INFORMATION

Evershield acts to bind the active protectant firmly to the seed in a dustfree, water permeable film. It dries quickly without the need of additional heat. Improves seed appearance, and eliminates buildup on planter plates. It is designed for the protection of seed from soil borne fungi which can cause seed, seedling and root rots. Evershield also aids in the protection of stored seed, including protection against insects (granary weevils, sawtooth grain beetles). EVERSHIELD SEED PROTECTANT concentrate is for use by professional seed treaters only.
