

ZEP FLY TRAP

Now With Rapid Acting DDVP

Active Ingredients: 2,2-dichlorovinyl dimethyl phosphate.....	0.435%
Other related compounds.....	0.065%
Inert Ingredients:	99.500%
Total	100.000%

CAUTION

KEEP OUT OF REACH OF CHILDREN

Harmful if swallowed or absorbed through the skin. Do not contaminate feed or foodstuffs. Do not apply to animals. If brought into contact with the skin, wash immediately with soap and water. Wash thoroughly with soap and water after handling and before eating or smoking. If swallowed, induce vomiting immediately and get medical attention. Keep out of the reach of children. If sprayed as a coarse wet spray, avoid breathing spray mist. Do not scatter where poultry feed or where animals can lick dry bait or sprayed surfaces. Not for use in homes or where milk is stored or processed. Atropine sulfate is antidotal.

Do not re-use empty container. Destroy when empty.

This product is toxic to fish and wildlife. Do not contaminate water by cleaning of equipment, or disposal of wastes. Apply this product only as specified on this label.

**Control Those Resistant Flies, Use as a Dry Bait —
Use as a Wet Bait — Either Way it Kills Quickly,
In- or Out-of-Doors**

For use in dairy barns, livestock holding pens, stables, loading sheds, storage areas, inedible products areas of food processing plants, garbage collection stations, and outdoor areas.

Do not use in edible products areas of food processing plants, restaurants, or other areas where food is commercially prepared or processed. Do not use in serving areas while food is exposed.

DIRECTIONS FOR USE

DRY BAIT: Remove cover from top and scatter ZEP FLY TRAP lightly on floors, window sills, and other areas where flies light. Use about ¼ lb. per 100 sq. ft. Moisturizing the surface first gives faster kill.

WET BAIT: Dissolve 1 lb. ZEP FLY TRAP in a half gallon of water. Spray liquid on walls, paint on sills, or make bait stations. These consist of paper towels or cloth saturated with solution and placed in metal or paper plates. Place many around area until flies are under control. Repeat at intervals, or when needed. (When bait stations become dry, rewet with water.)
