DIRECTIONS FOR USE: It is a violation of federal law to use this product in a manner inconsistent with its labeling. One tablet will provide approximately 3 parts per million (ppm) available chlorine in 500 gallons of water. Using an appropriate test kit, test and adjust the water to the following values: pH 7.2-7.8, total alkalinity 60-100 ppm, calcium hardness 150 ppm minimum. Maintain these conditions for proper spa and hot tub operation by frequent testing with a test kit. Do not allow cyanuric acid level to exceed 150 ppm. It is recommended that spas and hot tubs be drained every 30-90 days, more often under heavy use. Consult manufacture.'s recommendations concerning the compatibility of chlorine sanitizers with their equipment. Some oils, lotions, fragrances, cleansers, etc., may cause foaming or cloudy water and may react with chlorine sanitizers to reduce their efficacy.

REGULAR USE: (1). Turn on the circulation system and ensure that it is operating properly. (2) Add 1 tablet per 500 gallons over the surface of the water. Test for free available chlorine (FAC) and add additional product, if necessary, to attain 1-3 ppm FAC. (3) Maintain 1-3 ppm FAC while the spa or hot tub is in use. (4) After each use, shock treat with 3 tablets per 500 gallons to control odors and algae. Repeat as needed. Spa or hot tub should not be entered until FAC reaches 1-3 ppm.

START UP (FRESHLY FILLED): 1. Turn on the circulation system and ensure that it is operating properly. 2. Add 1 tablets for each 500 gallons of water. Check the (FAC) and, if below 3 ppm, repeat as needed.

EXTENDED NON-USE PERIOD: During extended periods when the spa or hot tub is not being used, add 3 tablets per 500 gallons twice a week with the circulation system running or as needed to maintain 1-3 ppm free available chlorine.

STORAGE AND DISPOSAL: Keep product dry in tightly closed container when not in use. Store in a cool dry well-ventilated area away from heat or open flame. Do not reuse empty container. Rinse empty container thoroughly with water to dissolve all material before discarding. Securely wrap container in several layers of newspaper and discard in trash.
