Mr. Randy Sample
Cargill Nutrena Feed Division
P.O. Box 5614
Minneapolis, MN 55440

NOV 6 1986

Dear Mr. Sample:

Subject: Amendment - Inert Ingredient Change/Label Revision
Nutrena FLY-NO-MOR Livestock Mineral With Rabon
Oral Larvicide
EPA Registration No. 1352-28
Your Application Dated January 16, 1986

The amendment referred to above, submitted in connection with registration under the Federal Insecticide, Fungicide, and Rodenticide Act, as amended, are acceptable provided that you make the labeling changes listed below before you release the product for shipment bearing the amended labeling:

- Please refer to labeling comments made on Registration No. 1352-25 made in response to your January 16, 1986 letter. Those comments pertain directly to this product.

Submit five (5) copies of your final printed labeling before you release the product for shipment.

A stamped copy of the labeling is enclosed for your records.

Sincerely yours,

George T. LaRocca
Product Manager (15)
Insecticide-Rodenticide Branch

**FLY-NO-MOR™
LIVESTOCK MINERAL MIX
WITH RABON. ORAL LARVICIDE
DIRECTIONS FOR USE
GENERAL CLASSIFICATION**

FOR CATTLE ONLY:

It is a violation of Federal law to use this product in a manner inconsistent with its labeling.
Mix or blend Nutrena Fly-No-More Livestock Mineral Mix into the daily roughage and grain ration. Each ounce of Nutrena Fly-No-More Livestock Mineral Mix contains 490 mg of Rabon Oral Larvicide. Feed at a rate to provide an average daily intake of 70 mg of Rabon Oral Larvicide per 100 lbs. body weight. Use the following feeding table as a guide:

Body Weight of Animal lbs.	Ounces per head Nutrena Fly-No-Mor Livestock Mineral Mix to feed daily
700	1.0
800	1.2
900	1.3
1000	1.4
1100	1.6
1200	1.7
1300	1.8
1400	2.0

ACCEPTED
with COMMENTS
in EPA Letter Dated:

NOV 6 1986

Under the Fungicide, Insecticide,
as amended registered
1352-26

Do not feed other minerals or salt after this program is started.

Start feeding Nutrena Fly-No-Mor Livestock Mineral Mix early in the spring before flies begin to appear and continue feeding throughout the summer into the fall until cold weather restricts fly activity.

Nutrena Fly-No-Mor Livestock Mineral Mix may be fed up to weaners and to lactating dairy cows.

Nutrena Fly-No-Mor Livestock Mineral Mix prevents the development of horn flies, face flies, house flies and stable flies in the manure of treated cattle but is not effective against existing adult flies. When starting a feeding program during the fly season, it is recommended to use other methods to reduce the population of existing adult flies.

In some cases supplemental fly control measures may be needed in cattle lots and buildings to control house flies and stable flies which can breed not only in cattle manure but in other decaying vegetable matter or silage on the premises.

In order to achieve optimum fly control, Nutrena Fly-No-Mor Livestock Mineral Mix should be used in conjunction with other good management and sanitation practices.
