

For professional termite and pest control service, contact your nearest Vaccinol-Vegetrol Licensee or Authorized Dealer.

PROFESSIONAL TERMITE PROTECTION

PRESSURE IMPREGNATION, by which VACCINOL is injected into the wood at 150 to 175 pounds pressure through small holes bored for that purpose using a tapered nozzle. (Holes for pressure treating must always be bored almost entirely through the wood.)

PRESSURE SPRAY, by which the exposed surfaces of wood are thoroughly sprayed and coated, and all voids and mortar joints treated with VACCINOL.

SOIL POISONING FOR TERMITE CONTROL

Dig a trench around piers and foundation walls a depth of 30 inches but in no case below the top of the footings. Mix VACCINOL thoroughly with the soil using 2 gallons for 5 lineal feet of trench. When back filling spray soil thoroughly with VACCINOL.

Grass, plants and shrubbery within 3 feet of trench should be removed or protected with tar paper.

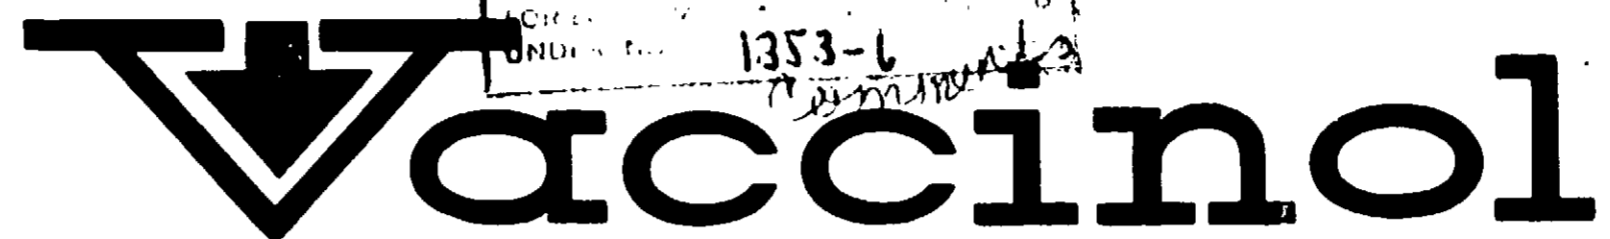

POWDER-POST BEETLES

To control Powder-Post Beetles which invade sub-flooring, hardwood flooring, saturate thoroughly with VACCINOL.
