Nadiyah A McCarroll
Lonza, Inc
90 Boroline Road
Allendale, NJ 07401

Subject Omacide IPBC 30 Industrial Fungicide
EPA Registration Number 1258-1221
Notification Date July 24, 2012
Notification Pin Punch July 25, 2012

Dear Ms McCarroll

This acknowledges receipt of your Notification submitted in accordance with the provisions of PR Notice 98-10 under the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA) section 3(c) 9

Proposed Notifications

- Change Inert Ingredients to Other Ingredients
- Update User Safety Recommendations to add "Discard clothing or other absorbent materials that have been drenched or heavily contaminated with this products concentrate Do not reuse them"
- Update Users Safety Instructions
- Addition of the materials described as "paint components used only for the manufacture of paint or stains" to Inhibition of Mildew on Paints and Stains use directions on page 4
- Changing the advisory word "should" to the mandatory word "must" in the Directions for Use
- Addition of bracketed instructional information for label reviewer of DRAFT labels

General Comments

- Based on a review of the material submitted, the Notification is acceptable

Should you have any questions or comments concerning this letter, please contact Tom Luminello at (703) 308-8075 or Luminello Tom@EPA GOV

Sincerely,

A handwritten signature in black ink, appearing to read "Tom Luminello", is written over the typed name and title.

SUBJECT Label Notification as per PR Notice 98 10

PRODUCTS Omacide IPBC 30 Industrial Fungicide, EPA Reg No 1258-1221

Dear Ms McFarlane

On behalf of Arch Chemicals Inc (now a part of Lonza Inc) I am submitting an application for pesticide notification to request the following changes on the above referenced product label

- 1 Add paint components' to the To Inhibit The Growth of Mildew on Paints and Stains paragraph under the Directions for Use section
- 2 As per the Agency's comments from a recently reviewed similar product label all references for should and/or recommended have been removed or replaced with must'
- 3 Update Precautionary Statements to add Remove and wash contaminated clothing before reuse
- 4 Update User Safety Recommendations to add Discard clothing or other absorbent materials that have been drenched or heavily contaminated with this product's concentrate Do not reuse them (concentrate is spelled wrong on the label)
- 5 And to include minor formatting changes

To support this notification the following documents are enclosed for your review

- 1 Application for Pesticide Notification for each product FRM 8750-1 which includes a signed statement certifying compliance with PR Notice 98-10
- 2 One (1) copy of the proposed label with highlighted changes and
- 3 One (1) clean copy
- 4 Certification with Respect to Label Integrity, and
- 5 1 CD with proposed label

PRECAUTIONARY STATEMENTS HAZARDS TO HUMANS AND DOMESTIC ANIMALS

DANGER Corrosive Causes skin burns Causes substantial but temporary eye irritation Harmful if swallowed inhaled or absorbed through the skin Prolonged or frequently repeated skin contact may cause allergic reaction in some individuals Do not get in eyes on skin or on clothing Avoid breathing vapor or spray mist Wash thoroughly with soap and water after handling Remove contaminated clothing and wash before reuse

APPLICATORS AND OTHER HANDLERS MUST WEAR Goggles or face shield coveralls worn over long sleeve shirt and long pants chemical resistant gloves (such as Barrier Laminate Butyl Rubber Neoprene Rubber Nitrile Rubber) and shoes plus socks chemical resistant headgear for overhead exposure and chemical resistant apron when cleaning equipment mixing or loading Wear a mask or pesticide respirator jointly approved by the Mine Safety Health Administration and the National Institute for Occupational Safety and Health Wash thoroughly with soap and water after handling

USER SAFETY RECOMMENDATIONS

Follow manufacturer's instructions for cleaning/ maintaining PPE If no such instructions exist for washables use detergent and hot water Keep and wash PPE separately from other laundry Discard clothing or other absorbent materials that have been drenched or heavily contaminated with this product's concentrate Do not reuse them

SAFETY USERS SAFETY INSTRUCTIONS

Users must wash hands before eating drinking chewing gum using tobacco or using the toilet Remove clothing immediately if pesticide gets inside Then wash thoroughly and put on clean clothing Remove personnel protective equipment immediately after handling this product Wash the outside of gloves before removing As soon as possible wash thoroughly

FIRST AID

If in Eyes Hold eye open and rinse slowly and gently with water for 15-20 minutes Remove contact lenses if present after the first 5 minutes then continue rinsing eye Call a Poison Control Center or doctor for treatment advice

If on Skin or Clothing Take off contaminated clothing Rinse skin immediately with plenty of water for 15-20 minutes Call a Poison Control Center or doctor for treatment advice

If Inhaled Move person to fresh air If person is not breathing call 911 or an ambulance and then give artificial respiration preferably mouth-to-mouth if possible Call a Poison Control Center or doctor for further treatment advice

