STORAGE AND DISPOSAL

DO NOT use, pour, spill, or store near heat or open flame. **DO NOT** contaminate water, food or feed by storage and disposal. Wastes resulting from the use of this product may be disposed of on site or at an approved waste disposal facility. Triple rinse (or equivalent) the container. Then offer for recycling or reconditioning, or puncture and dispose of in a sanitary landfill, or by other procedures approved by state and local authorities.

Dilutions of ZEP FORMULA 777 with water form an emulsion. It should be stirred thoroughly before use. If the emulsion stands for any length of time before use, it should be re-stirred.

For faster kill of established weeds and grasses, dilute ZEP FORMULA 777 with kerosene, mineral spirits, or fuel oil in the same quantities as called for above for water.

GENERAL INFORMATION

ZEP FORMULA 777 Weed Killer is a water-emulsifiable concentrate to be diluted with water and applied as a spray on non-cropland areas where bare ground is desired. It is an effective general herbicide for the control of many annual and perennial weeds and is particularly useful for the control of perennial grasses.

TIMING

To control most weeds for an extended period of time on non-cropland areas such as railroad, highway, and pipeline rights-of-way, petroleum tank farms, lumberyards, storage areas, and industrial plant sites, for best results, apply ZEP FORMULA 777 in use solution when weeds are less than six inches high. Do not apply when ground is frozen.
