

U.S. ENVIRONMENTAL PROTECTION AGENCY
 Office of Pesticide Programs
 Antimicrobials Division (7510P)
 1200 Pennsylvania Ave., N.W.
 Washington, D.C. 20460

1258-1369

Date of Issuance:
 4/25/16

NOTICE OF PESTICIDE:

Registration
 Reregistration
 (under FIFRA, as amended)

Term of Issuance:
 Conditional

Name of Pesticide Product:
 hth Floater

Name and Address of Registrant (include ZIP Code):

Joanna Holcombe
 Arch Chemicals, Inc.
 1200 Bluegrass Lakes Parkway
 Alpharetta, GA 30004

Note: Changes in labeling differing in substance from that accepted in connection with this registration must be submitted to and accepted by the Antimicrobials Division prior to use of the label in commerce. In any correspondence on this product always refer to the above EPA registration number.

On the basis of information furnished by the registrant, the above named pesticide is hereby registered under the Federal Insecticide, Fungicide and Rodenticide Act.

Registration is in no way to be construed as an endorsement or recommendation of this product by the Agency. In order to protect health and the environment, the Administrator, on his motion, may at any time suspend or cancel the registration of a pesticide in accordance with the Act. The acceptance of any name in connection with the registration of a product under this Act is not to be construed as giving the registrant a right to exclusive use of the name or to its use if it has been covered by others.

This product is conditionally registered in accordance with FIFRA section 3(c)(7)(A). You must comply with the following conditions:

1. Submit and/or cite all data required for registration/reregistration/registration review of your product under FIFRA when the Agency requires all registrants of similar products to submit such data.

Signature of Approving Official:

Demson Fuller, Product Manager 32
 Regulatory Management Branch II
 Antimicrobials Division (7510P)

Date:

4/25/16

2. Be aware that proposed data requirements have been identified in a Final Work Plan for Chlorinated Isocyanurates. For more information on these proposed data requirements, you may contact the Reevaluation Team Leader (Team 36): <http://www2.epa.gov/pesticide-contacts/contacts-office-pesticide-programs-antimicrobial-division>
3. The data requirements for storage stability and corrosion characteristics (Guidelines 830.6317 and 830.6320) are not satisfied. A one year study is required to satisfy these data requirements. You have 18 months from the date of registration to provide these data.
4. Make the following label changes before you release the product for shipment:
 - Revise the EPA Registration Number to read, “EPA Reg. No. 1258-1369.”
5. Submit one copy of the final printed label for the record before you release the product for shipment.

Should you wish to add/retain a reference to the company’s website on your label, then please be aware that the website becomes labeling under the Federal Insecticide Fungicide and Rodenticide Act and is subject to review by the Agency. If the website is false or misleading, the product would be misbranded and unlawful to sell or distribute under FIFRA section 12(a)(1)(E). 40 CFR 156.10(a)(5) list examples of statements EPA may consider false or misleading. In addition, regardless of whether a website is referenced on your product’s label, claims made on the website may not substantially differ from those claims approved through the registration process. Therefore, should the Agency find or if it is brought to our attention that a website contains false or misleading statements or claims substantially differing from the EPA approved registration, the website will be referred to the EPA’s Office of Enforcement and Compliance.

If you fail to satisfy these data requirements, EPA will consider appropriate regulatory action including, among other things, cancellation under FIFRA section 6(e). Your release for shipment of the product constitutes acceptance of these conditions. A stamped copy of the label is enclosed for your records. Please also note that the record for this product currently contains the following CSFs:

- Basic CSF dated 03/28/2016

If you have any questions, please contact Wanda Henson by phone at (703) 308-6345, or via email at henson.wanda@epa.gov

Sincerely,

Demson Fuller, Product Manager 32

hth Floater

Active Ingredient: Trichloro-s-Triazinetrione99%
Other Ingredients:..... 1%
Total:..... 100%

[Available Chlorine90%]

KEEP OUT OF REACH OF CHILDREN
[MANTÉNGASE FUERA DEL ALCANCE DE LOS NIÑOS]

DANGER [/][PELIGRO]

Contamination or improper use may cause fire or explosion or the release of toxic gases. Do not allow contents of floater to contact any foreign matter, including other water treatment products. If contents of floater are exposed to small amounts of water, it can react to cause explosion or the release of toxic gases. Do not remove floater or other dispensing device from water **for more than five minutes** if it contains a tablet or tablet residue. Contents of floater are corrosive. Contents of floater cause irreversible eye damage and skin burns. Contents of floater may be fatal if inhaled or absorbed through skin. Harmful if swallowed.

Read all precautionary and first aid statements before use.

{Note to reviewer: Although this product has a "Danger" signal word, as per the EPA label review manual "The Agency may permit reasonable variations in the placement of the First Aid statement as long as the reference statement, "See First Aid (or Statement of Practical Treatment) on (identify appropriate panel)" appears on the front panel." If the First Aid Statements are placed on the front panel of the final graphic label, the statement below will only reference precautionary statements:}

Read all precautionary [and first aid] statements [on [left] [right] [back] [side] panel] before use.

