyanuric acid level to exceed 150 ppm. It is recommended that spas and hot tubs be drained every 30-90 days, more often under heavy use. Consult manufacturer's recommendations concerning the compatibility of chlorine sanitizers with their equipment. Some oils, lotions, fragrances, cleansers, etc., may cause foaming or cloudy water and may react with chlorine sanitizers to reduce their efficacy.

REGULAR USE: (1). Turn on the circulation system and ensure that it is operating properly. (2) Add 6 tablets per 500 gallons over the surface of the water. Test for free available chlorine (FAC) and add additional product, if necessary, to attain 1-3 ppm FAC. (3) Maintain 1-3 ppm FAC while the spa or hot tub is in use. (4) After each use, shock treat with 18 tablets per 500 gallons to control odors and algae. Repeat as needed. Spa or hot tub should not be entered until FAC reaches 1-3 ppm.

START UP (FRESHLY FILLED): 1. Turn on the circulation system and ensure that it is operating properly. 2. Add 6 tablets for each 500 gallons of water. Check the (FAC) and, if below 3 ppm, repeat as needed. EXTENDED NON-USE PERIOD: During extended periods when the spa or hot tub is not being used, add 18 tablets per 500 gallons twice a week with the circulation system running or as needed to maintain

the circulation system running or as needed to maintain 1-3 ppm free available chlorine.

STORAGE AND DISPOSAL: Keep product dry in tightly closed container when not in use Store in a cool dry well-ventilated area away from heat or open flame. Do not reuse empty container. Rinse empty

container thoroughly with water to dissolve all material before discarding. Securely wrap container in several

layers of newspaper and discard in trash.
