Subject: Label Amendment – Minor changes to precautionary language and removal of optional language
Product Name: ARCH 52% CALCIUM HYPOCHLORITE
EPA Registration Number: 1258-1250
Received Date: 06/15/2021
Action Case Number: 00306424

Dear Ms. Toogood:

The amended label referred to above, submitted in connection with registration under the Federal Insecticide, Fungicide and Rodenticide Act (FIFRA), as amended, is acceptable. This approval does not affect any conditions that were previously imposed on this registration. You continue to be subject to existing conditions on your registration and any deadlines connected with them.

A stamped copy of your labeling is enclosed for your records. This labeling supersedes all previously accepted labeling. Pursuant to 40 CFR 156.10(a)(6) you must submit one copy of the final printed labeling before you release the product for shipment with the new labeling. In accordance with 40 CFR 152.130(c), you may distribute or sell this product under the previously approved labeling for 18 months from the date of this letter. After 18 months, you may only distribute or sell this product if it bears this new revised labeling or subsequently approved labeling. "To distribute or sell" is defined under FIFRA section 2(gg) and its implementing regulation at 40 CFR 152.3.

Should you wish to add/retain a reference to the company's website on your label, then please be aware that the website becomes labeling under FIFRA and is subject to review by the Agency. See FIFRA section 2(p)(2). If the website is false or misleading, the product would be misbranded and unlawful to sell or distribute under FIFRA section 12(a)(1)(E). 40 CFR 156.10(a)(5) lists examples of statements EPA may consider false or misleading. In addition, regardless of whether a website is referenced on your product's label, claims made on the website may not substantially differ from those claims approved through the registration process, FIFRA section 12(a)(1)(B). Therefore, should the Agency find or if it is brought to our attention that a website contains false or misleading statements or claims substantially differing from the EPA approved registration, the website will be referred to the EPA's Office of Enforcement and Assurance.

EPA Reg. No. 1258-1250

Action Case Number/Decision No. 00306424

Your release for shipment of the product constitutes acceptance of these conditions. If these conditions are not complied with, the registration will be subject to cancellation in accordance with FIFRA section 6. If you have any questions, please contact Melanie Bolden by phone at (703) 347-0165, or via email at Bolden.Melanie@epa.gov.

Sincerely,

A handwritten signature in black ink, appearing to read 'D. Fuller', with a long horizontal stroke extending to the right.

Demson Fuller, Product Manager 32
Regulatory Management Branch I
Antimicrobials Division (7510P)
Office of Pesticide Programs

Enclosure

Note to reviewer:

[All text in brackets [AAA] is optional and may/may not be included on all end-use labels]

{All text in braces {AAA} is for information purposes and will not appear on final label}

Arch 52% Calcium Hypochlorite

ACTIVE INGREDIENT:

CALCIUM HYPOCHLORITE..... 52%

OTHER INGREDIENTS: 48%

TOTAL: 100%

A C C E P T E D

07/16/2021

Under the Federal Insecticide, Fungicide
and Rodenticide Act as amended, for the
pesticide registered under

EPA Reg. No. 1258-1250

KEEP OUT OF REACH OF CHILDREN

[MANTÉNGASE FUERA DEL ALCANCE DE LOS NIÑOS]

DANGER [PELIGRO]

{Note to reviewer: In accordance with 40 CFR 156.68(d), all first aid statements, as prescribed, will appear on the front panel of the product label.}

FIRST AID:

IF IN EYES: Hold eye open and rinse slowly and gently with water for 15-20 minutes. Remove contact lenses, if present, after the first 5 minutes, then continue rinsing eye. Call a poison control center or doctor for treatment advice.

IF ON SKIN OR CLOTHING: Take off contaminated clothing. Rinse skin immediately with plenty of water for 15-20 minutes. Call a poison control center or doctor for treatment advice.

IF SWALLOWED: Call a poison control center or doctor immediately for treatment advice. Have person sip a glass of water if able to swallow. Do not induce vomiting unless told to do so by a poison control center or doctor. Do not give anything by mouth to an unconscious person.

IF INHALED: Remove person to fresh air. If person is not breathing, call 911 or an ambulance, then give artificial respiration, preferably mouth-to-mouth if possible. Call a poison control center or doctor for further treatment advice.

Have the product container or label with you when calling a poison control center or doctor, or going for treatment.

NOTE TO PHYSICIAN: Probable mucosal damage may contraindicate the use of gastric lavage.

IN CASE OF EMERGENCY CALL: 1-800-654-6911

Read all Precautionary Statements on [back] [side] [right] [left] panel before use.

