DIRECTIONS

KLEER TECH SWIMMING POOL ALGAECIDE is used to control the growth of algae in swimming pools. For maximum effectiveness, pools containing heavy growth of algae should be cleaned prior to using KLEER TECH SWIMMING POOL ALGAECIDE.

For pools having just visible algae growth add an initial dose of 165 to 255 fl. oz. of KLEER TECH SWIMMING POOL ALGAECIDE per 10,000 gal. of water and remove settled algae debris by cleaning.

For treatment of a freshly cleaned and filled pool add initially 90 to 165 fl. oz. of KLEER TECH SWIMMING POOL ALGAECIDE PER 10,000 gal. of water.

To maintain pools free of visible algae growth, subsequent additions of 30 to 60 fl. oz. of KLEER TECH SWIMMING POOL ALGAECIDE per 10,000 gal. of water should be made every 5 to 7 days after the initial treatment.

Uniform distribution of KLEER TECH SWIMMING POOL ALGAECIDE throughout the water in the pool is necessary for maximum effectiveness.

KLEER TECH SWIMMING POOL ALGAECIDE is compatible with those chemicals normally used to treat pools and is effective at both acid and alkaline ph. KLEER TECH SWIMMING POOL ALGAECIDE can be used in pools treated with chlorine chemicals and may reduce the amount of those chemicals normally required. However, do not mix KLEER TECH SWIMMING POOL ALGAECIDE with concentrate dry liquid chlorine products.
