WITT-O-LAST

12/1/46

ACTIVE INGREDIENTS:

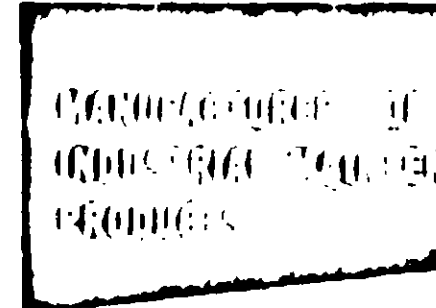

3,5-dibromo-4'-tert-butylmethyl salicylamide 0.04%

INERT INGREDIENTS:

99.96%

DE WITT

WITT-O-LAST

Control No.

WASHABLE SELF-POLISHING FLOOR FINISH

Contains a new industrial bacteriostat which fights bacteria and inhibits their growth.

Based on a new revolutionary plastic polymer that results in an alkali and detergent resistant finish. This valuable property of WITT-O-LAST allows a floor protected by WITT-O-LAST to actually be scrubbed with a floor machine and a strong detergent solution when it becomes soiled and scuffed, without removing any of the finish. This excellent feature allows the floor to be revitalized without the costly and laborious process of completely stripping and re-waxing the floor.

The use of WITT-O-LAST reduces the cost of maintaining floors tremendously by cutting in half the number of stripping jobs and re-waxings that would occur in a given period of time.

Gives a beautiful finish to all floors such as asphalt tile, vinyl tile, linoleum, rubber tile, marble, and terrazzo.

ACTIVE INGREDIENTS:	
3, 5, 4'-tert-butylmethyl salicylamide	0.04%
Related compounds	0.01
	0.05%
INERT INGREDIENTS	99.95%
Total	100.00%

It is vitally important for all old wax and finish to be removed from the floor before the application of WITT-O-LAST. If the old finish is not effectively removed, it will remain under the film of WITT-O-LAST, discolor, and mar the appearance of WITT-O-LAST.

(1) Strip the floor of all conventional wax or finish, using one of DE WITT'S efficient wax removers.

(2) Rinse the floor thoroughly and allow to dry.

(3) Apply two thin coats of WITT-O-LAST, allowing 15 minutes after the first coat has dried before application of the second coat.

(4) The gloss produced by WITT-O-LAST is such that buffing is not required after application. After exposure to traffic, the gloss of WITT-O-LAST can be restored by buffing.

(5) When it becomes necessary to strip a floor that has been maintained with WITT-O-LAST use WITT-O-LAST REMOVER only, as regular alkaline and detergent based wax removers will not remove WITT-O-LAST.

CAUTION

KEEP AWAY FROM CHILDREN

Harmful if swallowed

U.S.D.A. Reg. No. 1269-46
