### GRANULAR CONCENTRATED POOL CHLORINE

Sodium Dichloro-S-Triazinetrione Dihydrate.....	100%
Available Chlorine.....	56%

Features a dry chlorine that dissolves immediately. A most effective germicide and algicide. Will not cause cloudiness in water. Will not add scale forming minerals in the water. Will maintain your pool crystal clear. Flame resistant.

The control of pH is greatly simplified using this concentrated pool chlorine. In fact, you will require from 1/2 to 1/4 times the amount of acid usually applied. This product provides a more stable form of chlorine for easier maintenance of an effective chlorine residual in pool water for disinfecting action. It requires less storage space and maintains constant strength regardless of storage time. It is economical to use in that, after the pool is stabilized, you will need to apply this product less often.

When starting up a new pool, superchlorinate to satisfy chlorine demand and to establish a chlorine residual of 1.0 ppm to 1.5 ppm available chlorine. To accomplish this, add 2 oz. per 1,000 gallons of pool water. The next morning, add cyanuric acid at the rate of 4 oz. per 1,000 gallons to stabilize pool.

Product should be added daily or as needed at the rate of 1/2 to 1/4 per 1,000 gallons of pool water to maintain a chlorine residual at all times of 1.0 ppm to 1.5 ppm as determined by a suitable test kit. The pH should be maintained between 7.2 and 7.6.

A shock treatment should be made every week during hot weather or after heavy rains. Less frequent shock treatments may be made during cool weather. For the shock treatment, add 1 oz. per 1,000 gallons of pool water. Swimmers should not be permitted in the pool after the shock treatment until the chlorine residual has reached the 1.0 ppm to 1.5 ppm range.

Keep in mind that a slight flexibility must be maintained in the event of heavy accumulations of dust and dirt caused by storms or super heavy bathing loads which require additional dosages as needed to maintain the chlorine residual between 1.0 ppm and 1.5 ppm.

Apply this product only as specified on this label.

# DANGER

## KEEP OUT OF REACH OF CHILDREN

Corrosive! Causes eye damage. Do not get in eyes or on skin. Do not breathe dust. May cause skin, nose and throat irritation. Wear safety goggles, dust respirator and protective clothing when handling. May be fatal if swallowed. May cause burns to broken skin.

In case of personal contact, remove excess material and flush skin or eyes with cold water for at least 15 minutes. For eyes, get medical attention. Clean contaminated clothing before re-use.

If swallowed, feed gruel or cooked cereal followed by olive oil or cooking oil. Call a physician immediately.

Strong oxidizing agent. Moisture contamination may liberate irritating and hazardous chlorine-containing gases. Decomposes at 350-475°F. with liberation of harmful gases. In case of decomposition, if possible, isolate container in open air or well ventilated area. Flood with large volume of water, if necessary.

Mix only with water. Do not mix with other pool chemicals. Use only dry, clean measuring utensils. Store in a cool, dry place. Keep closed when not being used.

Do not re-use container. Rinse empty container thoroughly with water and discard.

This product is toxic to fish. Treated pool effluent water should not be discharged where it will drain into lakes, streams, ponds, or public water. Do not contaminate water by cleaning of equipment or disposal of wastes.