PRECAUTIONARY STATEMENTS

HAZARDS TO HUMANS AND DOMESTIC ANIMALS

DANGER: Corrosive. Causes irreversible eye damage and skin burns. May be fatal if inhaled or absorbed through the skin. Harmful if swallowed. Irritating to nose and throat.

- Open in a well-ventilated area. Do not breathe dust or fumes.
- Do not get in eyes, on skin, or on clothing.
- Wear goggles and rubber gloves when handling this product. For additional protection of skin, wear long sleeves and long pants.
- Wash thoroughly with soap and water after handling and before eating, drinking, or using tobacco.
- Remove and wash contaminated clothing before reuse.

FIRST AID

IF IN EYES: Hold eye open and rinse slowly and gently with water for 15-20 minutes. Remove contact lenses, if present, after the first 5 minutes, then continue rinsing eye. Call a poison control center or doctor for treatment advice.

IF ON SKIN OR CLOTHING: Take off contaminated clothing. Rinse skin immediately with plenty of water for 15-20 minutes. Call a poison control center or doctor for treatment advice.

IF SWALLOWED: Call a poison control center or doctor immediately for treatment advice. Have person sip a glass of water if able to swallow. Do not induce vomiting unless told to do so by a poison control center or doctor. Do not give anything by mouth to an unconscious person.

IF INHALED: Move person to fresh air. If person is not breathing, call 911 or an ambulance, then give artificial respiration, preferably mouth-to-mouth if possible. Call a poison control center or doctor for further treatment advice.

Have the product container or label with you when calling a poison control center or doctor, or going for treatment.

NOTE TO PHYSICIAN: Probable mucosal damage may contraindicate the use of gastric lavage.

IN CASE OF EMERGENCY CALL: 1-800-654-6911

PHYSICAL and CHEMICAL HAZARDS:

If contents of floater are exposed to small amounts of water, contents can react to cause explosion or the release of toxic gases. Do not add water to this floater. Add floater to pool water only.

- Do not allow contents of floater to become wet or damp before use.
- Do not remove floater from water **for more than five minutes** if it contains a tablet or tablet residue. Contents of floater can react with other materials, including other water treatment products, to cause fire, explosion, and the release of toxic gases.

- Keep all foreign matter, including other water treatment products, away from contents of floater.
- Do not allow this product to contact other water treatment products.

Strong oxidizing agent. This product can increase fire intensity.

- Keep away from heat and from flame and burning material (like a lighted cigarette).

ENVIRONMENTAL HAZARDS: This pesticide is toxic to fish and aquatic organisms.

STORAGE & DISPOSAL:

[Keep contents of floater dry before use. Store in a cool, dry, well-ventilated area. Keep away from heat or open flame. Nonrefillable floater. Do not reuse or refill this floater. Once contents of floater are exhausted lift floater to allow residual water to drain into to the pool prior to disposal. Offer for recycling if available. Do not contaminate food or feed by storage or disposal or cleaning of equipment. FOR DISPOSAL OF A CONTAMINATED OR DECOMPOSING PRODUCT SEE EMERGENCY HANDLING.]

EMERGENCY HANDLING: In case of contamination or decomposition – Immediately remove floater to an open and well-ventilated outdoor area by itself. Flood with large amounts of water. Dispose of the floater and any remaining contaminated material in an approved landfill area.

*{If the following Spanish statement is used, it must appear directly above DIRECTIONS FOR USE.}
 Si usted no entiende la etiqueta, busque a alguien para que se la explique a usted en detalle. (If you do not understand the label, find someone to explain it to you in detail.)*

DIRECTIONS FOR USE:

It is a violation of Federal law to use this product in a manner inconsistent with its labeling.

READ ALL PRECAUTIONARY STATEMENTS BEFORE USE.

[WHY YOU SHOULD USE THIS PRODUCT:]

[The][product name][This product][This floater] makes pool treatment convenient and easy for the on-the-go pool owner. When used as directed, [the][product name][this product][this floater] provides enough sanitizer to last up to four weeks.

[[The][product name][This product][This floater] treats up to 20,000 gallons for up to 4 weeks.]

{Optional statement for pool care program for the [Brand A]}

[For crystal clear pool water, follow our [Brand A] 4 step pool care program: Step 1: Test and adjust pool water balance, Step 2: Sanitize, Step 3: Shock treat your pool at least once a week, and Step 4: Add algaecide regularly].

{Optional statement for pool care program with the [Brand B]}

[For crystal clear pool water, follow our [Brand B] Step Program: Step 1: Test and balance pool water, Step 2: Sanitize, and Step 3: Shock at least once a week.]

