ZEP FORMULA 777-E.C.

WEED KILLER
Non-Selective

EPA Reg. No. 1270-TTS

EPA Est. No. 1270-GA-1

ACTIVE INGREDIENTS:

Bromacil (5-Bromo-3-sec-butyl-6-methyluracil)	1.52%
INERT INGREDIENTS*	98.48%
TOTAL	100.00%

*Contains aromatic petroleum distillate

Emulsifiable — To Be Diluted With Water or Petroleum Distillate Before Use.
Multi-Purpose — Kills Most Growth • Kills Johnson Grass and Poison Ivy

NET CONTENTS/GALS.

DIRECTIONS FOR USE (Cont'd.)

For annual weeds and grasses such as foxtail, ryegrass, wild oats, crabgrass, and ragweed, mix one part FORMULA 777 with nine parts water and apply with a sprayer at the rate of one gallon per 100 square feet.

For perennial weeds and grasses such as bluegrass, redtop, purpletop, aster, dandelion, and goldenrod, mix one part ZEP FORMULA 777 with four parts water and apply with a sprayer at the rate of one gallon per 100 square feet.

For Johnson grass and other hard-to-kill perennial weeds and grasses such as Bermuda grass, Dallis grass, nutgrass, saltgrass, and horsetail, mix one part ZEP FORMULA 777 with two parts water and apply with a sprayer at the rate of one gallon per 100 square feet.

PRECAUTIONARY STATEMENTS

HAZARDS TO HUMANS AND DOMESTIC ANIMALS

CAUTION

Harmful if swallowed. May irritate eyes, nose, throat, and skin. Avoid breathing of spray mist. In case of contact, flush skin or eyes with plenty of water; for eyes, get medical attention.

DO NOT apply, drain, or flush equipment on or near desirable trees or other plants or on areas where their roots may extend, or in locations where the chemical may be washed or moved into contact with their roots. DO NOT use on lawns, walks, driveways, tennis courts, or similar areas. Prevent drift of spray to desirable plants. DO NOT contaminate domestic waters. Keep from contact with fertilizers, insecticides, fungicides, and seeds. Thoroughly clean all traces of ZEP FORMULA 777 from application equipment immediately after use; otherwise, injury to desirable vegetation may result when equipment is used again. DO NOT re-use container; destroy when empty. Do not use with aluminum spray equipment.

STATEMENT OF PRACTICAL TREATMENT

If swallowed: DO NOT induce vomiting. Contact a physician or Poison Control Center immediately for treatment.

If on skin: Wash all areas contacted by product with soap and water. If irritation persists, contact a physician.

If in eyes: Flush eyes with water for 15 minutes. If irritation persists, contact a physician.

If inhaled: If discomfort or breathing difficulty arises, contact a physician.

PHYSICAL OR CHEMICAL HAZARDS

Combustible mixture - extinguish open flames before space spraying. DO NOT USE, Pour, Spill or Store near heat or open flame.

ENVIRONMENTAL HAZARDS

Do not apply directly to water or wetlands. Do not contaminate water by cleaning of equipment or disposal of wastes.

Bromacil is a chemical which can travel (seep or leach) through soil and can enter groundwater which may be used as drinking water. Bromacil has been found in groundwater as a result of agricultural use. The correct use rates by geographical area, specified herein, and proper mixing-loading site precautions and procedures must be followed to minimize potential bromacil movement into groundwater.

CAUTION KEEP OUT OF REACH OF CHILDREN

See other precautions on side panel.

DIRECTIONS FOR USE

It is a violation of Federal Law to use this product in a manner inconsistent with its labeling.

STORAGE AND DISPOSAL

DO NOT use, pour, spill, or store near heat or open flame. DO NOT contaminate water, food or feed by storage and disposal. Wastes resulting from the use of this product may be disposed of on site or at an approved waste disposal facility. Triple rinse (or equivalent) the container. Then offer for recycling or reconditioning, or puncture and dispose of in a sanitary landfill, or by other procedures approved by state and local authorities.

Dilutions of ZEP FORMULA 777 with water form an emulsion. It should be stirred thoroughly before use. If the emulsion stands for any length of time before use, it should be restirred.

For faster kill of established weeds and grasses, dilute ZEP FORMULA 777 with kerosene, mineral spirits, or fuel oil in the same quantities as called for above for water.

GENERAL INFORMATION

ZEP FORMULA 777 Weed Killer is a water-emulsifiable concentrate to be diluted with water and applied as a spray on non-cropland areas where bare ground is desired. It is an effective general herbicide for the control of many annual and perennial weeds and is particularly useful for the control of perennial grasses.

TIMING

To control most weeds for an extended period of time on non-cropland areas such as railroad, highway, and pipeline rights-of-way, petroleum tank farms, lumberyards, storage areas, and industrial plant sites, for best results, apply ZEP FORMULA 777 in use solution when weeds are less than six inches high. Do not apply when ground is frozen.
