

### SUPPLEMENTAL LABEL

This labeling must be in the possession of the user at the time of pesticide application.

All applicable directions, restrictions and precautions on the EPA-registered label are to be followed.

### TRIANGLE BRAND COPPER SULFATE INSTANT POWDER

EPA Reg. No. 1278-5

#### DIRECTIONS FOR USE

It is a violation of Federal law to use this product in a manner inconsistent with its labeling.

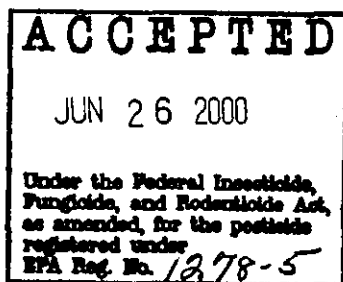

Apply Triangle Brand Copper Sulfate Instant Powder in a Bordeaux spray on the crops below:

Triangle Brand Copper Sulfate Instant Powder may be used as an ingredient in Bordeaux mixture sprays as a fungicide to control some plant diseases. If a Bordeaux mix is stated as 10-10-100, the first figure indicates the number of pounds of Triangle Brand Copper Sulfate Instant Powder; the second is the number of pounds of hydrated spray lime, and the third figure indicates the number of gallons of water to be used per acre.

To prepare a Bordeaux mixture, fill the tank 1/4 full with water while the agitator is running. Wash Triangle Brand Copper Sulfate Instant Powder into the tank through a copper, bronze, stainless steel, or plastic screen. Fill the tank 3/4 full with more water and wash the hydrated spray lime through the screen and then fill the tank. Agitate for several minutes to insure thorough mixing.

**BLUEBERRIES:** For bacterial canker, prepare and apply an 8-8-100 Bordeaux mixture in the fall before heavy rains begin and again 4 weeks later.

**CANEBERRIES:** For leaf and cane spot and Pseudomonas blight, prepare and apply an 8-8-100 Bordeaux mixture in the fall before heavy rains begin and again 4 weeks later.
