Nadiyah A McCarroll
Lonza, Inc
90 Boroline Road
Allendale, NJ 07401

Subject Omacide IPBC 40 Industrial Fungicide
EPA Registration Number 1258-1220
Notification Date July 24, 2012
Notification Pin Punch July 25, 2012

Dear Ms McCarroll

This acknowledges receipt of your Notification submitted in accordance with the provisions of PR Notice 98-10 under the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA) section 3(c) 9

Proposed Notifications

- Update Precautionary Statements to add "Remove and wash contaminated clothing before reuse"
- Update User Safety Recommendations to add "Discard clothing or other absorbent materials that have been drenched or heavily contaminated with this products concentrate Do not reuse them"
- Addition of the materials described as "paint components used only for the manufacture of paint" to the Inhibition of Mildew on Paints and Stains use directions on page 4
- Changing the advisory word "should" to the mandatory word "must" in the Directions for Use
- Addition of bracketed instructional information for label reviewer of DRAFT labels

General Comments

- Based on a review of the material submitted, the Notification is acceptable

Should you have any questions or comments concerning this letter, please contact Tom Luminello at (703) 308-8075 or Luminello Tom@EPA.GOV

Sincerely,

A handwritten signature in black ink, appearing to read "Tom Luminello", is written over the typed name.

SUBJECT Label Notification as per PR Notice 98-10

PRODUCTS Omacide IPBC 40 Industrial Fungicide, EPA Reg No 1258-1220

Dear Ms McFarlane

On behalf of Arch Chemicals Inc (now a part of Lonza Inc) I am submitting an application for pesticide notification to request the following changes on the above referenced product label

- 1 Add 'paint components' to the 'To Inhibit The Growth of Mildew on Paints and Stains' paragraph under the 'Directions for Use' section
- 2 As per the Agency's comments from a recently reviewed similar product label, all references for 'should' and/or 'recommended' have been removed or replaced with 'must'
- 3 Update Precautionary Statements to add 'Remove and wash contaminated clothing before reuse'
- 4 Update User Safety Recommendations to add 'Discard clothing or other absorbent materials that have been drenched or heavily contaminated with this product's concentrate. Do not reuse them.'
- 5 And to include minor formatting changes

To support this notification, the following documents are enclosed for your review:

- 1 Application for Pesticide Notification for each product FRM 8750-1, which includes a signed statement certifying compliance with PR Notice 98-10
- 2 One (1) copy of the proposed label with highlighted changes, and
- 3 One (1) clean copy
- 4 Certification with Respect to Label Integrity, and
- 5 1 CD with proposed label

PRECAUTIONARY STATEMENTS HAZARDS TO HUMANS AND DOMESTIC ANIMALS

DANGER Corrosive Causes skin damage May be fatal if absorbed through the skin Causes eye irritation Harmful if swallowed or inhaled Do not get in eyes on skin or on clothing Avoid breathing vapor or spray mist Wear goggles face shield or safety glasses Remove and wash contaminated clothing before reuse

APPLICATORS AND OTHER HANDLERS MUST WEAR Goggles or face shield coveralls worn over long sleeved shirt and long pants chemical resistant gloves (such as Barrier laminate butyl rubber Neoprene rubber Nitrile rubber) shoes plus socks chemical resistant headgear for overhead exposure and chemical resistant apron when cleaning equipment mixing or loading Wash thoroughly with soap and water after handling Remove contaminated clothing and wash before reuse

USER SAFETY REQUIREMENTS

Follow manufacturer's instructions for cleaning/ maintaining PPE If no such instructions exist for washables use detergent and hot water Keep and wash PPE separately from other laundry Discard clothing or other absorbent materials that have been drenched or heavily contaminated with this product's concentrate Do not reuse them

USER SAFETY INSTRUCTIONS

Users must wash hands before eating drinking chewing gum using tobacco or using the toilet Remove clothing immediately if pesticide gets inside Then wash thoroughly and put on clean clothing Remove personnel protective equipment immediately after handling this product Wash the outside of gloves before removing As soon as possible wash thoroughly

FIRST AID

If in Eyes Hold eye open and rinse slowly and gently with water for 15-20 minutes Remove contact lenses if present after the first 5 minutes then continue rinsing eye Call a Poison Control Center or doctor for treatment advice

If on Skin or Clothing Take off contaminated clothing Rinse skin immediately with plenty of water for 15-20 minutes Call a Poison Control Center or doctor for treatment advice

If Inhaled Move person to fresh air If person is not breathing call 911 or an ambulance and then give artificial respiration preferably mouth to mouth if possible Call a Poison Control Center or doctor for further treatment advice

If Swallowed Call a poison control center or doctor immediately for treatment advice Have person sip a glass of water if able to swallow Do not induce vomiting unless told to do so by a poison control center or doctor Do not give anything by mouth to an unconscious person

