

[1266-72]

DESCRIPTION:

Malter's BYE BYE BUG is a non-residual, non-staining contact insecticide and deodorant, especially developed with Pyrethrins and a synergist in a highly refined mineral oil base and special essential oils. It is designed for use in compressed air sprayers, fog generators or other power sprayers. BYE BYE BUG, when used as directed, is recommended for use in offices, bakeries, cafeterias, restaurants, grocers, grain mills, bottling plants and breweries.

CAUTION:

Contains petroleum distillates. Flammable. Do not spray near or toward an open flame. Avoid contamination of foodstuffs. Harmful if swallowed. Cover or remove aquaria before using. Do not spray animal pets or humans.

NOTICE:

Keep from freezing. If this product is stored in cold or freezing weather it may separate or thicken. This will not harm the performance. Before using, allow to warm to room temperature and stir thoroughly.

DIRECTIONS:

For most effective results against the active pests of flying, running and crawling insects listed below, use in a good sprayer adjusted to deliver a fine mist. Shut off ventilating system and air conditioning units before spraying. Cover food, food products, utensils, etc. to prevent contamination from falling insects. Treat infested areas thoroughly and whenever possible, keep doors and windows closed for 10 minutes after spraying. Then sweep up and dispose of fallen insects. Spray as often as necessary to control these insects.

DIRECTIONS (continued)

Application should be sufficient to fill the enclosure with fog, mist or vapor. When using in food processing areas, use only when the plant is not in operation.

FLYING INSECTS: For control of flies, mosquitoes, gnats, wasps, hornets and sand flies, direct the spray towards the upper portion of the room and saturate the atmosphere with the mist using 2 ounces to each 3000 cubic feet of space.

Rapidity of initial kill may be accelerated by increasing dosage, however, not more than 1 gallon should be atomized in each 30,000 cubic feet.

CRAWLING INSECTS: To control roaches, ants, silverfish, crickets, spiders, spray infested areas thoroughly and direct the liquid behind baseboards, moldings, cabinets, shelves, sinks, door and window frames and pipes, toward drains and dark corners and into cracks and similar hiding places. Treat ant trails and areas where pests enter premises. Repeat treatment when necessary.

For home and institutional pantries and food storage infested with Flour beetles, Weevils, Caddis, Grain Beetles, Meal Worms, Spider Beetles, Meal Moths, Skippers, Grain and Cheese Mites, Spray thoroughly all infested surfaces of shelves, bins, cupboards, cabinets, pantries, lockers, and similar storages with particular attention to cracks and other hiding places. Spray exposed stages of these pests and repeat treatment as needed to prevent infestations. Dispose of all infested products.