PRECAUTIONARY STATEMENTS:

HAZARDS TO HUMANS AND DOMESTIC ANIMALS

DANGER: Corrosive. Causes irreversible eye damage and skin burns. Harmful if swallowed, absorbed through skin, or inhaled.

- [•] Open in a well-ventilated area. Avoid breathing dust and fumes.
- [•] Do not get in eyes, on skin, or on clothing. Do not handle with bare hands. Wear protective eyewear and use rubber gloves. For additional protection of skin, wear long sleeves and long pants.
- [•] Wash thoroughly with soap and water after handling and before eating, drinking, chewing gum, using tobacco, or using the toilet.
- [•] Remove and wash contaminated clothing before reuse.

PHYSICAL AND CHEMICAL HAZARDS:

If product is exposed to small amounts of water, it can react violently to produce heat and toxic gas and spatter. Do not pre-mix or add water to this product. Only add this product directly to your [swimming pool] [,][or] spa][or skimmer].

- [•] Do not allow to become wet or damp before use.

Can react with other materials, including other water treatment products, to cause fire, explosion, and the release of toxic gases.

- [•] Keep all foreign matter, including other water treatment products, away from this product.
- [•] *{For use with resealable packaging.}* Use only clean, dry utensils to dispense this product.
- [•] *{For residential use: }*[Do not use this product in a floater or feeder.] *{For industrial, commercial or municipal use:}*[Do not use this product in a floater or feeder that has been used with any other product.]
- [•] Do not allow this product to contact other water treatment products. Before placing this product in a skimmer, make sure skimmer is completely clean and free of residue from other water treatment products.

Exposure to heat can cause this product to rapidly decompose, leading to fire, explosion, and the release of toxic gases.

- [•] Store in a cool, dry, well-ventilated area.

Strong oxidizing agent. This product can increase fire intensity.

- [•] Keep away from heat and from flame and burning material, including lighted cigarettes.

{First sentence of paragraph below for containers less than 50 lbs. All others use full paragraph.}

ENVIRONMENTAL HAZARDS:

This pesticide is toxic to fish and aquatic organisms. Do not discharge effluent containing this product into lakes, ponds, streams, estuaries, oceans, or other waters unless in accordance with the requirements of a National Pollutant Discharge Elimination System (NPDES) permit and the permitting authority has been notified in writing prior to discharge. Do not discharge effluent containing this product to sewer systems without previously notifying the local sewage treatment plant authority. For guidance contact your State Water Board or Regional Office of the EPA.

DIRECTIONS FOR USE:

It is a violation of federal law to use this product in a manner inconsistent with its labeling.

READ ALL PRECAUTIONARY STATEMENTS BEFORE USE.**{Use 1}[SWIMMING POOLS]**

[This product is a concentrated chlorinating agent.] [It is in a dry, free-flowing form.] [It kills bacteria, controls algae and destroys organic contaminants in pools.]

[WHY YOU SHOULD USE THIS PRODUCT: This is an effective, multi-purpose product that [sanitizes], [clarifies], [[helps] prevent[s] algae] and [shock treats your pool]. It is convenient, easy to use, and won't over-stabilize your pool.]

{Mass Channel}

{Optional statement for pool care program for the [Brand A]}

[For crystal clear pool water, follow our [Brand A] 4 step pool care program: Step 1: Test and adjust pool water balance, Step 2: Sanitize, Step 3: Shock treat your pool at least once a week, and Step 4: Add algacide regularly].

{Optional statement for pool care program with the [Brand B]}

[For crystal clear pool water, follow the [Brand B] 3-Step Program: Step 1: Test and balance pool water, Step 2: Sanitize, and Step 3: Shock at least once a week.]

{Optional statement for pool care program for the [Brand C]}

[Take a pool water sample to your authorized [Brand C] retailer for a detailed water analysis.]

{Dealer Channel}

[For best results, follow a weekly program with our [brand] System. Consult your authorized [brand] Dealer for advice on the system that best suits your pool and your lifestyle.] [Take a pool water sample to your authorized [brand] Dealer regularly for a detailed water analysis.]] **[For crystal clear pool water, follow the [brand] 3 step pool care program:** Step 1: Sanitize [It], Step 2: Shock [It] Step 3: Defend [It].]]

[[WATER BALANCE:

[Adjust and maintain total alkalinity from 60 to 100 parts per million (ppm), pH from 7.2 to 7.6, and calcium hardness above 200 ppm. [Always check and adjust total alkalinity before adjusting pH levels.] Test frequently using [a brand] [test kit] {or} [test strips] that measure[s] all of the above ranges. Follow label directions for each product and allow each product to dissolve and disperse before adding additional products to the pool.]