NOTE TO PHYSICIAN

Probable mucosal damage may contraindicate the use of gastric lavage

Have the product container or label with you when calling a poison control center or doctor or going for treatment In case of emergency for additional information call 1-800-654-6911

ENVIRONMENTAL HAZARDS

This pesticide is toxic to fish Do not discharge effluent containing this product into lakes ponds streams estuaries oceans or other waters unless in accordance with the requirements of a National Pollutant Discharge Elimination System (NPDES) permit and the permitting authority has been notified in writing prior to discharge Do not discharge effluent containing this product to sewer systems without previously notifying the local sewage treatment plant authority For guidance contact your State Water Board or Regional Office of the EPA

STORAGE AND DISPOSAL Do not contaminate water food or feed by storage or disposal

PESTICIDE STORAGE Keep container tightly closed when not in use Do not reuse container Do not store with strong oxidizing agents or strong (concentrated) acids

PESTICIDE DISPOSAL Pesticide wastes are acutely hazardous Improper disposal of excess pesticide spray mixture or rinsate is a violation of Federal Law If these wastes cannot be disposed of by use according to label instructions contact your State Pesticide or Environmental Control Agency or the Hazardous Waste representative at the nearest EPA Regional Office for guidance

CONTAINER DISPOSAL Nonrefillable container Do not reuse or refill this container Offer for recycling if available Triple rinse container promptly after emptying Then offer for recycling or reconditioning or puncture and dispose of in a sanitary landfill or by other procedures approved by state and local authorities

[For containers ≥ 5 gallons Triple rinse as follows Empty remaining contents into application equipment or a mix tank Fill the container 1/4 full with water Replace and tighten closures Tip container on its side and roll it back and forth ensuring at least one complete revolution for 30 seconds Stand the container on its end and tip it back and forth several times Turn the container over onto its other end and tip it back and forth several times Empty the rinsate into application equipment or a mix tank or store rinsate for later use or disposal Repeat this procedure two more times

[For containers ≤ 5 gallons] Triple rinse as follows Empty remaining contents into application equipment or a mix tank and drain for 10 seconds after the flow begins to drip Fill the container 1/4 full with water and recap Shake for 10 seconds Pour rinsate into application equipment or a mix tank or store rinsate for later use or disposal Drain for 10 seconds after the flow begins to drip Repeat this procedure two more times

PLASTICS AND PLASTIC COATINGS This product may be used in to prevent surface mildew growth on plastic items such as shower curtains cable and wire insulation sun umbrellas polymer furniture filter medias polymer components of carpet etc Intended plastics include polymers such as PVC polyurethanes elastomers and rubbers neoprene styrene compounds polyolefins etc Use levels of 0.125 - 2.5% by weight of the plastic are generally adequate Disperse this product in the plasticizer or color concentrate before it is incorporated into the resin to ensure a uniform distribution Do not use this product if the heat of processing is above 350 F for prolonged periods nor must it be used in a plastic that will be in contact with food or medical device applications

For example to inhibit the growth of mildew on a plastic such as polyurethane boat seat cushion intended for a non food area add 1.25% (12.5 lbs of this product/1000 lbs of polyurethane formulation) of this product to the polyurethane formulation

TEXTILES This product may be used as a mildewcide applied in both aqueous and solvent based coatings or dyes which are typical to the textile material processing Typical end use applications of these materials can be carpet fibers and backings canvas and cordage drapes shower curtains etc Not to be used in fabrics for human wear or direct skin contact Product must be solubilized or stirred in the dye bath or polymer coating pan to minimize mechanical losses and ensure a uniform distribution of the product Use levels in the range of 0.05-2.5% by weight of the total processing formulation are typically adequate to prevent fungal growth For example to inhibit the growth of mildew on cotton canvas intended for a non food area add 1.75% (17.5 lbs of this product/1000 lbs of dye bath) of this product to the dye bath formulation

PAPER COATINGS This product may be used as a mildewcide in both aqueous and solvent based coatings which are applied to paper and cardboard substrates This product can be used to prevent mold and mildew from growing on products such as corrugated cardboard or soap wrappers wallcovers and non-food contact packaging materials and non food contact paper tapes Use levels of this product range from 0.5 - 2.0% of this product by weight Add this product at the end of the production cycle and with good agitation to prevent possible mechanical losses and ensure a uniform distribution For example to inhibit the growth of mildew on corrugated cardboard intended for non food packaging add 1.25% (12.5 lbs of this product/1000 lbs of coating material)

