DIRECTIONS

LIVESTOCK INSECT CONTROL:

Magnolia 1% VAPONA Insecticide may be applied directly to such livestock as hogs, sheep, goats, dairy cattle, and beef cattle for control of horn flies, face flies, stable flies, house flies and mosquitoes. Do not exceed TWO OUNCES daily per adult animal on dairy and beef cattle and ONE OUNCE per adult animal on goats, hogs and sheep. The dosage should be reduced ONE HALF for younger animals.

To apply as a fog for control of face fly, house fly, stable fly, mosquitoes and gnats, one gallon will treat 61,000 cubic feet in milk sheds, stables, livestock barns and feed storage rooms. Before applying reduce air movement as much as possible by closing doors, windows and other openings. It is not necessary to remove animals at the time of treatment. Do not use for fogging purposes in areas containing animals which have received direct application within 8 hours.

OUTDOOR AREAS: To be applied by, or under directions of trained personnel, to control flies, mosquitoes and certain other small flying insects, such as gnats. Apply as a fog or a fine mist. Five pints of 1% Vapona Solution will treat one acre. Apply with fogging apparatus or mist blowers. Do not treat areas where food or feed crops are growing.

DOG KENNELS: In treating dog kennels apply to outside dog runways, window sills and ledges. For control of fleas and brown dog ticks, use one quart of Magnolia 1% Vapona Solution per 1,000 square feet.

POULTRY HOUSES: Apply to manure, window sills, outside of penned enclosures and on floor of feed storage rooms.

see side panel for additional cautions

HOUSEHOLD, RESTAURANTS, THEATERS, FOOD PROCESSING PLANTS, WAREHOUSES. To be applied by pest control operators only, for the control of flies, mosquitoes, wasps, gnats, flying moths and certain other small flying insects, cock roaches, ants, spiders and silverfish, apply as a coarse wet spray at the rate not to exceed 1/2 ounce per average size room. Apply with low pressure sprayer or pressurized spray to localized areas insects may infest. Treat infested areas around baseboards, cracks, walls, door and window frames and localized areas of floors. Do not apply to areas which will be contacted frequently by children and do not allow them in treated areas until surfaces are dry. Do not contaminate food, water, food containers or cooking utensils. For use in BVI Fogger, Dura Fogger, Ultra Thermal Fogger. Use as is and after fogging is completed, be sure to flush out storage tank, jets, orifices, and lines with either kerosene or Diesel Fuel.

CAUTION

HARMFUL IF SWALLOWED, INHALED OR ABSORBED THROUGH THE SKIN. Wash thoroughly with soap and water after handling and before eating or smoking. Do not contaminate food, water or feed stuffs. Keep out of the reach of children. If swallowed, induce vomiting immediately and get medical attention. Atropine is antidotal.