{Mass Channel}

[[Download the [FREE] [Test to Swim™] [application name] app from your smartphone] [for expert water analysis, product recommendations, and dosage instructions].]

[Visit a [Test to Swim™ Station] [device/station name], at participating retailers, for expert water analysis, product recommendations and dosage instructions. [To find a participating retailer near you, visit www.hthpools.com/XXX].]

[Use a [Test to Swim™ Station] [device/station name] (at participating retailers) or download the Test to Swim™ [application name] app from your smartphone] [for expert water analysis, product recommendations, and dosage instructions].]

{Dealer Channel}

[Take a pool water sample to your [brand] dealer frequently to test for water balance. Maintain free available chlorine between 1 - 4 ppm.]

{OR}

[Adjust and maintain pool water to recommended ranges:

Acceptable Range for Balance	
Total Alkalinity	60-100 ppm
pH	7.2-7.6
Calcium Hardness	Above 200 ppm
Available Chlorine	1-4 ppm

Note: Follow label directions for each product and allow each product to dissolve and disperse before adding additional products to the pool. Always check and adjust total alkalinity before adjusting pH levels. [Use a test kit [or test strips] that measure[s] all these ranges.]]

[METHOD OF APPLICATION:] [HOW TO USE:]

{When contents are in a resealable container} [Use only a clean, dry [scoop][lid] to measure this product]. [Do not use the [scoop][lid] for any other purpose.]

{When contents are in a single use bag:} [Use entire contents of bag when opened.]

DO NOT use in floater or feeder.

[[METHOD FOR DOSING DIRECTLY INTO POOL:]

Add the recommended dosage of this product [during evening hours] while the filter pump is running. When adding this product to your pool, broadcast the product evenly over a wide area in the deepest part of the pool. If any granules settle to the bottom of the pool, use brush to disperse until completely dissolved. [Undissolved granules may cause bleaching or other damage to pool surfaces.]]

[METHOD FOR SKIMMER ADDITION:

[Use this method to avoid bleaching vinyl liner or paint.] Make sure that filter pump is on and properly recirculating through skimmer. Empty skimmer of all chemicals and/or debris. Contamination may cause an explosion or the release of toxic gases. DO NOT use this method when an automatic chemical dispensing device (e.g. feeder) is present. Pour this product slowly into skimmer, making sure that the material is drawn into the system at the same rate. DO NOT allow this material to accumulate as toxic gases may be generated.]

Test free available chlorine residual with [a][brand] pool test kit [or test strips]. Do not enter pool until the free available chlorine residual is 1- 4 ppm. **Re-entry into treated swimming pools is prohibited above levels of 4 ppm chlorine for risk of bodily injury.**

[OPENING YOUR POOL:

Balance pool water per levels in WATER BALANCE section. Add a shock dosage of this product. Repeat dosage, as needed, until the free available chlorine residual is 1–4 ppm. Follow label directions for each of these products.]

{Sanitizer Directions}

ROUTINE CHLORINATION:

[For [Wading Pools], [Splasher Pools] [and] [Kiddie Pools]:]

[Throughout the pool season, add 0.14 oz [(3/4 teaspoon (tsp))] [(#¹ bag[s]²)] of this product per 200 gallons of pool water daily or as often as needed to maintain chlorine residual at 1-4 ppm.]

[For small pools less than 5,000 gallons:] [For pop-up pools:]

[FOR UNSTABILIZED POOLS: [Add 0.35 oz [(1/2 tablespoon (Tbsp))] [(# bag[s])] of this product per 500 gallons of pool water daily or as often as needed to maintain the free available chlorine residual at 1 – 4 ppm. FOR STABILIZED POOLS: Add 0.4 oz [(2 1/2 teaspoons (tsp))] [(# bag[s])] per 500 gallons every other day or as often as needed to maintain the free available chlorine residual at 1-4 ppm.]

[For pools up to 10,000 gallons:] [For pop-up, above ground and/or inground pools:]

[FOR UNSTABILIZED POOLS: [Add 0.7 oz [(1 tablespoons (Tbsp))] [(# bag[s])] of this product per 1,000 gallons of pool water daily or as often as needed to maintain the free available chlorine residual at 1 – 4 ppm. FOR STABILIZED POOLS: Add 0.4 oz [(2 1/2 teaspoons (tsp))] [(# bag[s])] per 1,000 gallons every other day or as often as needed to maintain the free available chlorine residual at 1-4 ppm.]