If Swallowed Call a Poison Control Center or doctor immediately for treatment advice Have person sip a glass of water if able to swallow Do not induce vomiting unless told to do so by a poison control center or doctor Do not give anything by mouth to an unconscious person

NOTE TO PHYSICIAN

Probable mucosal damage may contraindicate the use of gastric lavage Have the product container or label with you when calling a Poison Control Center or doctor or going for treatment In case of emergency for additional information call 1-800-654-6911

ENVIRONMENTAL HAZARDS This pesticide is toxic to fish Do not discharge effluent containing this product into lakes ponds streams estuaries oceans or other waters unless in accordance with the requirements of a National Pollutant Discharge Elimination System (NPDES) permit and the permitting authority has been notified in writing prior to discharge Do not discharge effluent containing this product to sewer systems without previously notifying the local sewage treatment plant authority For guidance contact your State Water Board or Regional Office of the EPA

STORAGE AND DISPOSAL Do not contaminate water food or feed by storage or disposal

PESTICIDE STORAGE Keep container tightly closed when not in use Do not reuse container
Do not store with strong oxidizing agents or strong (concentrated) acids

PESTICIDE DISPOSAL Pesticide wastes are acutely hazardous Improper disposal of excess
pesticide spray mixture or rinsate is a violation of Federal Law If these wastes cannot be
disposed of by use according to label instructions contact your State Pesticide or Environmental
Control Agency or the Hazardous Waste representative at the nearest EPA Regional Office for
guidance

CONTAINER DISPOSAL Nonrefillable container Do not reuse or refill this container Offer for
recycling if available Triple rinse container promptly after emptying Then offer for recycling or
reconditioning or puncture and dispose of in a sanitary landfill or by other procedures approved
by state and local authorities

[For containers \geq 5 gallons] Triple rinse as follows Empty remaining contents into application
equipment or a mix tank Fill the container 1/4 full with water Replace and tighten closures Tip
container on its side and roll it back and forth ensuring at least one complete revolution for 30
seconds Stand the container on its end and tip it back and forth several times Turn the
container over onto its other end and tip it back and forth several times Empty the rinsate into
application equipment or a mix tank or store rinsate for later use or disposal Repeat this
procedure two more times

[For containers \leq 5 gallons] Triple rinse as follows Empty remaining contents into application
equipment or a mix tank and drain for 10 seconds after the flow begins to drip Fill the container
1/4 full with water and recap Shake for 10 seconds Pour rinsate into application equipment or a
mix tank or store rinsate for later use or disposal Drain for 10 seconds after the flow begins to
drip Repeat this procedure two more times

Page 3 of 7

DIRECTIONS FOR USE It is a violation of federal law to use this product in a manner inconsistent with its labeling. Do not apply this product in a way that will contact workers or other persons.

TO INHIBIT THE GROWTH OF MILDEW ON PAINTS & STAINS This product, used in solvent and waterborne paints, paint components used only for the manufacture of paints and stains will inhibit the growth of mildew. Add by pouring the container at the end of the manufacturing process and allow to mix long enough to be adequately dispersed. Do not add to hot paint. Typical levels for protection against mildew on painted or stained surfaces are 0.35-1.7 % by weight on wet paint. For example, house paint with a wet density of 10 lbs/gallon would use 3.5-17.0 lbs of this product per 100 gallons of wet paint. Where the climate is severe and mildew growth is a major problem for painted surfaces, more would be required, as much as 2.7 % by weight on wet paint. For interior paint use, approximately half the exterior concentrations should be used, 0.2% to 0.9% by weight on wet paint. Appropriate levels are best determined by field trials.

TO INHIBIT THE GROWTH OF FUNGI IN AQUEOUS METALWORKING, CUTTING, COOLING & LUBRICATING CONCENTRATES Add by pouring from the container an amount that will give up to 3333 ppm in the diluted fluid. The amount required in the concentrate will depend on the end use dilution. For example, if the desired level of this product in the diluted fluid is 333 ppm and the end use dilution of the fluid is 5%, then a 0.666% concentration of this product is required in the concentrate ($333 \text{ ppm} / 0.05 = 6660 \text{ ppm}$ or 0.666%).

TO INHIBIT THE GROWTH OF FUNGI IN AQUEOUS METALWORKING, CUTTING, & LUBRICATING FLUIDS Add by pouring from the container up to 3333 parts per million (0.333% v/v) of this product to the diluted fluid (0.33 gallons per 100 gallons of solution or 3.3 liters per 1000 liters of solution). This product may be added to the fluid at the time it is prepared (diluted) or to the reservoir (sump) containing the fluid after it is put into use. If it is added to the reservoir, the fluid should be circulated after addition to ensure mixing.

