

US ENVIRONMENTAL PROTECTION AGENCY OFFICE OF PESTICIDES PROGRAMS REGISTRATION DIVISION (TS-767) WASHINGTON, DC 20460 NOTICE OF PESTICIDE: ☒ REGISTRATION ☐ REREГИSTRATION (Under the Federal Insecticide, Fungicide, and Rodenticide Act, as amended)	EPA REGISTRATION NO. 1258-1166 DATE OF ISSUANCE 17 AUG 1988 TERM OF ISSUANCE NAME OF PESTICIDE PRODUCT CDB Effervescent 50 ST
NAME AND ADDRESS OF REGISTRANT (Include ZIP code) Olin Corporation 350 Knotter Drive P.O. Box 586 Cheshire, CT 06410	
NOTE: Changes in labeling formula differing in substance from that accepted in connection with this registration must be submitted to and accepted by the Registration Division prior to use of the label in commerce. In any correspondence on this product always refer to the above U.S. EPA registration number.	
On the basis of information furnished by the registrant, the above named pesticide is hereby Registered/Reregistered under the Federal Insecticide, Fungicide, and Rodenticide Act. A copy of the labeling accepted in connection with this Registration/Reregistration is returned herewith. Registration is in no way to be construed as an indorsement or approval of this product by this Agency. In order to protect health and the environment, the Administrator, on his motion, may at any time suspend or cancel the registration of a pesticide in accordance with the Act. The acceptance of any name in connection with the registration of a product under this Act is not to be construed as giving the registrant a right to exclusive use of the name or to its use if it has been covered by others. This product is conditionally registered in accordance with FIFRA section 3(c)(7)(A) provided that you: 1. Submit/cite all data required for registration/reregistration of your product under FIFRA section 3(c)(5) when the Agency requires all registrants of similar products to submit such data. 2. Add the phrase "EPA Registration No. 1258-1156" to your label before you release the product for shipment. 3. Submit five (5) copies of your final printed labeling before you release the product for shipment. Refer to the A-79 enclosure for a further description of final printed labeling. If these conditions are not complied with, the registration will be subject to cancellation in accordance with FIFRA section 6(e). Your release for shipment of the product constitutes acceptance of these conditions. A stamped copy of the label is enclosed for your records. CARLTON J. KEMPTER Jeff Kempter Product Manager (52) Disinfectants Branch Registration Division (TS-767C) Enclosures ☐ ATTACHMENT IS APPLICABLE

Under the Federal Insecticide,
Fungicide and Rodenticide Act
as amended, for the pesticide
registered under EPA Reg. No.

1258-1165

sun protected

for use in
pools, spas and hot tubs

KEEP OUT OF REACH OF CHILDREN

DANGER

See First Aid Statement and additional
precautions on back panel

NET WT. 4.5 LBS.

Active Ingredient: Sodium
Dichloro S-triazinetrione
Inert Ingredients
Available Chlorine

• stabilized (sun protected*) for
extended chlorine life
• protects against bacteria & algae
• fast dissolving • totally soluble

PRECAUTIONARY STATEMENTS

HAZARDS TO HUMANS AND DOMESTIC ANIMALS

DANGER: Highly corrosive. Causes skin and eye damage. May be fatal if swallowed. Do not get in eyes, on skin, or on clothing. Do not handle with bare hands. Avoid contact with face, throat, and use rubber gloves and eye protection. Clean dry surfaces when handling. If falling to nose and throat, avoid breathing dust and fumes. Remove and wash contaminated clothing before reuse.

FIRST AID (PRACTICAL TREATMENT): Swallowing: Feed large amounts of milk and/or water and induce vomiting. Call a physician immediately. If swallowed, brush off particles of product and flush with cold water for at least 15 minutes. If irritation persists, get medical attention. If in eyes, flush with cold water for at least 15 minutes. Get immediate medical attention. If inhaled, remove person to fresh air. Get immediate medical attention.

CHEMICAL HAZARDS: 3.1-DGER: Skin-g: Irritating agent. Use only clean, dry utensils. Mix only with water. Contamination with moisture, dirt, organic matter or other chemicals (including oil or pool chloro acids) or any other foreign matter may start a chemical reaction with peroxide of lead, overreaction to hazardous gases and possible generation of fire and explosion. Avoid any contact with burning or burning devices which has been used with any inorganic or unsaturated chlorinating compounds (e.g. calcium hypochlorite). Such use may cause fire or explosion.