[For pools 10,000 gallons and larger: {version 1}]

[FOR UNSTABILIZED POOLS: Add 7 oz [(# bag[s])] of this product per 10,000 gallons of pool water daily or as often as needed to maintain the free available chlorine residual at 1 – 4 ppm.

FOR STABILIZED POOLS: Add 4 oz [(# bag[s])] per 10,000 gallons every other day or as often as needed to maintain the free available chlorine residual at 1-4 ppm.]

{charts are optional in whole or part based upon gallons for treatment}

[Use the following dosage recommendations based upon pool size.

Pool size, gallons	Dosage for unstabilized pools	Dosage for stabilized pools
500	0.35 oz [(1/2 Tbsp)] [(# bag[s])]	0.20 oz [(1 1/4 tsp)] [(# bag[s])]
1,000	0.7 oz [(1 Tbsp)] [(# bag[s])]	0.4 oz [(2 1/2 tsp)] [(# bag[s])]
2,500	1.75 oz [(2 Tbsp)] [(# bag[s])]	1 oz [(2 Tbsp)] [(# bag[s])]
5,000	3.5 oz [(# bag[s])]	2 oz [(# bag[s])]
7,500	5.25 oz [(# bag[s])]	3 oz [(# bag[s])]
10,000	7 oz [(# bag[s])]	4 oz [(# bag[s])]
15,000	10.5 oz [(# bag[s])]	6 oz [(# bag[s])]
20,000	14 oz [(# bag[s])]	8 oz [(# bag[s])]
30,000	21 oz [(# bag[s])]	12 oz [(# bag[s])]

]

{or}

¹ Single use bag sizes may vary from 1 oz to 32 oz. The value for # will be calculated using the following formula:

= dosage (oz) / bag size (oz)

For instance, if a 1 oz bag is used, the 2 oz dosage will say “2 oz (2 bags)”. No partial bag dosages (e.g. 1 ½ bags) will be listed.}

² The word “bag[s]” may be substituted with other single use packing such as “pouch[es]”, “pod[s]”, or “pack[s]”.

[For pools 10,000 gallons and larger: {version 2}]

[Use the following dosage recommendations based upon pool size:

Pool size, gallons	Dosage for unstabilized pools	Dosage for stabilized pools
10,000	7 oz	4 oz
15,000	10.5 oz	6 oz
20,000	14 oz	8 oz
30,000	21 oz	12 oz
	Add daily or as often as needed to maintain a free available chlorine residual of 1 – 4 ppm	Add every other day or as often as needed to maintain a free available chlorine residual of 1 – 4 ppm

]

{Shock Directions}

SHOCK TREATMENT / SUPERCHLORINATION:

[As a preventative treatment, shock treat your pool once per week [with [brand] shock treatment]. Additional shock treatments may be necessary to remedy problems which may occur when bathing loads are high, water appears hazy or dull, unpleasant odors or eye irritation occur, after heavy wind and rainstorms, or if algae does develop with resulting green color and slimy feeling.]

[For [Wading Pools], [Splasher Pools] [and] [Kiddie Pools]:]

[Every 7 days, or as necessary to prevent pool problems, shock treat / superchlorinate the pool by adding 0.27 oz [(1 1/2 teaspoons (tsp))] [(#³ bag[s]⁴)] of this product per 200 gallons of water.]

[For small pools less than 5,000 gallons:] [For pop-up pools:]

[Every 7 days, or as necessary to prevent pool problems, shock treat / superchlorinate the pool by adding 0.7 oz [1 tablespoon (Tbsp)] [(# bag[s])] of this product per 500 gallons of water.]

[For pools up to 10,000 gallons:] [For pop-up, above ground and/or inground pools:]

[Every 7 days, or as necessary to prevent pool problems, shock treat / superchlorinate the pool by adding 1.3 oz [(# bag[s])] of this product per 1,000 gallons of water.]

[For pools 10,000 gallons and larger:] [For above ground and/or inground pools:]

[Every 7 days, or as necessary to prevent pool problems, shock treat / superchlorinate the pool by adding [1 pound] [(# bag[s])] of this product per 12,500 gallons of water.]

³ Single use bag sizes may vary from 1 oz to 32 oz. The value for # will be calculated using the following formula:

= dosage (oz) / bag size (oz)

For instance, if a 1 oz bag is used, the 2 oz dosage will say "2 oz (2 bags)". No partial bag dosages (e.g. 1 1/2 bags) will be listed.