For use as a fungicide in non medical, non food contact aqueous, solvent and non solvent based systems such as natural and synthetic adhesives, caulks, patching compounds, sealants, grouts, latexes such as SBR/latex used in the manufacture of flooring adhesives or carpet backings This product can be used as an additive to non medical, non-food use natural and synthetic adhesives, caulks, patching compounds, sealants, grouts, lattices such as SBR/latex flooring adhesives or carpet backings to prevent the growth of fungi, molds and mildews in the material both in the wet state and in the dry film of the finished product. Recommended use levels are between 0.075 - 1.0% wet formulation weight. This product should be added toward the end of the production cycle with good agitation to ensure a uniform distribution is achieved.

For example, to inhibit the growth of mildew on a latex-based wall cover adhesive intended for a non food area, add 0.75% (7.5 lbs of this product/1000 lbs of latex-based adhesive formulation) of this product to the latex-based formulation.

Note: Text in [Square Bracket] are notes to the label reviewer. Text in {Curly Brackets} is optional.

10/11

Wood Preservation This product is a liquid non-metallic compound designed for use as a wood preservative for use in above ground applications. All recommendations of use levels are in percentage by weight and refer to this product. Dosage ranges are given for the various applications to indicate the approximate levels for a particular application. Exact levels of use must be determined by field trials.

Solubilize in a suitable solvent or made into an aqueous dispersion and then applied to new lumber, plywood, particle board, millwork, etc. to prevent the growth of mildew, sapstain and wood rot on these substrates. This product is recommended for use on wood in above ground use only. Treating solutions may be prepared by dissolving this product in alcohols or aromatic solvents or by dispersion in water. Levels of 0.34% - 4% of this product are suggested depending upon the severity of conditions for end use and the extent of time that protection is required. For freshly sawn lumber, a concentration of 0.67% of this product is suggested as a starting level. A one minute dip at ambient temperatures in a solution or aqueous dispersion containing 0.67% of this product should be adequate to control the development of mildew and sapstain organisms on the lumber. Because of the great variation in susceptibility of fresh sawn lumber relating to the type of wood, sawing and storage techniques, conditions of humidity, method of treatment, etc., it is usually necessary to carry out field tests to determine the most appropriate means of application and the optimum concentration of this product to be used.

For best results, treat lumber within twenty-four hours after it is sawed. The lumber must be completely immersed in the treating bath and the treating vat designed to permit easy immersion and removal and to minimize spillage. The vat may be cleaned by emptying and rinsing with a suitable solvent or by use of a detergent solution. To add additional product while treating, first prepare the proper solution or emulsion in a separate container (of wood, plastic or stainless steel construction) and add to the treating vessel. After treatment, lumber should be stacked in a properly maintained seasoning yard with good drainage so that no water will accumulate in any area. The yard must be kept free from weeds and vegetation which may hold moisture and promote growth of decay and stain-producing fungi. All debris and lumber scraps must be removed from the area.

A properly laid out yard must take advantage of prevailing winds to permit good air circulation. Main alleys must be at least 16 feet wide. Stack foundations must be sufficiently elevated to permit ready access of air to the pile and allow water to drain off quickly. Including door and window frames, exterior siding, composite board, plywood and other construction lumber when it is important to prevent the growth of mildew, sapstain and wood rot organisms on these materials.

Wood treated with this product does not change in appearance and may be painted when dry. For applications of this type, this product once in solution may be applied by dipping, brushing, spraying or pressure treating. Levels of 0.34% may be used for mildew control. To control rot and decay, do not use less than 0.67% as a concentration. Use this product in solution in a suitable solvent. Concentrations up to 2.68% may be used depending upon the condition of the wood, the nature of the intended exposure and the length of protection desired.

When brushing, a single coat will usually suffice if the solution is applied liberally. This also pertains to spraying. Use of this product is not recommended for wood surfaces which may come in contact with food. Surfaces which may be in continuous contact with skin should be coated with a varnish or lacquer after treatment with this product. This product may also be used as an additive to stains to be applied to such materials as exterior siding, decks, lawn furniture, etc., in order to prevent the growth of fungal organisms. It is recommended that levels between 0.67% - 2.68% of this product by weight of the final formulation be added to these materials. Our technical services personnel are always available to assist in determining optimum levels for specific systems in any type of application.

Note: Text in [Square Bracket] are notes to the label reviewer. Text in {Curly Brackets} is optional.

FOR THE IN CAN PRESERVATION OF HOUSEHOLD, CONSUMER, INDUSTRIAL, INSTITUTIONAL AND JANITORIAL PRODUCTS This product may be used for control of yeast and fungi at concentrations of 0.013% to 0.1%. Example end use applications include liquid & solid air fresheners, dish detergents, laundry products, soaps & detergents, non-food contact surface cleaners, floor care products, bathroom cleaners, window cleaners, fabric care products, automotive care products, and furniture care products. This product may be used to preserve liquid & solid formulations of the types described above or it may be used to preserve formulations offered as semi solid gels, polishes, or waxes, or offered as pre-moistened wipes, mops, or sponges.
