DIRECTIONS FOR USE: GENERAL CLASSIFICATION

It is a violation of federal law to use this product in a manner inconsistent with its labeling

Allow free-choice to cattle. Cattle should consume an average of 1.1/8 lb of Range Mix-17 per 100 pounds of body weight per month. This will supply the recommended average daily intake of 70 mg. RABON. Oral Larvicide per hundred pounds of body weight. Animals should not be starved for minerals before initiation of the McNess Range. Mix-17 with RABON - program but OMIT all salt from other feed after the program is started. Do not feed other free-choice sources of salt or mineral containing salt in any form. It should be fed in a clean, dry feeder preferably near a feed or water source. No more than a 7 to 10-day supply should be put out at one time. This will insure freshness and help to maintain adequate consumption rates. Cows should consume approximately 6 ounces per head daily on the average.

McNess Range Mix-17 with RABON a Oral Larvicide prevents the development of horn flies, face flies, house flies and stable flies in the manure of treated cattle but is not effective against existing adult flies.

Supplemental fly control measures may be needed in and around cattle lots and buildings to control adult house flies and stable flies which can breed not only in cattle manure but in other decaying vegetable matter or silage on the premises.

KEEP OUT OF REACH OF CHILDREN!

CAUTION

PRECAUTIONARY STATEMENTS

HAZARDS TO HUMANS

Harmful if swallowed. Avoid contact with skin and eyes. Avoid breathing dust. Wash thoroughly with soap and water after handling and before eating or smoking. If in eyes, wash with plenty of water. If irritation persists, see a physician.