⁴ The word "bag[s]" may be substituted with other single use packing such as "pouch[es]", "pod[s]", or "pack[s]".

{Chart may be used in whole or part based upon gallons for treatment. Single use bag sizes may vary from 1 oz to 32 oz. In the table below, the value for # will be calculated using the following formula:

= dosage (oz) / bag size (oz)

For instance, if a 1 oz bag is used, the 2 oz dosage will say "2 oz (2 bags)". No partial bag dosages (e.g. 1 ½ bags) will be listed.}

[Use the following dosage recommendations based upon pool size.

Pool size, gallons	Dosage[, ounces]
500	0.7 oz [(# bag[s])]
1,000	1.3 oz [(# bag[s])]
2,000	2.7 oz [(# bag[s])]
2,500	3.3 oz [(# bag[s])]
3,000	4.0 oz [(# bag[s])]
4,000	5.3 oz [(# bag[s])]
5,000	6.7 oz [(# bag[s])]
6,000	8.0 oz [(# bag[s])]
7,000	9.3 oz [(# bag[s])]
7,500	10 oz [(# bag[s])]
8,000	10.7 oz [(# bag[s])]
9,000	12 oz [(# bag[s])]
10,000	13.3 oz [(# bag[s])]
12,500	16.7 oz [(# bag[s])]
15,000	20 oz [(# bag[s])]
17,500	23.3 oz [(# bag[s])]
20,000	26.7 oz [(# bag[s])]
30,000	40 oz [(# bag[s])]

]

[ALGAE CONTROL: Add a shock dosage of this product as close as possible to any algae on the sides or bottom of the pool. If necessary, repeat the treatment. To optimize treatment and prevent possible staining or bleaching, immediately after treatment, thoroughly clean pool by brushing surface of algae growth and disperse any granules on the bottom of the pool.]

[For preventative algae control: Add a shock dosage weekly. [However, if problems persist use your preferred [brand] algaecide product regularly. Follow label directions on [the algaecide] {or} [that product].]

[WINTERIZING:

Gradually add 1 lb. [(# bag[s])] of this product per 7,000 gallons of pool water that is clear and clean. Run the filter pump until granules are completely dissolved. Cover the pool with a pool cover. Prepare the heater, pump and filter components for winterizing by following manufacturer's directions.]

{2-Part Shock System Directions}

[[Green to Blue or other brand name] Shock System: If you are experiencing a severe algae bloom, which has turned your pool green, the [brand] Shock System can turn your pool sparkling blue again. This two-part system kills bacteria and algae that has invaded your pool and then makes it easy to vacuum out.

At the start of the season, or if a severe algae bloom occurs during the season, the pool can be treated and returned to its clear blue appearance within 24 hours by using [brand I and II] as part of the [brand] System.

1. Add [1.3 lbs of [brand I or this product] per 5,000 gallons OR 2.6 lbs of [brand I or this product] per 10,000 gallons] of pool water. If any granules settle to the bottom of the pool, use brush to disperse to assist in helping it to dissolve.
2. Once [brand I or this product] has completely been dispersed in the pool water, change valve to recirculate position and add [.65 lbs of [brand II] flocculent per 5,000 gallons OR 1.3 lbs of [brand II] flocculent per 10,000 gallons] of pool water through the skimmer.
3. Leave the system circulating for 1 hour then turn off the filter pump and allow to settle overnight.
4. The following day, change valve to vacuum position and vacuum the sediment to waste.
5. If the pool has not settled out or is not blue in color, repeat steps 1, 3 and 4.
6. Return valve to filter position after pool has been vacuumed.]

{Use 2}[Spa & Hot Tubs]

{Mass Channel}

{Sanitizer}

[WHY YOU SHOULD USE THIS PRODUCT:]

[This is an effective, [4-in-1][multi-purpose] [sanitizer] product that works fast to [kill bacteria and algae] [and] restore crystal clarity to spa water within 24 hours],[and] [reduce chlorine odor]. [It is convenient, easy to use, and won't over-stabilize your spa.]]

{Shock}

[WHY YOU SHOULD USE THIS PRODUCT:]

[This is an effective, [4-in-1] [shock] product that [kills bacteria and algae] [and] restores crystal clarity to spa water within 24 hours],[and] [reduces chlorine odor]. [It is convenient, easy to use, and won't over-stabilize your spa.]

[For crystal clear spa water, follow our [Brand] 3-Step Program: Step 1: Balance, Step 2: Sanitize, and Step 3: Shock.]

