DEWITT

MANUFACTURERS OF INDUSTRIAL MAINTENANCE PRODUCTS

DEWITT D-27 INSECTICIDE

Specially Formulated for Thermal Fogging Devices

Kills Roaches, Flies, Mosquitoes, and Gnats

DEWITT D-27 Insecticide is a highly effective, fast-acting, and non-toxic to humans and animals. It is specially formulated for use in thermal fogging devices to control and eliminate roaches, flies, mosquitoes, and gnats in industrial and commercial settings.

The active ingredient in DEWITT D-27 is a powerful insecticide that penetrates the respiratory system of the target insects, causing rapid death. It is safe for use in food processing areas, warehouses, and other industrial environments where insect control is critical.

DEWITT D-27 is available in a convenient, ready-to-use formulation. Simply mix with water and use in a thermal fogging device to create a fine mist that fills the area, effectively reaching all insects and their hiding places.

For more information on the benefits and proper use of DEWITT D-27 Insecticide, please contact your local distributor or visit our website. We are committed to providing high-quality industrial maintenance products that meet the needs of our customers.
