ACCEPTED with COMMENTS in EPA Letter Dated:

OCT 31 1988

Under the Federal Insecticide, Fungicide, and Rodenticide Act as amended, for the pesticide registered under EPA Reg. No. 1258-1145

PRECAUTIONARY STATEMENTS

HAZARDS TO HUMANS AND DOMESTIC ANIMALS

DANGER: Highly corrosive. Causes skin and eye damage. May be fatal if swallowed. Do not get in eyes, on skin, or on clothing. Do not handle with bare hands. Wear goggles or face shield and use rubber gloves and only thoroughly clean, dry utensils when handling. Irritating to nose and throat. Avoid breathing dust and fumes. Remove and wash contaminated clothing before reuse.

FIRST AID: (PRACTICAL TREATMENT) If Swallowed: Drink large quantities of water. Do not induce vomiting. Call a physician immediately. **If on Skin:** Brush off excess chemical and flush skin with cold water for at least 15 minutes. If irritation persists, get medical attention. **If in Eyes:** Flush with cold water for at least 15 minutes. Get immediate medical attention. **If Inhaled:** Remove person to fresh air. Get immediate medical attention.

CHEMICAL HAZARDS: DANGER: Strong oxidizing agent. Use only clean, dry utensils. Mix only into water. Contamination with moisture, dirt, organic matter or other chemicals (including other pool chemicals) or any other foreign matter may start a chemical reaction with generation of heat, liberation of hazardous gases, and possible generation of fire and explosion. Avoid any contact with flammable or burning material, such as a lighted cigarette. Do not use HTH Granules in any chlorinating device which has been used with any inorganic or unstabilized chlorinating compounds (e.g. calcium hypochlorite). Such use may cause fire or explosion.

ENVIRONMENTAL HAZARD: This product is toxic to fish. Do not contaminate lakes, ponds or streams by cleaning of equipment or disposal of wastes.

STORAGE AND DISPOSAL: Keep product dry in tightly closed container when not in use. Store in a cool, dry, well-ventilated area away from heat or open flame. Do not reuse empty container. Rinse empty container thoroughly with water to dissolve all material before discarding. Securely wrap container in several layers of newspaper and discard in trash.
EMERGENCY HANDLING: In case of contamination or decomposition, do not reuse container. If possible, isolate container in open and well-ventilated area. Flood with large volumes of water. Dispose of contaminated material in an approved landfill area or bury in a safe place.

DIRECTIONS FOR SPA AND HOT TUB USE: It is a violation of federal law to use the product in a manner inconsistent with its labeling. ~~Each 1000 gallon container~~ ^{3 tablets} will provide approximately 4 ppm available chlorine in 1000 gallons of water.

Using an appropriate test kit, test and adjust the water to the following values: pH 7.2 - 7.8, total alkalinity 60 - 100 ppm, calcium hardness 100 ppm minimum. Maintain these conditions for proper spa and hot tub operation by frequent testing with a test kit. Do not allow cyanuric acid level to exceed 150 ppm. It is recommended that spas and hot tubs be drained every 30 - 90 days, more often under heavy use. Consult manufacturer's recommendations concerning the compatibility of chlorine sanitizers with their equipment. Some oils, lotions, fragrances, cleansers, etc., may cause foaming or cloudy water and may react with chlorine sanitizers to reduce their efficacy.

START-UP (FRESHLY FILLED): 1. Turn on the circulation system and ensure that it is operating properly. 2. Add ~~one ounce of PACL (R)~~ ^{3 tablets} for each ~~1000~~ ¹⁰⁰⁰ gallons of water. Check the free available chlorine (FAC) and, if below 4 - 5 ppm, repeat as needed.

REGULAR USE: (1) Turn on the circulation system and ensure that it is operating properly. (2) Scatter a ~~half ounce of PACL (R)~~ ^{3 tablets} (per 500 gallons) over the surface of the water. Test for FAC and add additional product, if necessary, to attain 4 - 5 ppm FAC. (3) Maintain 1 - 3 ppm FAC while the spa or hot tub is in use. (4) After each use, shock treat with ~~1.5 ounces~~ ^{6 tablets} per ~~500~~ ¹⁰⁰⁰ gallons of ~~PACL (R)~~ to control odors and algae. Repeat as needed. Spa or hot tub should not be entered until FAC reaches 4 - 5 ppm.

~~An alternate method is to use PACL (R) Tablets or PACL (R) Sticks for continuous feeding. Follow the following instructions.~~

EXTENDED NON-USE PERIOD: During extended periods when the spa or hot tub is not being used, add ~~1/2 ounce of PACL (R)~~ ^{6 tablets} per ~~500~~ ¹⁰⁰⁰ gallons twice a week with the circulation system running or as needed to maintain 1 - 3 ppm free available chlorine.
