

KLEER POOL ALGAECIDE

USDA REG. NO. 1275-30

ACTIVE INGREDIENTS:

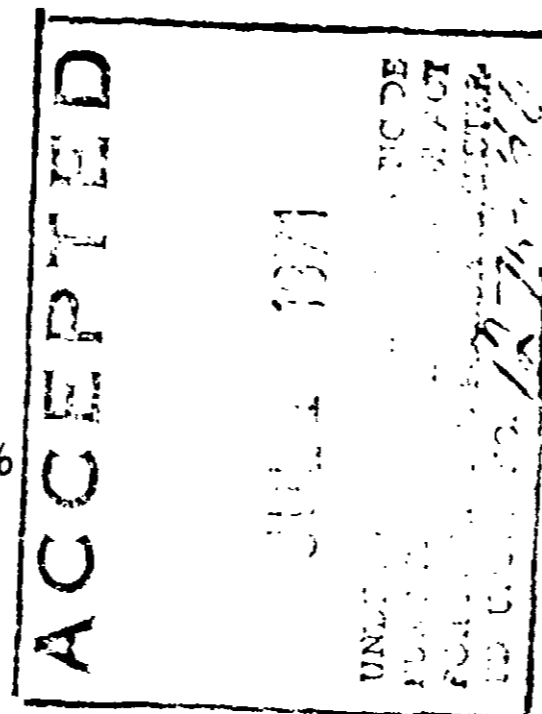

ALKYL* DIMETHYL BENZYL AMMONIUM CHLORIDES
(BENZALKONIUM CHLORIDE)
*C₁₂, C₁₄, C₁₆, AND OTHER RELATED ALKYL
GROUPS FROM C₈ TO C₁₈

INERT INGREDIENTS:

WATER.

5%

95%

DIRECTIONS

FOR SWIMMING POOL ALGAE CONTROL

For algae control use 80 ounces of KLEER POOL to each 7500 gallons of pool water (4 ppm). After first application add 40 ounces of KLEER POOL to each 7500 gallons of water (2 ppm) once a week or oftener, depending on the weather. During sunny and humid periods more frequent additions may be required.

Sprinkle KLEER POOL ALGAECIDE on surface of the water from various locations around the pool. Best results are obtained when pool is cleaned and filled with fresh water before using KLEER POOL.

Where algae is observed add 160 ounces of KLEER POOL to each 7500 gallons of pool water (8 ppm). Let stand overnight. The precipitated algae should be removed by vacuuming, fresh water added to replace water spent in cleaning and desedimentation, and retreated with 40 ounces of KLEER POOL to each 7500 gallons of water (2 ppm). Treatment should be continued by addition of 40 ounces of KLEER POOL to each 7500 gallons of water every week or oftener.

WARNING: THIS PRODUCT IS TOXIC TO FISH. TREATED EFFLUENT SHOULD NOT BE DISCHARGED WHERE IT WILL DRAIN INTO LAKES, STREAMS OR PONDS.

WARNING: KEEP OUT OF REACH OF CHILDREN

Undiluted algaecide may cause skin irritation or damage to the eyes. Harmful if swallowed. Avoid contact with skin and eyes. Do not take internally. In case of contact flush immediately with plenty of water. For eyes get medical attention. Avoid contamination of foods. Rinse empty container thoroughly with water and discard.