CANVAS AND CORDAGE This product may be used as a mildewcide in both aqueous and solvent based process formulations which coat canvas and cordage Typical use levels of this product will range from 0.05- 2.5% of the process formulations used in the process of these canvases and cordages This product must be added at the end of the production cycle to the process formulation with good agitation to prevent possible mechanical losses and ensure a uniform distribution For example to inhibit the growth of mildew on cotton canvas intended for a non-food area add 2% (20 lbs of this product/1000 lbs of process formulation) of this product to the process formulation

INKS This product may be used in aqueous based ink solutions for protection of these solutions against attack of fungal organisms Add this product at the end of the product cycle with good agitation This product will generally impart protection when used at levels of 1.7 - 7.5% based on the formula weight

10/11

Wood Preservation This product is a liquid non-metallic compound designed for use as a wood preservative for use in above ground applications. Use levels are in percentage by weight and refer to this product. Dosage ranges are given for the various applications to indicate the approximate levels for a particular application. Exact levels of use must be determined by field trials.

For best results this product must be solubilized in a suitable solvent or made into an aqueous dispersions and then applied to new lumber plywood particle board millwork etc. to prevent the growth of mildew sapstain and wood rot on these substrates. This product is for use on wood in above ground use only. Treating solutions may be prepared by dissolving this product in alcohols or aromatic solvents or by dispersion in water. Levels of 0.25% - 3% of this product are suggested depending upon the severity of conditions for end use and the extent of time that protection is required. For freshly sawn lumber a concentration of 0.5% of this product is suggested as a starting level. A one minute dip at ambient temperatures in a solution or aqueous dispersion containing 0.5% of this product should be adequate to control the development of mildew and sapstain organisms on the lumber. Because of the great variation in susceptibility of fresh sawn lumber relating to the type of wood sawing and storage techniques conditions of humidity method of treatment etc. it is usually necessary to carry out field tests to determine the most appropriate means of application and the optimum concentration of this product to be used.

For best results lumber must be treated within twenty-four hours after it is sawed. The lumber must be completely immersed in the treating bath and the treating vat designed to permit easy immersion and removal and to minimize spillage. The vat may be cleaned by emptying and rinsing with a suitable solvent or by use of a detergent solution. To add additional product while treating first prepare the proper solution or emulsion in a separate container (of wood plastic or stainless steel construction) and add to the treating vessel. After treatment lumber must be stacked in a properly maintained seasoning yard with good drainage so that no water will accumulate in any area. The yard must be kept free from weeds and vegetation which may hold moisture and promote growth of decay and stain producing fungi. All debris and lumber scraps must be removed from the area.

A properly laid out yard must take advantage of prevailing winds to permit good air circulation. Main alleys must be at least 16 feet wide. Stack foundations must be sufficiently elevated to permit ready access of air to the pile and allow water to drain off quickly. This product is also for use on millwork including door and window frames exterior siding composite board plywood and other construction lumber when it is important to prevent the growth of mildew sapstain and wood rot organisms on these materials.

Wood treated with this product does not change in appearance and may be painted when dry. For applications of this type this product once in solution may be applied by dipping brushing spraying or pressure treating. Levels of 0.25% may be used for mildew control. To control rot and decay do not use less than 0.5% as a concentration. Use this product in solution in a suitable solvent. Concentrations up to 2.0% may be used depending upon the condition of the wood the nature of the intended exposure and the length of protection desired. When brushing a single coat will usually suffice if the solution is applied liberally. This also pertains to spraying. Use of this product is not for wood surfaces which may come in contact with food. Surfaces which may be in continuous contact with skin should be coated with a varnish or lacquer after treatment with this product. This product may also be used as an additive to stains to be applied to such materials as exterior siding decks lawn furniture etc. in order to prevent the growth of fungal organisms. Levels between 0.5% - 2% of this product by weight of the final formulation be added to these materials.

Our technical services personnel are always available to assist in determining optimum levels for specific systems in any type of application.

Note: Text in [Square Brackets] are notes to the reviewer. Text in {Curly Brackets} is optional.

Omacide IPBC 40 Industrial Fungicide

EPA Reg. No. 1258-1220

EPA Notification label: Add paint components 2012.7.24

FOR THE IN-CAN PRESERVATION OF HOUSEHOLD, CONSUMER, INDUSTRIAL, INSTITUTIONAL AND JANITORIAL PRODUCTS This product may be used for control of yeast and fungi at concentrations of 0.01% to 0.075%. Example end use applications include liquid & solid air fresheners, dish detergents, laundry products, soaps & detergents, non-food contact surface cleaners, floor care products, bathroom cleaners, window cleaners, fabric care products, automotive care products, and furniture care products. This product may be used to preserve liquid & solid formulations of the types described above or it may be used to preserve formulations offered as semi-solid gels, polishes, or waxes, or offered as pre-moistened wipes, mops, or sponges.

Note: Text in [Square Brackets] are notes to the reviewer. Text in {Curly Brackets} is optional.
