US ENVIRONMENTAL PROTECTION AGENCY  
OFFICE OF PESTICIDES PROGRAMS  
REGISTRATION DIVISION (75-767)  
WASHINGTON, DC 20460

EPA REGISTRATION NO.

1258-1162

DATE OF ISSUANCE

17 AUG 1988

TERM OF ISSUANCE

NOTICE OF PESTICIDE:  REGISTRATION  
 REREГИSTRATION

(Under the Federal Insecticide, Fungicide,  
and Rodenticide Act, as amended)

NAME OF PESTICIDE PRODUCT

CDB Effervescent 25 ST

NAME AND ADDRESS OF REGISTRANT (Include ZIP code)

Glin Corporation  
350 Knotter Drive  
P.O. Box 586  
Cheshire, CT 06410

NOTE: Changes in labeling formula differing in substance from that accepted in connection with this registration must be submitted to and accepted by the Registration Division prior to use of the label in commerce. In any correspondence on this product always refer to the above U.S. EPA registration number.

On the basis of information furnished by the registrant, the above named pesticide is hereby Registered/Reregistered under the Federal Insecticide, Fungicide, and Rodenticide Act.

A copy of the labeling accepted in connection with this Registration/Reregistration is returned herewith.

Registration is in no way to be construed as an indorsement or approval of this product by this Agency. In order to protect health and the environment, the Administrator, on his motion, may at any time suspend or cancel the registration of a pesticide in accordance with the Act. The acceptance of any name in connection with the registration of a product under this Act is not to be construed as giving the registrant a right to exclusive use of the name or to its use if it has been covered by others.

This product is conditionally registered in accordance with FIFRA section 3(c)(7)(A) provided that you:

1. Submit/cite all data required for registration/reregistration of your product under FIFRA section 3(c)(5) when the Agency requires all registrants of similar products to submit such data.
2. Add the phrase "EPA registration No. 1258-1162" to your label before you release the product for shipment.
3. Submit five (5) copies of your final printed labeling before you release the product for shipment. Refer to the A-79 enclosure for a further description of final printed labeling.

If these conditions are not complied with, the registration will be subject to cancellation in accordance with FIFRA section 6(e). Your release for shipment of the product constitutes acceptance of these conditions.

A stamped copy of the label is enclosed for your records.

**PRECAUTIONARY STATEMENTS**  
**HAZARDS TO HUMANS AND DOMESTIC ANIMALS**  
**DANGER** - highly corrosive. Causes skin irritation. Do not get in eyes, on skin or on clothes. Do not get on face and use rubber gloves. Do not get on face and use rubber gloves. Do not get on face and use rubber gloves. Do not get on face and use rubber gloves.

**HAZARDS TO AQUATIC LIFE**  
**Very Toxic** - Harmful to fish and other aquatic life. Do not discharge into streams or rivers.

**HAZARDS TO THE ENVIRONMENT**  
 Harmful to birds and other wildlife. Do not discharge into streams or rivers.

**HAZARDS TO HUMANS AND DOMESTIC ANIMALS**  
**DANGER** - highly corrosive. Causes skin irritation. Do not get in eyes, on skin or on clothes. Do not get on face and use rubber gloves. Do not get on face and use rubber gloves. Do not get on face and use rubber gloves.

**STORAGE AND DISPOSAL**  
 Store in original container. Do not use if container is damaged or leaking. Do not use if container is damaged or leaking. Do not use if container is damaged or leaking.

**EMERGENCY HANDLING**  
 In case of fire, use dry chemical or carbon dioxide extinguisher. Do not use water. Do not use water.

**Directions for Pool Use:** It is a violation of Federal law to use this product in a manner inconsistent with its labeling. Pace concentrated pool chlorinating granules are designed to dissolve quickly and completely providing a steady source of available chlorine to control growth of algae and kill many harmful bacteria.

**Startup:**

1. Add Pace Superchlorinate with Pace Superchlorinate & Shock Treatment to your pool.
2. If pool water is clear, adjust pH to 7.2-7.6.
3. Bring chlorine residual to 1.3 ppm by broadcasting Pace Superchlorinate for each 5,000 gallons of water.
4. Test chlorine residual with a pool test kit. If needed, repeat dosage until chlorine residual is 1.3 ppm.
5. The next day stabilize your pool using Pace Shock-Away & Conditioner. Follow label directions.

**Regular Care:** Use 1/2 ounce of Pace Superchlorinate for each 10,000 gallons of water every other day or as needed to maintain chlorine residual at 1.3 ppm. Monitor pH between 7.2-7.6 and calcium hardness 60-100 ppm and calcium hardness above 200 ppm. Test with a reliable test kit. Make necessary adjustments with the appropriate pool care product. Superchlorinate every 10,000 gallons to burn out organic matter and to keep water sparkling clear. You may only need to superchlorinate every other week if your pool is in good condition.

**In Case of Algae:** Add water up to 100,000 gallons. Burn eyes, excess chlorine and other irritants. If high irritant levels above treatment, use Pace Superchlorinate & Shock Treatment. Follow label directions for alternate methods. Do not use Pace Superchlorinate on each 10,000 gallons of water if algae are visible. Use Pace Superchlorinate & Shock Treatment. Follow label directions for alternate methods. Do not use Pace Superchlorinate on each 10,000 gallons of water if algae are visible.

**Directions for Spa and Hot Tub Use:** It is a violation of Federal law to use this product in a manner inconsistent with its labeling. Each ounce of product will provide approximately 2 ppm available chlorine in 500 gallons of water.

Using a pH test kit, test and adjust the water to the following pH levels: pH 7.2-7.6. Total alkalinity 60-100 ppm, calcium hardness 200 ppm minimum. Maintain these conditions for proper spa and hot tub operation by frequent testing with a test kit. Do not allow calcium hardness level to exceed 500 ppm. It is recommended that spas and hot tubs be drained every 30-90 days, more often under heavy use. Consult manufacturer's recommendations concerning the compatibility of chlorine sanitizers with their equipment. Some oils, lotions, fragrances, deodorants, etc., may cause foaming or cloudy water and may react with chlorine sanitizers to reduce their efficacy.

**Start-Up (Freshly Filled):** 1. Turn on the circulation system and ensure that it is operating properly. 2. Add one ounce of Pace Superchlorinate for each 500 gallons of water. Check free chlorine with the FAC and if below 4.5 ppm, repeat as needed.

**Regular Use:** 1. Turn on the circulation system and ensure that it is operating properly. 2. Scatter 1/2 ounce of Pace Superchlorinate (per 500 gallons) over the water surface. 3. Monitor pH and calcium hardness (per 500 gallons) and adjust as needed. 4. Monitor free chlorine with the FAC and if below 4.5 ppm, repeat as needed. 5. Do not enter until FAC reaches 4.5 ppm.

**Extended Non-Use Period:** Do not enter until FAC reaches 4.5 ppm. Do not enter until FAC reaches 4.5 ppm. Do not enter until FAC reaches 4.5 ppm.
