Re: Pesticide Registration Notice (PR) 2007 Standards for Pesticide Container and Containment

Dear Sirs/Madam:

This correspondence serves as notice that we are amending by notification our label (CHLOR TECH SANITIZER & CLEANER EPA 1275-27) as shown in your notice.

"Notification of label change per PR Notice 2007-4. This notification is consistent with the guidance in PR Notice 2007-4. And the requirements of the EPA's regulations at 40CFR 156.10, 156.140, 156.144, 156.146 and 156.156. No other changes have been made to the labeling of the Confidential Statement of Formula for this product. I understand that it is a violation of 18 U.S.C. Sec 1001 to willfully make any false statement to the EPA. I further understand that if the amended label is not consistent with the requirements of 40CFR 156.10, 156.140, 156.144, 156.146, 156.156, this product may be in violation of FIFRA and I may be subject to enforcement action and penalties under sections 12 and 14 of FIFRA".

We submit the enclosed label for review noting (1) one change wherein we have deleted the words in the triple rinse directive" or store rinstate for later use or disposal". We show "place rinstate for disposal" Outlined in yellow are the changes made to reflect label revisions required.

t
We believe that the storing of such rinstate could possibly be mistaken for properly calibrated 100 or 200 ppm use dilutions for cleaning or sanitation. To avoid any such misunderstanding and/ or misuse of the contents, we deleted these eight words from the triple rinse section.

There is a batch number placed on the lid of the container. One is also placed on the individual carton that holds the 10lb jar, and another is placed on the master carton holding the 3-10 lb jars that comprise the shipping carton.

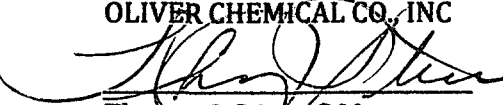

Labels are made well in advance and inventoried for use when the product is manufactured and packaged. Dates vary widely over the course of the year. Affixing batch numbers to the non-label aspects of the package, lids and cartons allows for immediate and long term tracking.

PRECAUTIONARY STATEMENTS

DANGER

Corrosive, Causes irreversible eye damage. Causes skin irritation. Harmful if swallowed or absorbed through the skin. Do not get in eyes, on skin or on clothing. Wear goggles or face shield. Wash thoroughly with soap and water after handling. Remove contaminated clothing and wash before reuse.

PHYSICAL AND CHEMICAL

HAZARDS:

STRONG OXIDIZING AGENT.

Oxidizing agent. Mix only with water. Use clean dry utensils. Contamination with moisture, organic matter, or other chemicals may start a chemical reaction, with generation of heat, liberation of hazardous gases. In case of contamination or decomposition do not reseal container. If possible isolate container in open air or well ventilated area. Flood with large volume of water, if necessary.

STORAGE AND DISPOSAL

Store in a cool dry area away from direct sunlight and heat. In case of spill flood the area with large quantities of water.

Do not contaminate food or feed by storage, disposal or cleaning of equipment.

"Nonrefillable container. Do not reuse or refill this container."

Offer for recycling if available. Triple rinse or pressure rinse container promptly after emptying. Triple rinse as follows: Empty the remaining contents into application equipment or mix tank. Fill the container 1/4 full with water and recap. Shake for 10 seconds. Pour rinsate into application equipment or a mix tank and place rinsate for disposal. Drain for 10 seconds, after the flow begins to drip. Repeat this procedure two more times.

Contents: 10 lbs Net Wgt. Made in the USA

CHLOR-TECH SANITIZER & CLEANER

A SANITIZER AND CLEANER COMBINED WITH HARD WATER SEQUESTERANTS

EPA REG. NO. 1275-27

EPA EST. NO. 01275-OH-1

ACTIVE INGREDIENT.....6.25%

Sodium dichloro-s-triazinetriene dihydrate

INERT INGREDIENTS.....93.75

Sodium Sulfate, sodium tripolyphosphate^o

^oEffective as sequesterants and cleaners

AVAILABLE CHLORINE 3.25%

KEEP OUT OF REACH OF CHILDREN

DANGER

FIRST AID: If swallowed: Call physician or poison control center immediately for treatment advice. Have person sip a glass of water if able to swallow. Do not induce vomiting unless told to do so by physician or poison control center. Do not give anything by mouth to an unconscious person. If on skin or clothing: Take off contaminated clothing. Rinse skin immediately with plenty of water for 15-20 minutes. Call poison control center or physician for treatment advice.

If in eyes: Hold eye open and rinse slowly and gently with water for 15-20 minutes. Remove contact lenses, if present, after the first 5 minutes, then continue rinsing eyes. Call poison control center or physician for treatment advice. When talking with physician or poison control center have container or label present.

NOTE TO PHYSICIAN:

Probable mucosal damage may contraindicate the use of gastric lavage. Emergency Phone: 1-888-541-6526, Monday through Friday, 8:30 A.M. to 4:30 P.M.

DIRECTIONS FOR USE

It is a violation of federal law to use this product in a manner inconsistent with its labeling.

THIS PRODUCT IS INTENDED FOR USE IN SANITIZING AND CLEANING SOFT SERVE MACHINES AND FLAT SURFACES IN THE FOOD SERVICE INDUSTRY.

TO CLEAN SOFT SERVE MACHINE AND EQUIPMENT

Empty freezer and mixer. Fill mix hopper with cold water and rinse through freezer. Add 2 ounces of CHLOR TECH SANITIZER & CLEANER to 4 gallons of hot water and stir until all powder is dissolved. Pour this solution into mix hopper and operate 5 minutes and drain.

TO SANITIZER SOFT SERVE MACHINES AND EQUIPMENT

Rinse after cleaning as above. Then sanitizer with a fresh solution with a fresh solution of 100 ppm of available chlorine (1/2 ounce to each gallon of water). After making sanitizing solution according to the above instructions, test the solution for ppm of chlorine. Pour this solution into mix hopper and operate for at least one minute or the time specified by local ordinances. Drain and allow the system to air dry.

DIRECTIONS FOR MAKING SANITIZING SOLUTIONS

Number of Ounces:	Amount of Water:	PPM Available Chlorine
1 ounce	2 gals.	100
2 ounces	4 gals.	100
4 ounces	8 gals.	100
6 ounces	12 gals.	100

Minimum solution temperature 75°F

DIRECTIONS FOR UTENSILS IN LAST TANK

1. Scrape and rinse all gross food particles and soils from utensils.
2. Wash thoroughly in a suitable detergent.
3. Rinse with clean, hot water until all soil and detergent are removed.
4. Immerse utensils in sanitizing solution for at least one minute or for the time specified by local ordinances.
5. Remove utensils and place on a clean rack or drainboard to air dry.

DIRECTIONS FOR FLAT SURFACES

1. Scrape and remove gross food particles and soil from the surface.
2. Clean with a suitable detergent and rinse with potable water.
3. Wet surface thoroughly with a sanitizing solution and allow to stand 2-5 minutes.
4. Drain excess use solution from surface prior to use. Rinse thoroughly with potable water and allow to air dry.
5. Drain excess use solution from surface. Rinse thoroughly with potable water and allow to air dry.

MECHANICAL OPERATIONS, sanitizing solution must be discarded after use and not reused.

FOR MANUAL APPLICATION, Fresh sanitizing solution must be made daily. Should the solution become soiled or diluted prepare fresh solution. Test solution for ppm chlorine with test stripes.