ENVIRONMENTAL HAZARD: This product is toxic to fish. Do not contaminate lakes, ponds or streams by cleaning of equipment or disposal of wastes.

STORAGE AND DISPOSAL: Keep product dry in tightly closed container when not in use. Store in a cool, dry, well-ventilated area away from heat or open flame. Do not reuse empty container. Rinse empty container thoroughly with water to dissolve all material before discarding. Securely wrap container in several layers of newspaper and discard in trash.
EMERGENCY HANDLING: In case of contamination or decomposition, do not reuse container. If possible, do so in open and well-ventilated area. Flood with large volumes of water. Dispose of contaminated material in an approved landfill area or burn in a safe place.

Directions for Pool Use: It is a violation of Federal law to use this product in a manner inconsistent with its labeling. Pace concentrated pool chlorinating granules are designed to dissolve quickly and completely providing a steady source of available chlorine to control growth of algae and kill many harmful bacteria.

Startup

1. If algae are visible, superchlorinate with Pace Super Chlorinator & Shock. Follow label directions.
2. If pool water is clear, adjust pH to 7.2-7.6.
3. Bring chlorine residual to 1-3 ppm by broadcasting 3/4 lb. of Pace Super Chlorinator to each 5,000 gallons of water.
4. Test chlorine residual with a pool test kit. If needed, repeat dosage until chlorine residual is 1-3 ppm.
5. The next day, stabilize your pool using Pace Stabilizer & Conditioner. Follow label directions.

Routine Care: Stabilize 1 lb. of Pace Stabilizer for each 10,000 gallons of water every other day or as needed, to maintain chlorine residual at 1-3 ppm. Maintain pH level between 7.2-7.6. Total alkalinity 80-100 ppm and calcium hardness above 200 ppm. Test with a reliable test kit. Make necessary adjustments with the appropriate pool care product(s). Superchlorinate weekly with Pace Super Chlorinator & Shock Treatment (or Pace Pool Shock) per 10,000 gallons to burn off organic material and to keep water sparkling clear. You may only need to superchlorinate every other week if your local temperature is below 80°F.

In Case of: Algae colored water, unpleasant odors, burning eyes, excess bath or odor, heavy rains and winds, or high temperatures, shock treat your pool using Pace Super Chlorinator & Shock Treatment. Follow label directions. An alternate method is to add 3/4 lb. of Pace Stabilizer to each 10,000 gallons of water. If algae are visible, shock pool surfaces and vacuum. Repeat treatment the following day. If necessary, do not enter pool until chlorine residual is 1-3 ppm.

Directions for Spa and Hot Tub Use: It is a violation of Federal law to use the product in a manner inconsistent with its labeling. Each ounce of product will provide approximately 4 ppm available chlorine in 500 gallons of water.

Using an appropriate test kit, test and adjust the water to the following values: pH 7.2-7.6, total alkalinity 80-100 ppm, calcium hardness 200 ppm minimum. Maintain these conditions for proper spa and hot tub operation by frequent testing with a test kit. Do not allow cyanuric acid level to exceed 150 ppm. It is recommended that spas and hot tubs be drained every 30-90 days, more often under heavy use. Consult manufacturer's recommendations concerning the compatibility of chlorine sanitizers with their equipment. Some oils, lotions, fragrances, cleansers, etc. may cause foaming or cloudy water and may react with chlorine sanitizers to reduce their efficacy.

Start-Up (Freshly Filled): 1. Turn on the circulation system and ensure that it is operating properly. 2. Add 2 1/2 ounces of product for each 500 gallons of water. Check the free available chlorine (FAC) and, if below 4.5 ppm, repeat as needed. **Regular Use:** 1. Turn on the circulation system and ensure that it is operating properly. 2. Scatter small amount of product (per 500 gallons) around the entire surface of the water. Test for FAC and add additional product if necessary to attain 4.5 ppm FAC. 3. Maintain 1-3 ppm FAC while the spa or hot tub is in use. 4. After each use, shock treat with 1/2 ounce per 500 gallons of PACE to control odors and algae. Repeat as needed. Spa or hot tub should not be entered until FAC reaches 4.5 ppm.

Extended Non-Use Period: During extended periods when the spa or hot tub is not being used, add 1/2 ounce of product per 500 gallons twice a week with the circulation system running. It is needed to maintain 1-3 ppm free available chlorine.
