

# SOLVIN AAA

A quick-acting disinfectant cleanser, deodorant and stain remover for urinals and toilet bowls. Dissolves uric acid salts.

ACTIVE INGREDIENTS: Hydrogen chloride	21.50%
Sulfuric acid	1.50%
INERT INGREDIENTS:	77.00%
	<u>100.00%</u>

## DIRECTIONS

Pour Solvin into plastic or china bowl, allowing 4 ounces per fixture. Apply with swab that is just wet but not dripping.

### URINALS

1. Remove strainer.
2. Pour 3 ounces Solvin into drain.
3. With swab, clean urinal surface including areas behind side edges and under top.
4. Swab inside of drain pipe.
5. Replace strainer. Flush urinal several times.

### TOILET BOWLS

1. Depress water level by pouring rapidly half a pail of water into bowl.
2. Swab out bowl and area under flushing rim. Flush bowl.

*Do not use Solvin on Sinks, Bathtubs or Drinking Fountains*

## POISON

**DANGER! Corrosive: Keep Out of Reach of Children. May be fatal if swallowed. Do not breathe vapor or fumes. Produces chemical burns. Do not get in eyes, on skin, or on clothing.**

### ANTIDOTE

Internal: If swallowed, give 1-2 glasses of water. If vomiting occurs, do not give more. If no vomiting occurs, give 1-2 glasses of water. If necessary, give 1-2 glasses of milk or raw egg white.

External: Wash with water. If on skin, wash with water. If on clothing, wash with water.

Get medical attention. Show this label to the doctor.

Keep out of reach of children. Do not use in confined spaces.

### DIRECTIONS FOR USE

**FLOORS:** When mopping or scrubbing use 1½ ounces of Pine Oil Disinfectant to each gallon of water in the bucket.

**DISINFECTING:** Remove all filth and dirt from the premises and use a solution of one part of Pine Oil Disinfectant to 100 parts of water. This mixture acts as a disinfectant against S. typhosa.

**TOILET ROOMS, WATER CLOSETS AND URINALS:** Wash the closet and urinal bowls regularly with a solution made of ⅓ cupful of Pine Oil Disinfectant in each gallon of water, leaving the solution in the bowl as long as possible. Scrub the floor and seat frequently with this solution.

**GARBAGE:** To aid in preventing the breeding of flies, sprinkle with the solution in the proportion of 1½ ounces of Pine Oil Disinfectant to each gallon of water. Rinse the empty can with some of the solution and leave the wash in the can.

**IN A TYPHOID SICKROOM:** In the disinfecting of beds, clothes, utensils, rooms, and sanitizing the hands of those attending typhoid patients, Pine Oil Disinfectant should be used in the proportion of three ounces in each gallon of water.

**CUSPIDORS:** A solution of 2½ ounces of Pine Oil Disinfectant to a gallon of water will aid in deodorizing cuspidors. Leave this mixture standing in the cuspidors. Always put Pine Oil Disinfectant in pail first and then add the water.
