

1. Apply 1 gallon per 5 linear ft. of trench along the outside of the foundation wall, including entrances, porches and patios where the foundation is not more than 15 to 18 inches deep. If over 15 to 18 inches deep, apply 4 gallons per 5 linear feet.

2. Apply 2 gallons per 5 linear ft. in a trench along the inside of the foundation wall, including entrances, porches and patios where the foundation is not more than 15 to 18 inches deep. If over 15 to 18 inches deep, apply 4 gallons per 5 linear feet of trench. A 20 inch trench should be dug for buildings with deep porches, patios, etc., to the top of the foundation.

3. Apply 1 gallon per 5 linear ft. for all structures, including porches, patios, etc., where the foundation is not more than 15 to 18 inches deep. If over 15 to 18 inches deep, apply 4 gallons per 5 linear feet.
