TESTING REPORT AVAILABLE

DIRECTIONS FOR USE
 It is a violation of Federal law to use this product in a manner inconsistent with its labeling.

STORAGE AND DISPOSAL
 Store in a cool dry place. Keep container closed. Post toxic spray mixture or residue that cannot be used according to label instructions must be disposed of according to Federal state or local procedures under the Resource Conservation and Recovery Act.
 Do not re-use empty container. Wrap can and put in trash collection.

READ DIRECTIONS CAREFULLY
 Point spray nozzle toward insect nest, hole or crevice where infestation is known to exist. Spray area until saturated with material. Also spray around in the general area until it is completely wet. The treated area will have a freezing action and prevent infestation for 2 to 4 weeks. If the residue becomes ineffective, repeat treatment.
 Always spray with the wind at the back.

DIELECTRIC
 Spray Test: Electrocutes 100% wasps on landing at 25,000 volts.
 Test: Electrocutes 100% wasps on landing at 25,000 volts.
WASPS ARE KNOCKED DOWN BY
 Following spray, wasps are stunned and die.
