UNICO 1% Rotenone Dust

CAUTION

May be harmful if swallowed. May cause irritation of nose and throat of some individuals. Avoid inhalation of dust. Do not contaminate feed and foodstuffs.

This product is poisonous to fish. Keep out of any body of water. Do not apply to crops or areas other than those for which directions are stated in this label. Do not apply when weather conditions favor drift of dust from area treated. Clean application equipment and dispose of wastes, and unused chemical in a pit on non-crop land located well away from water supplies.

DESTROY EMPTY CONTAINERS. Do not reuse this container for any purpose. Burn empty containers in a hot fire, outdoors, in an isolated area. The smoke is hazardous. Stay well away from the smoke

DIRECTIONS FOR USE

To control the insects on the crops listed below, apply 25 to 35 pounds of dust per acre.

BEANS—Mexican bean beetle, bean leaf beetle.

PEAS—Pea aphid.

CABBAGE, CAULIFLOWER, AND BROCCOLI—Imported cabbage worm, flea beetles.

ASPARAGUS—Asparagus beetle.

RASPBERRIES—Raspberry fruit worm.

Begin applications when the insects first appear, or before damage is noticeable, and repeat at 5 to 10-day intervals as necessary through growing season. Apply the dust thoroughly and uniformly to upper and lower surfaces of all foliage.

BLUEBERRY MAGGOT—Apply 25 to 35 pounds of dust per acre. The first application should be made within a few days of the emergence of the first flies, which is usually about the time blueberries begin to ripen, and applications should be repeated at 5 to 7-day intervals until three or more applications have been made in accordance with local conditions.

DO NOT APPLY TO ANY OF THE ABOVE NAMED CROPS WITHIN 1 DAY OF HARVEST.

NOTICE

Use only for the purposes and in compliance with the limitations, cautions or warnings stated on this label.
