

# SOIL-TECH

For non-selective weed control on non-cropland areas such as parking lots, fence rows, railroad sidings, storage yards, around buildings or industrial sites.

EPA REGISTRATION NO. 1275-37

## DIRECTIONS

### ACTIVE INGREDIENTS

1.50%

\* 2-methoxy-4, 6-bis(isopropylamino)-s-triazine.

### INERT INGREDIENTS

98.50%

### CAUTION: KEEP OUT OF REACH OF CHILDREN

Harmful if swallowed. Avoid contact with skin. Wash with soap and water in case of skin contact. Avoid inhalation of spray mist. Avoid contamination of feeds and foodstuffs.

Do not use, pour, spill or store near heat or open flame.

Do not reuse container. Bury or destroy when empty.

Do not contaminate water used for irrigation or domestic purposes.

Do not store near fertilizer, seeds, insecticides or fungicides.

### FOLLOW DIRECTIONS CAREFULLY

Buyer assumes all risks of use, storage or handling of this material not in strict accordance with directions given herewith.

**ACCEPTED**  
*February 1, 1973*  
UNDER THE FEDERAL INSECTICIDE  
FUNGICIDE AND RODENTICIDE ACT  
FOR ECONOMIC POISON REGISTERED  
ED UNDER NO. 1275-37

Uniformly spray 2 to 3 gallons per 1000 square feet of soil surface. Use undiluted (80 - 120 gals per acre). Thoroughly wet all foliage to insure contact action. Best results are obtained when applications are made during or soon after weed emergence, while growth is succulent. Where vegetation is tall and dense use 5 gallons per 1000 square feet, (200 gals per acre). Although this sterilant will burn plant foliage, much of its activity is through the roots and therefore adequate rainfall to move the chemical into the root zone is necessary.

Under conditions where rainfall is high and the growing season long, a second application may be necessary to maintain weed-free soil surface.

Care must be taken to keep this herbicide away from desirable flower beds, lawns and shrubs. Do not apply over roots of valuable trees, or woody ornamental plants. Do not apply herbicide inside the dripline of trees.