{Optional statement for pool care program for the [Brand C]}

[Take a pool water sample to your [authorized] [Brand C] retailer for a detailed water analysis.]

[METHOD OF APPLICATION:][HOW TO USE:]

[The][product name][This product][This floater] is a single-use chlorine dispenser that treats up to 20,000 gallons of water for up to 4 weeks. It sanitizes, prevents algae and stabilizes pool water. **Do not allow contents of floater to get damp or wet before use. Do not allow contents of floater to contact other water treatment products.**

[Simply:]

- [Tear perforated edge.] [Tear Here][Remove the plastic sleeve by tearing along the perforated edge.]**Keep the label for future reference.**
- [Twist dial to medium setting.][Twist the base dial to the medium setting and adjust up or down, based on chlorine level [needed].]
- [Place [the floater] in your pool.] [[The][product name] [This product] dispenses the chlorine needed to keep your pool clear and blue.]
- [Shock your pool.] [Next, shock pool immediately with [brand] shock product and weekly thereafter while the floater is in use.]
- [Adjust dial up or down, depending on chlorine level [needed].][You may adjust the opening at the bottom of your floater depending on the chlorine reading in the pool. For optimum performance, dial down the floater one [setting][position][opening] if testing indicates a chlorine level above 4 ppm or dial up the floater one [setting][position][opening] if testing indicates a chlorine level drops below 1 ppm.]

{OR}

For Optimum Performance	
If chlorine level is > 4	Twist dial down one [setting][position][opening]
If chlorine level is < 1	Twist dial up one [setting][position][click][opening]

]

- [Replace floater when it has tipped onto its side.][(Floater will tip gradually as it empties.)][Do not discard floater until it is completely empty.]

- Regular water testing is recommended to insure proper chlorine levels are maintained

NOTE: Do not remove from pool until floater it is completely empty and residual water drains into the pool. [Shake floater gently to insure [contents of floater][all tablets] have completely dissolved. Do not refill. This is a single-use floater.

A shock treatment will be needed each week while the floater is in use. See “SHOCK TREATMENT/SUPERCHLORINATION” section.

[WATER BALANCE:

[Adjust and maintain total alkalinity from 80 to 120 parts per million (ppm), pH from 7.2 to 7.6, and calcium hardness above 200 ppm. [Always check and adjust total alkalinity before adjusting pH levels.] Test frequently using [a brand] [test kit] [or] [test strips] that measure[s] all of the above ranges. [Follow label directions and adjust with appropriate product.]]

[[Download the [FREE] [Test to Swim™] [application name] app from your smartphone] [for expert water analysis, product recommendations, and dosage instructions].]

[Visit a Test to Swim™ Station, at participating retailers, for expert water analysis, product recommendations and dosage instructions. [To find a participating retailer near you, visit www.hthpools.com/XXX].]

[Use a Test to Swim™ Station (at participating retailers) or download the Test to Swim™ [application name] app from your smartphone] [for expert water analysis, product recommendations, and dosage instructions].]

{or}

[Adjust and maintain pool water to recommended ranges:

Acceptable Range for Balance	
Total Alkalinity	80-120 ppm
pH	7.2-7.6
Calcium Hardness	Above 200 ppm
Available Chlorine	1-4 ppm
Cyanuric Acid	20-50 ppm

NOTE: Always check and adjust total alkalinity before adjusting pH levels. High cyanuric acid levels (100 ppm and above) may result in insufficient free chlorine and harmful bacteria in your pool water.]]

[OPENING YOUR POOL:

[[Balance pool water per levels in WATER BALANCE section. Shock treat with a [brand] shock product and stabilize your pool using [brand] stabilizer. Follow label directions for each of these products.]

{or}

[Balance pool water, shock treat, and stabilize your pool using [brand] Stabilizer, following label directions.]]

[Pools that exceed 20,000 Gallons may require the use of [multiple floaters][more than one floater]]

[SHOCK TREATMENT/SUPERCHLORINATION:

As a preventative treatment, shock treat your pool once per week [with [brand] shock treatment]. Additional shock treatments may be necessary to remedy problems which may occur when bathing loads are high, water appears hazy or dull, unpleasant odors or eye irritation occur, after heavy wind and rainstorms, or if algae does develop with resulting green color and slimy feeling.]

Test free available chlorine residual with [a][brand] pool test [kit] [strips]. Do not enter pool until the free available chlorine residual is 1- 4 ppm. **Re-entry into treated swimming pool is prohibited at available chlorine levels above 4 ppm due to risk of bodily harm.**

[We recommend using [hth® time to shock? test strips] [Brand test strips] to determine if additional shock treatments are necessary, outside of the recommended weekly treatments.]

[FOR POOLS WITH VISIBLE ALGAE:

If your pool has visible algae, a separate algae treatment may be necessary. Use a[n] [brand] algaecide per label directions to rid your pool of visible algae.]
