

NOTICE OF PESTICIDE: REGISTRATION
 REREGISTRATION
(Under the Federal Insecticide, Fungicide,
and Rodenticide Act, as amended)

PACF Sanitizer Special Tablets
for Spas and Hot Tubs

NAME AND ADDRESS OF REGISTRANT (Include ZIP code)

Olin Corporation
350 Foster Drive
P.O. Box 59
Clermont, FL 32709

NOTE: Changes in labeling formula differing in substance from that accepted in connection with this registration must be submitted to and accepted by the Registration Division prior to use of the label in commerce. In any correspondence on this product always refer to the above U.S. EPA registration number.

On the basis of information furnished by the registrant, the above named pesticide is hereby Registered/Reregistered under the Federal Insecticide, Fungicide, and Rodenticide Act.

A copy of the labeling accepted in connection with this Registration/Reregistration is returned herewith.

Registration is in no way to be construed as an indorsement or approval of this product by this Agency. In order to protect health and the environment, the Administrator, on his motion, may at any time suspend or cancel the registration of a pesticide in accordance with the Act. The acceptance of any name in connection with the registration of a product under this Act is not to be construed as giving the registrant a right to exclusive use of the name or to its use if it has been covered by others.

This product is conditionally registered in accordance with FIFRA section 3(c)(7)(A) provided that you:

1. Submit data as required for registration/reregistration of your product under FIFRA section 3(c)(5) when the Agency requires all registrants of similar products to submit such data.
2. Make the labeling changes listed below before you release the product for shipment:
 - a. Add the phrase "EPA Registration No. 1258-1167."
 - b. The words Inert Ingredients in the ingredient statement should be in plural.
 - c. Change the statement "Available Halogen" to "Available Chlorine."
 - d. Delete the statement "Protects against chlorine odor" from below the product name; it is misleading.
 - e. Delete "kill and/or . . ." from the First Aid statement.

SIGNATURE OF APPROVING OFFICIAL

DATE

Pringle 2/16

3. Submit five (5) copies of your final printed labeling before you release the product for shipment. Refer to the A-79 enclosure for a further description of final printed labeling.

If these conditions are not complied with, the registration will be subject to cancellation in accordance with FIFRA section 6(e). Your release for shipment of the product constitutes acceptance of these conditions.

A stamped copy of the label is enclosed for your records.

STORAGE & DISPOSAL: Keep product dry in tightly closed container when not in use. Store in a cool dry well-ventilated area away from heat or open flame. Do not reuse empty container. Rinse empty container thoroughly with water to dissolve all material before discarding. Securely wrap container in several layers of newspaper and discard in trash.

PRECAUTIONARY STATEMENTS

HAZARDS TO HUMANS AND DOMESTIC ANIMALS: DANGER. Highly corrosive. Causes skin and eye damage. May be fatal if swallowed. Do not get in eyes, on skin, or on clothing. Do not handle with bare hands. Wear goggles or face shield and rubber gloves when handling. Use thoroughly clean dry utensils to transfer product from container. Irritating to nose and throat. Avoid breathing dust or fumes. Remove and wash contaminated clothing before reuse.

FIRST AID (PRACTICAL TREATMENT): If swallowed, feed large amounts of ~~milk and~~ water and induce vomiting. Call a physician immediately. If on skin, brush off excess chemical and flush skin with cold water for at least 15 minutes. If irritation persists get medical attention. If in eyes, flush with water for at least 15 minutes. Get immediate medical attention. If inhaled, remove person to fresh air. Get immediate medical attention.

CHEMICAL HAZARDS: DANGER. Strong Oxidizing Agent. Use only clean, dry utensils. Mix only into water. Contamination with moisture, organic matter, or other chemicals (including other pool chemicals) or any other foreign matter may start a chemical reaction with generation of heat, liberation of hazardous gases, and possible generation of fire and explosion. Avoid any contact with flaming or burning material, such as a lighted cigarette. Do not use SANITIZER SPECIAL granules in any chlorinating device which has been used with any inorganic or unstabilized chlorinating compounds (e.g. calcium or sodium hypochlorite). Such use may cause fire or explosion...

ENVIRONMENTAL HAZARDS: This product is toxic to fish. Keep out of lakes, ponds, or streams. Do not contaminate water by cleaning of equipment or disposal of wastes.

PAGE SANITIZER SPECIAL TABLETS FOR SPA & HOT TUBS

DIRECTIONS FOR USE: It is a violation of Federal law to use this product in a manner inconsistent with its labeling.

Each tablet of product will provide approximately 5 ppm available chlorine and bromine per 500 gallons of water. Using an appropriate test kit, test and adjust the water to the following values: pH 7.2 to 7.8; total alkalinity 60 to 100 ppm; calcium hardness 200 ppm minimum. Maintain these conditions for proper spa and hot tub operation by frequent testing with a test kit. Do not allow cyanuric acid level to exceed 150 ppm. It is recommended that spas and hot tubs be drained every 30 to 90 days, more often under heavy use. Consult manufacturers' recommendations concerning the compatibility of chlorine sanitizers with their equipment. Some oils, lotions, fragrances, cleansers, etc. may cause foaming or cloudy water and may react with chlorine sanitizers to reduce their efficacy.

REGULAR USE: Turn on the circulation system and ensure that it is operating properly. Place tablets in a skimmer, dissolving basket, or other appropriate continuous feeder or dissolving device. Check the free available chlorined, and add additional product as necessary to establish 4 to 5 ppm available chlorine and bromine. Maintain 1 to 3 ppm free chlorine and bromine while the spa or hot tub is in use. After each use, shock treat with 10 tablets per 500 gallons of water to control odors and algae. Repeat as needed. Spa or hot tub should not be entered until the free available chlorine and bromine is between 4-5 ppm as determined by a suitable test kit.

START UP (FRESHLY FILLED): Turn on circulation system and ensure that it is operating properly. Place 10 tablets in a skimmer, dissolving basket, or other appropriate continuous feeder or dispensing device. Check the free available chlorine and bromine and if below 4-5 ppm, repeat as needed.

EXTENDED NON-USE PERIOD: During extended period, when the spa or hot tub is not being used, add 8 tablets per 500 gallons twice a week with the circulation system running, or as needed to maintain 1 to 3 ppm free available chlorine and bromine.
