

LINDANE 75% Wettable Powder is a special formulation for use in the treatment of seeds to give temporary protection to germinating seeds and young seedlings from wireworms and seed corn maggot. Thorough coverage of seed is important for maximum protection either with slurry or dust treatment. Where desirable this product can be mixed with the seed protectants and applied in combination. **DO NOT STORE LINDANE TREATED SEED.**

DIRECTIONS

SEED TREATMENT: For temporary protection against Wireworms and Seed-corn Maggot — Corn: 1 1/3 ozs. per bushel. Wheat: 1/3 oz. per 100 lbs. of seed. Sugar Beets: 5 1/3 oz. per 100 lbs. of seed.

In treating seed follow the instructions of your local State Experiment Station for seed treatment. Thorough coverage of seed is necessary for maximum results with either dust or slurry treatment. Treatment should be made just before planting time.

WARNING

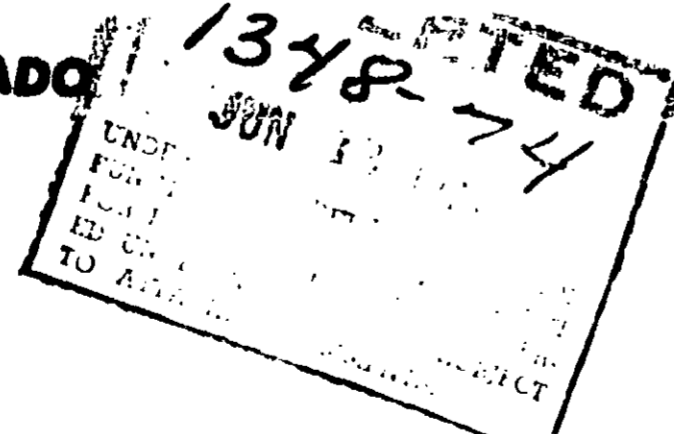

TREATED SEEDS exposed on soil surface will be hazardous to birds and other wildlife.

DO NOT STORE TREATED SEED. Where the material is applied to seeds dry, as a powder avoid inhalation of dust and work in a well ventilated room.

TREATED SEED must bear a label stating "Treated Seed". Do not use for food, feed, or oil purposes."