{Dealer Channel}

[WHY YOU SHOULD USE THIS PRODUCT:]

[This is [a convenient, easy-to-use] [an effective], [4-in-1][multi-purpose] [sanitizer] product that works fast to [kill bacteria and algae] [and] [clarify] [restore] [crystal] [clarity to] spa water [within 24 hours],[and] [reduce chlorine odor].]

HOW TO USE: [Do not pre-mix this product before adding it to your spa. Only add this product directly to your spa.] [Use only a clean, dry [scoop] [lid] to measure this product. Do not use the [scoop] [lid] for any other purpose.]

Add the recommended dosage of this product while the filter pump is running. Scatter the product over the surface of the water. If any granules settle to the bottom of the spa, use brush to disperse.

Test free available chlorine residual with a spa test kit. Do not enter spa until the free available chlorine residual is 3-5 ppm. **Re-entry Into treated spas is prohibited above levels of 5 ppm for risk of bodily injury.**

[WATER BALANCE:]

[For best product performance, comfort, and [crystal] [clear] [clean] water: Maintain total alkalinity in the range of 60 to 100 parts per million (ppm). Maintain pH in the range of 7.2 to 7.8. Maintain calcium hardness above 200 ppm. Always check and adjust total alkalinity before adjusting pH levels.] [Use a test kit that measures all these ranges.] Use [brand] Spa Care Products to make adjustments. Follow label directions for each product and allow each product to dissolve and disperse before adding additional products to the spa.]

{Mass Channel}

[[Download the [FREE] [Test to Swim™] [application name] app from your smartphone] [for expert water analysis, product recommendations, and dosage instructions].]

[Visit a Test to Swim™ Station [device/station name], at participating retailers, for expert water analysis, product recommendations and dosage instructions. [To find a participating retailer near you, visit www.hthpools.com/XXX].]

[Use a Test to Swim™ Station [device/station name] (at participating retailers) or download the Test to Swim™ [application name] app from your smartphone] [for expert water analysis, product recommendations, and dosage instructions].]

{Dealer Channel}

[Take a spa water sample to your [brand] dealer frequently to test for water balance.] Maintain free available chlorine between 3 – 5 ppm.]

{or}

[WATER BALANCE: For best product performance, comfort and crystal clear water, use [brand] spa care products to maintain the following water balance:

Acceptable Range for Balance	
Total Alkalinity	60-100 ppm
pH	7.2-7.6
Calcium Hardness	Above 200 ppm
Available Chlorine	3 - 5 ppm

Note: Follow label directions for each product and allow each product to dissolve and disperse before adding additional products to the spa. Always check and adjust total alkalinity before adjusting pH levels. [Use a test kit [or test strips] that measure[s] all these ranges.]

[OPENING YOUR SPA [OR HOT TUB][Freshly Filled]]: Add 0.6 oz [(1 1/4 tablespoons (Tbsp))][[#⁵ bag[s]⁶]] of this product for each 500 gallons of water. Repeat dosage as needed until the free available chlorine residual is 3-5 ppm.

[ROUTINE CHLORINATION: Add 0.6 oz [(1 1/4Tbsp)] [(# bag[s])] of this product per 500 gallons of water, daily or as often as needed to maintain the free available chlorine residual at 3-5 ppm.]

[[SHOCK TREATMENT][/] [SUPERCHLORINATION]: After each use, shock treat with 1.8 oz [(3 1/2 Tbsp)] [(# bag[s])] of this product per 500 gallons of water, to control odors and algae. Repeat as needed. [Water soluble, non-filterable wastes can accumulate in spa or hot tub water and cause dull or cloudy water and can stimulate algal growth.] [Superchlorination] [Shock treatment] must be done on a regular basis to remove these wastes and maintain clear sparkling water.]

[FOR PREVENTATIVE ALGAE CONTROL: Add a shock dosage weekly. However, if problems persist use your preferred [brand] [spa] algaecide product regularly. Follow label directions on that product.]

[EXTENDED NON-USE PERIOD: During extended non-use periods when the unit is not being used add 1.8 oz [(3 1/2 Tbsp)] [(# bag[s])] of this product per 500 gallons twice a week with the circulation system running or as needed to maintain 3-5 ppm free available chlorine.]

[It is recommended that spas and hot tubs be drained every 30-90 days, more often under heavy use. Consult manufacturer's recommendations concerning the compatibility of chlorine sanitizers with their equipment. Some oils, lotions, fragrances, cleansers, or other contaminants may cause foaming or cloudy water and may react with chlorine sanitizers to reduce their efficacy.]

