NOTE: Changes in labeling formula differing in substance from that accepted in connection with this registration must be submitted to and accepted by the Registration Division prior to use of the label in commerce. In any correspondence on this product always refer to the above U.S. EPA registration number.

On the basis of information furnished by the registrant, the above named pesticide is hereby Registered/Reregistered under the Federal Insecticide, Fungicide, and Rodenticide Act.

A copy of the labeling accepted in connection with this Registration/Reregistration is returned herewith.

Registration is in no way to be construed as an indorsement or approval of this product by this Agency. In order to protect health and the environment, the Administrator, on his motion, may at any time suspend or cancel the registration of a pesticide in accordance with the Act. The acceptance of any name in connection with the registration of a product under this Act is not to be construed as giving the registrant a right to exclusive use of the name or to its use if it has been covered by others.

The product is subject to the requirements of section 3(c)(5) of FIFRA which provides that you:

1. Submit/obtain all data required for registration, or registration of your product under FIFRA section 3(c)(5) when the Agency requires all registrants of similar products to submit such data.

2. Make the labeling changes listed below before you release the product for shipment:

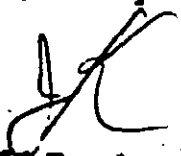

- a. Add the phrase "EPA Registration No. 1258-1178."
- b. The words "Inert Ingredients" in the ingredient statement should be plural.
- c. Change the statement "Available Chlorine" to "Available Chlorine" wherever it appears in the label.
- d. Delete the statement "Protects against chlorine odor" from below the product name. It is misleading.
- e. Delete "milk and/or . . ." from the "First Aid" statement.

BEST AVAILABLE COPY.

3. Submit five (5) copies of your final printed labeling before you release the product for shipment. Refer to the A-79 enclosure for a further description of final printed labeling.

If these conditions are not complied with, the registration will be subject to cancellation in accordance with FIFRA section 6(e). Your release for shipment of the product constitutes acceptance of these conditions.

A stamped copy of the label is enclosed for your records.

DIRECTIONS FOR USE

It is a violation of Federal law to use this product in a manner inconsistent with its labeling

Pace Sanitizer Special for Spas & Hot Tubs contains 52 % available halogen and is designed to dissolve quickly and completely control the growth of algae and effectively kill many bacteria thus helping to keep spas and hot tubs sanitary. Each half ounce of product (approx. 1/2 scoop) will provide approximately 4 ppm available halogen in 500 gallons of water.

Using an appropriate test kit, test and adjust the water to the following values: pH 7.2 to 7.8; total alkalinity, 60 to 100 ppm; calcium hardness, 200 ppm minimum. Maintain these conditions for proper spa and hot tub operation by frequent testing with a test kit. Do not allow cyanuric acid level to exceed 50 ppm. It is recommended that spas and hot tubs be drained every 30 to 90 days, more often under heavy use. Consult manufacturer's recommendations concerning the compatibility of sanitizers with their equipment. Some oils, lotions, fragrances, cleansers may cause cloudy water and they may react with chlorine sanitizers to reduce their efficacy.

START UP (FRESHLY FILLED): 1. Turn on the circulation system and ensure that it is operating. 2. Add one ounce (approximately 1 scoop) of this product per 500 gallons over the surface of the water. Test for available halogen and add additional product if necessary, to obtain 4-5 ppm free available halogen. Maintain 1-3 ppm free available halogen while the spa or hot tub is in use. 4. After each use, shock treat with 15 ounces (approximately 1 and 1/2 scoops) of product per 500 gallons to control odors and algae. Repeat as needed. Spa or hot tub should not be entered until free available halogen reaches 4-5 ppm.

EXTENDED NON-USE PERIOD: During extended periods when the spa or hot tub is not being used add 15 ounces of this product per 500 gallons twice a week with the circulating system running, or as needed to maintain 1-3 ppm free available halogen.

STORAGE AND DISPOSAL: Keep product dry in tightly closed container when not in use. Store in a cool dry well ventilated area away from heat or open flame. Do not reuse empty container. Rinse empty container thoroughly with water to dissolve all material before discarding. Securely wrap container in several layers of newspaper and discard in trash.

PRECAUTIONARY STATEMENTS
HAZARDS TO HUMANS AND DOMESTIC ANIMALS

DANGER: Highly corrosive. Causes skin and eye damage. May be fatal if swallowed. Do not get in eyes, on skin, or on clothing. Do not handle product with bare hands. Wear goggles or face shield and use rubber gloves or thoroughly clean dry utensils when handling product. Irritating to nose and throat. Avoid breathing dust and fumes. Remove and wash contaminated clothes before reuse.

FIRST AID (PRACTICAL TREATMENT): If swallowed, feed large amounts of milk and/or water. Do not induce vomiting. Call a physician immediately. If on skin brush off excess chemical and flush skin with cold water for at least 15 minutes. If irritation persists, get medical attention.

PHYSICAL CHEMICAL HAZARDS: Danger. Strong oxidizing agent. Use only clean dry utensils. Mix only into water. Contamination with moisture, dirt, organic matter, other chemicals (including other pool chemicals or cleansers) or any other foreign matter may start a chemical reaction with generation of heat and liberation of hazardous gases, and possible generation of fire and explosion. Avoid any contact with flaming or burning material, such as a lighted cigarette. Do not use this product in any chlorinating device which has been used with inorganic chlorinating compounds, such as calcium hypochlorite. Such use may cause fire or explosion.
