

The presence of algae in outdoor swimming pools is objectionable because of the color, cloudiness, odor, and increased chlorine demand of the water. The use of CHEK BAC 40% ALGICIDE will help to maintain the water in a clean condition. CHEK BAC 40% ALGICIDE is compatible with the usual water treatment chemicals. By controlling algae growth with CHEK BAC 40% ALGICIDE, the chlorine demand of the pool may be significantly reduced.

DANGER: Keep Out of Reach of Children. Corrosive. Causes eye damage and skin irritation. Do not get in eyes, on skin or on clothing. Wear goggles or face shield and rubber gloves when handling. Harmful or fatal if swallowed. Avoid contamination of food.

FIRST AID: In case of contact, immediately flush eyes or skin with plenty of water for at least 15 minutes. For eyes, call a physician. Remove and wash contaminated clothing before reuse.

If swallowed, drink promptly a large quantity of milk, egg whites, gelatin solution or if these are not available, drink large quantities of water. Avoid alcohol. Call a physician immediately.

NOTE TO PHYSICIAN: Probable mucosal damage may contraindicate the use of gastric lavage. Measures against circulatory shock, respiratory depression and convulsion may be needed.

This product is toxic to fish. Do not discharge treated effluent into lakes, streams or ponds.

Rinse empty container thoroughly with water and discard it.

ALGICIDE ^{40%} Concentrate

NOT A BACTERICIDE

DIRECTIONS

1. If algae growth is observed, add one quart CHEK BAC 40% ALGICIDE concentrate for each 10,000 gallons of water to kill and control those algae species most commonly found in swimming pools.
2. When existing growth is dead and algae have withered, clean the pool, draining and refilling if necessary, then add one quart CHEK BAC 40% ALGICIDE concentrate per 25,000 gallons of water.
3. If algae growth is absent, use two quarts CHEK BAC 40% ALGICIDE concentrate for each 50,000 gallons of water.
4. Add one quart of CHEK BAC 40% ALGICIDE concentrate per 50,000 gallons of water every five to seven days, to maintain between two and five parts per million of active ingredient. See serviceman for test kit.

for

SWIMMING POOLS

Active Ingredients: Methyl dodecylbenzyl trimethyl ammonium chloride and methyl dodecyl xylylene bis (trimethyl ammonium chloride) 40%
Inert Ingredients: Water 60%

DANGER KEEP OUT OF REACH OF CHILDREN