⁵ Single use bag sizes may vary from 1 oz to 32 oz. The value for # will be calculated using the following formula:

$$\# = \text{dosage (oz)} / \text{bag size (oz)}$$

For instance, if a 1 oz bag is used, the 2 oz dosage will say "2 oz (2 bags)". No partial bag dosages (e.g. 1 1/2 bags) will be listed.}

⁶ The word "bag[s]" may be substituted with other single use packing such as "pouch[es]", "pod[s]", or "pack[s]".

{Use 3}[Industrial]

[SEWAGE & WASTEWATER EFFLUENT TREATMENT: The disinfection of sewage effluent must be evaluated by determining the total number of coliform bacteria and/or fecal coliform bacteria, as determined by the Most Probable Number (MPN) procedure, of the chlorinated effluent has been reduced to or below the maximum permitted by the controlling regulatory jurisdiction. On the average, satisfactory disinfection of secondary wastewater effluent can be obtained when the chlorine residual is 0.5 ppm after 15 minutes contact. Although the chlorine residual is the critical factor in disinfection, the importance of correlating chlorine residual with bacterial kill must be emphasized. The MPN of the effluent, which is directly related to the water quality standards requirements, is the final and primary standard and the chlorine residual should be considered an operating standard valid only to the extent verified by the coliform quality of the effluent. The following are critical factors affecting wastewater disinfection. 1. Mixing: It is imperative that the product and the waste water be instantaneously and completely flash mixed to assure reaction with every chemically active soluble and particulate component of the waste water. 2. Contacting: Upon flash mixing, the flow through the system must be maintained. 3. Dosage/Residual Control: Successful disinfection is extremely dependent on response to fluctuating chlorine demand to maintain a predetermined, desirable chlorine level. Secondary effluent should contain 0.2 to 1.0 ppm chlorine residual after a 15 to 30 minute contact time. A reasonable average of residual chlorine is 0.5 ppm after 15 minutes contact time.]

[EFFLUENT SLIME CONTROL: Apply a 100 to 1000 ppm available chlorine solution at a location which will allow complete mixing. Prepare this solution by mixing 2.5 to 25 oz. of this product with 100 gallons of water. Once control is evident, apply a 15 ppm available chlorine solution. Prepare this solution by mixing 0.38 oz. of this product with 100 gallons of water.]

STORAGE & DISPOSAL:

{Nonrefillable container - household/residential use}

[Keep this product dry in its tightly closed container when not in use. Store in a cool, dry, well-ventilated area. Keep away from heat or open flame. Nonrefillable container. Do not reuse or refill this container. Rinse empty container thoroughly with water to dissolve all material prior to disposal. Offer for recycling if available. Do not contaminate food or feed by storage or disposal or cleaning of equipment. FOR DISPOSAL OF A CONTAMINATED OR DECOMPOSING PRODUCT SEE EMERGENCY HANDLING.]

{Nonrefillable container – single-use, non-resealable package}

[Keep this product dry in its tightly closed container. Store in a cool, dry, well-ventilated area. Keep away from heat or open flame. Nonrefillable container. Do not reuse or refill this container. Rinse and discard empty container thoroughly with water to dissolve all material prior to disposal. Offer for recycling if available. Do not contaminate food or feed by storage or disposal or cleaning of equipment. FOR DISPOSAL OF A CONTAMINATED OR DECOMPOSING PRODUCT SEE EMERGENCY HANDLING.]

{Refillable container – household/residential use}

[Keep this product dry in its tightly closed container when not in use. Store in a cool, dry, well-ventilated area. Keep away from heat or open flame. Do not contaminate food or feed by storage or disposal or cleaning of equipment. FOR DISPOSAL OF A CONTAMINATED OR DECOMPOSING PRODUCT SEE EMERGENCY HANDLING. Refillable container. Refill this container with calcium hypochlorite only. Do not use this container for any other purpose. Rinse empty container thoroughly with water to dissolve all material prior to disposal.]

