DE WITT CHEMICAL COMPANY

Control Those Resistant Flies, Use as a Dry Bait -
Use as a Wet Bait - Either Way it Kills Quickly
In or Out-of-Doors

Use only in dairy barns, livestock holding pens, stables, loading sheds, storage areas, inedible products areas of food processing plants, garbage collection stations, and outdoor areas. Do not use in edible products areas of food processing plants, restaurants, or other areas where food is commercially prepared or processed. Do not use in serving areas while food is exposed.

DIRECTIONS FOR USE

DRY BAIT: Remove cover from top and scatter DeWITT FLY BAIT lightly on floors, window sills, and other areas where flies light. Use about 1 lb per 100 sq. ft. Moisture on the surface first gives flies a taste.

WET BAIT: Dilute 1 lb of DeWITT FLY BAIT in a half gallon of water. Spray liquid on walls, floors, and make bait stations. Make bait stations of paper towels or paper treated with solution and placed in metal or paper cans. Place cans around area out of fly contact. If not used immediately, add water. A wet bait station is prepared by mixing with water.
