	SPANT,		

IF IN EYES: Flush eyes with plenty of water. Call a physician if irritation persists.

Your product is also required to have a "Note to Physician: section. This section should be located directly below your "Statement of Practical Treatment" section and should contain the following information:

- Technical information on symptomatology;

and a second second

- Use of supportive measures to maintain life functions;
- Medicine that will counteract the specific physiological effects of the pesticide;
- Company telephone number to specific medical personnel who can provide specialized medical advice
- 2) Please revise your "Hazards to Humans" heading to read "Hazards to Humans and Domestic Animals". The following statements must appear on the label under this heading:

CAUTION

(

Harmful if swallowed or absorbed through skin. Causes moderate eye irritation. Avoid contact with eyes, skin, or clothing. Prolonged or frequently repeated skin contact may cause allergic reaction in some individuals. Wash thoroughly with soap and water after handling.

Personal Protective Equipment (PPE)

Applicators and handlers must wear:

- 1) Long-sleeved shirt and long pants,
- 2) Chemical-resistant gloves
- 3) Shoes and socks

USER SAFETY REQUIREMENTS

Follow manufacturer's instructions for cleaning/maintaining PPE. If no such instructions for washables, use detergent and hot water. Keep and wash PPE separately from other laundry.

USER SAFETY RECOMMENDATIONS

Remove clothing immediately if pesticide gets inside. Then wash thoroughly and put on clean clothing.

Remove PPE immediately after handling this product. Wash the outside of gloves before removing. As soon as possible, wash thoroughly and change into clean clothing.

Wash hands before eating, drinking, chewing gum, using tobacco or using the toilet.

3) Under your "Directions for Use" section, please add the subheading "Application Restrictions" and add the following language:

"Feeds prepared with this product should not be pelleted, nor mixed with feeds containing predominantly pellets. Further, this product should not be mixed in liquid feed supplements."

Move the restriction "The addition to feed of higher levels of this premix containing selenium is not permitted." under this section also. Delete the statement "CAUTION: Follow label directions".

- 4) The dosage rate should reflect the weight of the active ingredient in addition to the weight of the product.
- 5) Under your "Environmental Hazards" section, please change the statement "Do not contaminate water..." to read "Do not contaminate water when cleaning equipment or when disposing of equipment washwaters."
- 6) Revise "Ingredients" to read "Feed Ingredients" beneath the analysis section.

Please submit two (2) copies of your final printed label for before your release the product for shipment. Please refer to the A-79 enclosure for a further description of final printed labeling. If these conditions are not complied with, the registration will be subject to cancellation in accordance with FIFRA section 6(e). Your release for shipment of the product bearing amended labeling constitutes acceptance of these conditions. A stamped copy of the label is enclosed for your records.

If you have any questions regarding this action, please contact Dr. William Sproat of my team at (703) 308-8587.

Sincerely,

George T. LaRocca Product Manager (13) Insecticide Branch Registration Division (7505C)

e

It is a violation of federal law to use this product in a manner inconsistent with its labeling.

Allow free-choice to cattle. Cattle should consume an average of 7-1/2 oz, of McNess Stock Cow Vitamin & Mineral Mix per 100 pounds of body weight per month. This will supply the recommended average daily intake of 70 mg RABON® Oral Larvicide per hundred pounds of body weight. Animats should not be starved for minerals before Initiation of the McNess Stock Cow Vitamin & Mineral Mix with RABON® program but OMIT at salt from other feed after the program is started. Do not feed other free-choice sources of salt or mineral containing salt in any form. It should be fed in a clean, dry feeder preferably near a feed or water source. No more than a 7 to 10-day supply should be put out at one time. This will insure freshness and help to maintain adequate consumption rates. Cows should consume approximately 2-1/2 ounces per head daily on the average.

McNess Stock Cow Vitamin & Mineral Mix with RABON® Oral Larvicide prevents the development of horn flies, face flies, houseflies, and stable flies in the manure of treated cattle but is not effective against existing adult flies.

Supplemental fly control measures may be needed in and around cattle lots and buildings to control adult houseflies and stable flies which can breed not only in cattle manure but in other decaying vegetable matter silage on the premises.

KEEP OUT OF REACH OF CHILDRENI CAUTION PRECAUTIONARY STATEMENTS HAZARDS TO HUMANS

Harmful if swallowed. Avoid contact with skin and eyes. Avoid breathing dust. Wash thoroughly with soap and water after handling and before eating or smoking. If in eyes, wash with plenty of water, if initation persists, see a physician. Wear long-sleeved shirt and pants, chemical resistant gloves, shoes and socks for protection when handling. This product may cause skin sensitization reactions in certain individuals.

ENVIRONMENTAL HAZARDS

This product is toxic to fish. Do not contaminate water when disposing of equipment wash water.

STORAGE AND DISPOSAL

Do not contaminate water, food or feed by storage or disposal.

Storage-Store in a dry place in original container.

Container Disposal-Completely empty bag into application equipment. Then dispose of empty bag in a sanitary landfill or by incineration, or, if allowed by state and local authorities, by burning. If burned, stay out of smoke.

Pesticide Disposal-Wastes resulting from the use of this product may be disposed of on-site or at an approved waste disposal facility.

CAUTION: Follow label directions. The addition to feed of higher levets of this premix containing selenium is not permitted.