{Nonrefillable container - non-household/residential use}

[Keep this product dry in its tightly closed container when not in use. Store in a cool, dry, well-ventilated area. Keep away from heat or open flame. Bacteria [destroying][killing]
Begins working [fast] to destroy bacteria
Destroys bacteria
Destroys organic contaminants
[Eliminates]Kills] bacteria

{Claims specific to the 2-Part Shock System Directions}

Drops particles to bottom of pool
In 24 hours your pool will once again be blue
Makes particles easy to vacuum to waste
Remedy
Removes phosphates *{This statement refers to another product that is included in the [Green to Blue or other brand] System package}*
Simply use shock system to rid your pool of murky water
This package contains 1 treatment for 10,000 gallons
This package contains 2 treatments for 5,000 gallons
Transform your green water to a clear, sparkling sea of blue
Transforms water from green to blue [in 24 hours]

{Clarifier}

Cal Hypo for visibly [brilliant][sparkling] water
Clears cloudy water
[Creates][Produces] sparkling, crystal clear water
Crystal clear results in 24 hours
Delivers sparkling [pool] [spa] water
Keeps [pool] [spa] water clean [and][&] crystal clear
Maintains brilliantly clear water
Restore[s] crystal clarity to water

{Compatibility with salt pools}

Compatible with salt [water] [systems] [pools]

Salt [water] [system] [pool] compatible

[Works in][Designed for] [chlorine [and][&]] salt pools
Works with saltwater [systems] [pools]

{Contamination language}

Contamination or improper use may cause fire, explosion or the release of toxic gases. Do not allow product to contact any foreign matter, including other water treatment products. If product is exposed to small amounts of water, it can react violently to produce heat and toxic gases and spatter. Do not add water to this product. Only add this product directly to your [swimming pool][,][[or] spa][or skimmer].

{Ease of Use}

Convenient
Easy to use
Easy, economical, convenient to use
Economical
Reduced maintenance formulation

{Eye Irritation}

Reduces eye irritation caused by swimming pool water

{Fast Acting}

[Fast] [acting] [dissolving]
Fast-acting - shock to swim in 15 mins
Fast-acting - swim ready in 15 mins
Fast acting [and][&] fast dissolving

{Pool Measurement}

HOW TO CALCULATE POOL CAPACITY IN U.S. GALLONS	
POOL SHAPE	FORMULA (Dimensions in feet)
Rectangular:	$L \times W \times AD \times 7.5 = \text{total gallons}$
Round:	$Di \times Di \times AD \times 5.9 = \text{total gallons}$
Oval:	$\text{Maximum L} \times \text{maximum W} \times AD \times 5.9 = \text{total gallons}$
Freeform:	$\text{Surface area (sq. feet)} \times AD \times 7.5 = \text{total gallons}$

L = Length, W = Width, AD = Average Depth, Di = Diameter

{or}

To calculate your pool's capacity, visit hthpools.com/XXXX.

{Pool Type}

[Best used with] [Ideal for] [For] pop-up pools

[For use][Ideal] [with] [for] all pool [surfaces][types]
Ideal for [vinyl-lined pools] {or} [pools with vinyl liners] when used as directed
[For use] [Ideal] [with] [for] all pool types [including vinyl-liner pools]
Ideal for [in ground] [and][&] [above ground] [pools] [with a skimmer]
Good for all pool surfaces
Special pop-up pool size
Suitable for all pools

{Shock}

[Cal Hypo] Shock [Treatment]

Dry, free-flowing form
Effective shock [and][&]] oxidizer
For weekly use
Increases chlorine levels quickly
Multi-functional shock treatment
Oxidizer
Shock
Shock Treatment [[and][&]] [Superchlorinator] for [Swimming Pools] [and][&]] [Spa[s]]

{Single Dose Packaging - Shock}

1 bag [pouch] [pod] [pack] [delivers] [treats] [5 ppm of chlorine] [in] [12,500 gallons]

1 lb. [delivers] [treats] [5 ppm of chlorine] [in] [12,500 gallons]

1 [bag] [pouch] [pod] [pack] [treats] [X gallons]

Cut and pour {not applicable to pods}

Easy dosing[, pre-measured sachet]

Pre-measured[, easy [dose][dosing]] [sachet]

Single use bag sizes may vary from 1 oz to 32 oz. The number of gallons treated (X) is calculated using the following formula:

X gallons treated = bag size in ounces x 12,500/16

So a 16 oz. bag would treat 16 x 10,000/16 = 12,500 gallons

And an 8 oz. bag would treat 8 x 10,000/16 = 6,250 gallons

{Spa Type}

Ideal for spa use

{Stabilization}

Cal Hypo [formula] prevents chlorine lock

Cal Hypo No Chlorine Lock

[CYA] [Cyanuric acid][]-free

Does not contain [CYA] [cyanuric acid]

No Cyanuric Acid (CYA), no risk of Chlorine Lock

No Cyanuric Acid (CYA), prevents Chlorine Lock

No Cyanuric Acid (CYA), avoids Chlorine Lock

No CYA stabilizer, no Chlorine Lock

[No risk of][Prevents][Will not cause] [chlorine lock][over stabilization]
